2. *We have a very limited operating history of our operations, which may make it difficult for investors to evaluate our historical performance or future prospects.*

Our Company was originally incorporated on as a private limited company under the Companies Act, 2013 with Registrar of Companies, Maharashtra at Mumbai through a certificate of incorporation dated December 21, 2021 Post which we started our business operations. We have very limited operating history from which one can evaluate our business, future prospects and viability. Our future revenues and profitability are difficult to estimate and could fluctuate significantly and as a result the price of our Equity Shares may be volatile. For further details, see the section titled “*Our History and Certain Corporate Matters*” and “*Restated Financial Statements*” on page 99 and 118, respectively of the Draft Prospectus.

Our Company has purchased the business of M/s Alkosign Display Systems vide Business Transfer Agreement dated March 20, 2020 entered into between M/s Alkosign Display Systems and our company. Vide this agreement, it has been mutually decided between the parties that the business namely, the Brand (Trademark), the domain name, the Goodwill, the Machines as mentioned in the agreement and the stock namely finished goods, semi-finished goods, raw materials used to manufacture these products is sold to our Company. Given our Company’s limited operating history of our business, we may not have sufficient experience to address the risks frequently encountered by early-stage companies, including our ability to successfully completing our orders or maintain adequate control of our costs and expenses. Given the fragmented nature of industry in which we operate, we often do not have complete information about our competitors and accordingly we may underestimate supply in the market. If we are unsuccessful in addressing such risks, our business may be materially and adversely affected. Accordingly, investors should consider our business and prospects in the light of the risks, losses, and challenges that we face as an early-stage company.

3. *Our Promoters may not have adequate experience in the business activities undertaken by the Company.*

Our Company has acquired the business of M/s Alkosign Display Systems vide Purchase of Business Agreement dated March 20, 2020 entered into between M/s Alkosign Display Systems and Alkosign Private Limited. Vide this agreement, it has been mutually decided between the parties that the business namely, the Brand (Trademark), the domain name, the Goodwill, the Machines as mentioned in the agreement and the stock namely finished goods, semi-finished goods, raw materials used to manufacture these products is sold to our Company. Prior to this acquisition, our Promoters were engaged in the distribution business and did not have much exposure in the manufacturing business. Although he has been successfully running the business operations but lack of vintage experience to address the risks frequently encountered by industry, may adversely affect our operations.

4. *Volatility in the supply and pricing of our raw materials may have an adverse effect on our business, financial condition and results of operations. As on the date of the Draft Prospectus, we are dependent on a limited number of suppliers for our raw material requirements. Any kind of refusal from them can hinder our production resulting into loss of our clients.*

The principal raw materials used in our manufacturing process are Particle Board, Aluminium Frames, Ceramic Coil, Gi Sheet, Pre-Painted Resin Coated Steel, Adhesive, Cartons and ABS Corners. The costs of raw materials consumed for the period ended June 30, 2021 and for the financial year 2021 was 27.13% and 61.19% respectively our total revenue from operations. Procurement of these raw materials is done from both domestic and international markets. We do not have long term agreements or MOU with any of our raw material or inputs suppliers. In the event the prices of such raw materials were to rise substantially or if imports were to be restricted in any manner, we may find it difficult to make alternative arrangements for supplies of our raw materials, on the terms acceptable to us, which could materially affect our business, results of operations and financial condition. Our Company generally have good understanding between suppliers and customers based on which our business runs and any discontinuance in the said understanding with the suppliers for receiving raw materials and any customers for their orders may have impact on the operations of our Company. While we generally pass on the cost increases to our customers, we may not be able to pass on every instance of increase in input cost and may have to pursue internal cost control measures. If we are not able to compensate for or pass on our increased costs to customers, such price increases could have a material adverse impact on our result of operations, financial condition and cash flows. Purchases made from our top 10 suppliers represented 78.65 % and 89.71 % of our raw material purchase during the period ended June 30, 2021 and Financial year March 31, 2021 respectively, of our total purchases. While we are not significantly dependent on any single raw material supplier, raw material supply and pricing can be volatile due to a number of factors beyond our control, including global demand and supply, general economic and political conditions, transportation and labour costs, farmers’ unrest, natural disasters, competition, import duties, tariffs and currency exchange rates, and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use. Therefore, we cannot assure you that we will be able to procure adequate supplies of raw materials in the future, as and when we need them on commercially acceptable terms.

5. ***Our top 10 customers contribute majority of our revenues from operations for the year ended March 31, 2021 and for the period ended June 30, 2021. Any loss of business from one or more of them may adversely affect our revenues and profitability.***

Our top 10 and top 5 customers contributed 76.15% and 62.16 % of our revenues for the year ended March 31, 2021 and contributed 79.33% and 68.07% of our revenues for the period ended June 30, 2021. Such concentration of our business on a few projects or clients may have an adverse effect on our results of operations and result in a significant reduction in the award of contracts which could also adversely affect our business if we do not achieve our expected margins or suffer losses on one or more of these large contracts, from such clients. We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations. However, the composition and revenue generated from these customers might change as we continue to add new customers in the normal course of business. While we believe that we shall not face challenges in finding new customers in the ordinary course of business, our results of operations and financial condition may be adversely affected if we remain dependent on few customers.

6. ***We generate our major portion of sales of our product in certain geographical regions especially Maharashtra. Any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.***

Our revenue from operations in Maharashtra contributed 64.51% and 27.01% respectively for the year ended March 31, 2021 and for the period ended June 30, 2021, as per our Restated Financial Statements. Such geographical concentration of our business in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience in such regions to expand our operations in other parts of India and overseas markets, should we decide to further expand our operations. Factors such as competition, culture, regulatory regimes, business practices and customs, industry needs, transportation, in other markets where we may expand our operations may differ from those in such regions, and our experience in these regions may not be applicable to other markets. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations, business practices and industry needs, have stronger relationships with local dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside such markets may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we may face and should not rely on our results of operations for any prior periods as an indication of our future performance.

7. ***Introduction of alternative practices caused by changes in technology or consumer preferences may affect demand for our existing products which may adversely affect our financial results and business prospects.***

Our products are used mainly used in educational institutions which were majorly affected due to the outbreak of COVID – 19. The advent of this pandemic situation has caused a shift from offline education to online education, because of which our businesses were majorly affected. Our business is affected by change in technology, consumer preferences, market perception of brand, attractiveness, convenience, safety and environmental norms. Our ability to anticipate such changes and to continuously develop and introduce new and enhanced products successfully on a timely basis will be a key factor in our growth and business prospects. There can be no assurance that we will be able to keep pace with the technological advances that may be necessary for us to remain competitive. Further, any substantial change in preference of consumers who are end users of our products will affect our customers' businesses and, in turn, will affect the demand for our products. Any failure to forecast and/or meet the changing demands of packaging businesses and consumer preferences may have an adverse effect on our business, profitability and growth prospects.

8. ***We are subject to foreign currency exchange rate fluctuations which could have a material and adverse effect on our results of operations and financial conditions.***

We incur expenses in foreign currencies during the normal course of business for purchasing products from our global suppliers at mutually agreed prices. Changes in value of currencies with respect to the Rupee may cause fluctuations in our operating results expressed in Rupees. The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in future. Fluctuations in the exchange rates may affect our Company to the extent of cost of goods and sales in foreign currency terms. Although we generally hedge our foreign exposure, any adverse or unforeseen fluctuations with respect to the unhedged exchange rate of any foreign currency for Indian Rupees may affect our Company's results of operations.

9. *Orders placed by customers may be delayed, modified or cancelled, which may have an adverse effect on our business, financial condition and results of operations.*

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such products or cause its cancellation. Due to the possibility of cancellations or changes in scope and schedule of delivery of such products, resulting from our customers discretion or delay in procurement of raw material or problems we encounter in the delivery of such products or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the customers may default or otherwise fail to pay amounts owed.

10. *We may not be able to accurately manage our inventory, this may adversely affect our goodwill and business, financial condition and results of operations.*

We maintain physical inventory for substantially all of our products. Changes in consumer requirements and demands for these products expose us to significant inventory risks. The demand for specific products can change between the time of manufacturing a product and the time of shipment of these products from our facilities. Further, accurate assessment of market demand requires significant investment in the creation of a sales and marketing network and training of marketing personnel. There is no guarantee that our estimate of market demand will be accurate. In the event that we overestimate the demand for our products, we will have expended resources in manufacturing excess products, insurance costs, distribution expenses and storage and other allied expenditures and if we under-stock one or more of our products, we may not be able to obtain additional units in a timely manner and will lose out on sales opportunities that our competitors will capitalize on and thereby increase their respective market shares. In addition, if our products do not achieve widespread consumer acceptance, we may be required to take significant inventory markdowns, or may not be able to sell the products at all. Any incorrect assessment of the demand for our products may adversely affect our business, financial condition and results of operations.

11. *Our Company has manufacturing facility located at Plot No 12 A MIDC, Saravli, Bhiwandi - 421311, Maharashtra. Any delay in production at, or shutdown of, or any interruption for a significant period of time, in this facility may in turn adversely affect our business, financial condition and results of operations.*

Our Company has manufacturing facility located at Plot No 12 A MIDC, Saravli, Bhiwandi - 421311, Maharashtra. Our success depends on our ability to successfully manufacture and deliver our products to meet our customer demand. Our manufacturing facility is susceptible to damage or interruption or operating risks, such as human error, power loss, breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, loss of services of our external contractors, terrorist attacks, acts of war, break-ins, earthquakes, other natural disasters and industrial accidents and similar events. Further, our manufacturing facility is also subject to operating risk arising from compliance with the directives of relevant government authorities. Operating risks may result in personal injury and property damage and in the imposition of civil and criminal penalties. If our Company experiences delays in production or shutdowns at any or all of these facilities due to any reason, including disruptions caused by disputes with its workforce or any external factors, our Company's operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations.

12. *Our future growth can be restricted by our limited manufacturing capacity.*

Our manufacturing facility is located at Bhiwandi, Maharashtra. This facility enables us to manufacturing of visual presentation systems namely writing boards/display boards/notice boards of different types along with its associated accessories and stands used for these boards, school benches, desks and their accessories. As on date of this Draft Prospectus, we have machineries, which is running close to its installed capacity. For the period ended June 30, 2021 and for the financial year ended March 31, 2021, our production capacity for ceramic boards was utilised at 93.77% and 92.61%, production capacity for laminated boards was utilised at 94.60% and 78.84%, respectively, production capacity for glass boards was utilised at 65.22% and 96.21% of total installed capacity and our products, Up Down Board and Desks and benches are running at full capacity. For details of our installed and actual capacities, please refer the chapter titled "Our Business" beginning on page 82 of the Draft Prospectus. If we are unable to expand our manufacturing capacity in our facilities, we may not be able to tap growth opportunities in the textile market. However, our management believes that we have sufficient area which can be utilized for installing additional capacity and our Company can increase the manufacturing capacity by buying new machineries as and when required.

13. *The shortage or non-availability of power facilities may adversely affect our manufacturing processes and have an adverse impact on our results of operations and financial condition.*

Our manufacturing processes requires substantial amount of power facilities. The quantum and nature of power requirements of our industry and Company is such that it cannot be supplemented/ augmented by alternative/ independent sources of power supply since it involves significant capital expenditure and per unit cost of electricity produced is very high in view of increasing oil prices and other constraints. We are mainly dependent on third party for meeting our electricity requirements. Any defaults or non-compliance of the conditions may render us liable for termination of the agreement or any future changes in the terms of the agreement may lead to increased costs, thereby affecting the profitability. Further, since we are majorly dependent on third party power supply; there may be factors beyond our control affecting the supply of power. Any disruption / non availability of power shall directly affect our production which in turn shall have an impact on profitability and turnover of our Company.

14. Our industry is labour intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.

We believe that the industry in which we operate in faces competitive pressures in recruiting and retaining skilled and unskilled labour. Our industry being labour intensive is highly dependent on labour force for carrying out its manufacturing operations. Shortage of skilled/unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. Our Company has taken efforts to maintain a lower attrition among the laborers by facilitating them with various in-house facilities and benefits to our employees. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

15. We appoint contract labour for carrying out certain of our operations and we may be held responsible for paying the wages of such workers, if the independent contractors through whom such workers are hired default on their obligations, and such obligations could have an adverse effect on our results of operations, cash flows and financial condition.

We engage independent contractors through whom we engage contract labourers for performance of certain functions at our manufacturing facility for the performance of non-core tasks. Although we do not engage these labourers directly, we are responsible for any wage and statutory payments to be made to such labourers in the event of default by such independent contractors. Any requirement to fund their wage requirements may have an adverse impact on our results of operations and our financial conditions. In addition, we may be liable for or exposed to litigations, sanctions, penalties or losses arising from accidents or damages caused by our workers or contractors.

16. Strikes, work stoppages or increased benefit or wage demands by our employees and labour could adversely affect our business and results of operations.

We may face increased labour costs because of competition for skilled employees, increase in minimum wages or employee benefits under applicable laws, our growth could be adversely affected. If we are unable to successfully negotiate with our employees or if there is any shortage or disruption in the availability of labour, it could result in work stoppages or increased operating costs. Our supply of labour which is on contract basis may be adversely affected by, among other things, work stoppages and labour disputes.

Such events may also increase the price of labour that we can source for our business operations. India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Although there is no labour union formed by our workers at the time of this Draft Prospectus, we cannot assure you that our workers will not unionize, or attempt to unionize in the future. Further, there can be no assurance that we will have adequate access to skilled as well as unskilled workforce at reasonable rate and in the industry in which we operate. As a result, we may be required to incur additional costs to ensure the quality and timeliness of our services, which may in turn affect our results of operations.

17. *We could become liable to customers, suffer adverse publicity and incur substantial costs as a result of defects in our products, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.*

Any failure or defect in our products could result in a claim against us for damages, regardless of our responsibility for such a failure or defect. However, our products, processes and inputs have to undergo a special quality test conducted by in house laboratory to ensure that the same is of the requisite quality and meets the relevant quality standard. Although we attempt to maintain quality standards, we cannot assure that all our products would be of uniform quality, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity. Also, our business is dependent on the trust our customers have in the quality of our products. Any negative publicity regarding our company, brand, or products, including those arising from a drop in quality of merchandise from our vendors, mishaps resulting from the use of our products, or any other unforeseen events could affect our reputation and our results from operations.

18. *Our Company is dependent on third party transportation providers for the delivery of our goods and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.*

Our Company uses third party transportation providers for delivery of our goods. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business. In addition, goods may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our raw materials may have an adverse effect on our business and results of operations.

Further, disruptions of transportation services due to weather-related problems, strikes, lock-outs, inadequacies in the road infrastructure, or other events could impair ability to procure raw materials on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

19. *Compliance with, and changes in, safety, health and environmental laws and regulations may adversely affect our business, prospects, financial condition and results of operations.*

Due to the nature of our business, we expect to be or continue to be subject to extensive and increasingly stringent environmental, health and safety laws and regulations and various labour workplace and related laws and regulations. We are also subject to environmental laws and regulations, including but not limited to:

- Environment (Protection) Act, 1986
- Air (Prevention and Control of Pollution) Act, 1981
- Water (Prevention and Control of Pollution) Act, 1974
- Hazardous Waste Management & Handling Rules, 2008
- Other regulations promulgated by the Ministry of Environment and Forests and the Pollution Control Boards of the state of Maharashtra.

which govern the discharge, emission, storage, handling and disposal of a variety of substances that may be used in or result from the operations of our business.

The scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted and hence the costs and management time required to comply with these requirements could be significant. Amendments to such statutes may impose additional provisions to be followed by our Company and accordingly the Company needs to incur clean-up and remediation costs, as well as damages, payment of fines or other penalties, closure of production facilities for non-compliance, other liabilities and related litigation, could adversely affect our business, prospects, financial condition and results of operations.

20. *Continued operations of our manufacturing facility are critical to our business and any disruption in the operation of our facility may have a material adverse effect on our business, results of operations and financial condition.*

Our manufacturing facility is subject to operating risks, such as unavailability of machinery, break-down, obsolescence or failure of machinery, disruption in power supply or processes, performance below expected levels of efficiency, labour disputes, natural disasters, industrial accidents and statutory and regulatory restrictions. Our machines have limited lives and require periodic cleaning as well as annual over hauling maintenance. In the event of a breakdown or failure of such machinery, replacement parts may not be available and such machinery may have to be sent for repairs or servicing. We have not entered into any technical support service agreements for the maintenance and smooth functioning of our equipment and machineries. This may lead to delay and disruption in

our production process that could have an adverse impact on our sales, results of operations, business growth and prospects.

21. *Our clients operate in various industry segments/verticals and fluctuations in the performance of the industries in which our clients operate may result in a loss of clients, a decrease in the volume of work we undertake or the price at which we offer our products.*

Our business operations are exposed to fluctuations in the performance of the industries in which our significant clients operate. Our clients may also decide to reduce spending on services due to a changing economic environment and other factors relating to the industry in which they operate. For instance, in this period of pandemic wherein all the industries are facing a slowdown and cash crunch due to the lockdown and other restrictions imposed by several State Governments has resultant in a widespread impact on the industry. Further, majority of our customer base are educational institutions, which were majorly affected by Covid-19 outbreak. The same has been eased out due to opening of schools, colleges throughout the country, however it is difficult for us to predict the impact that Covid 19 will have on us, in the future. We continue to closely monitor the impact of the same. A loss of any of our significant clientele, a decrease in the volume of work our clients outsource to us or a decline in our prices may materially and adversely affect our business, operations, financial condition, results of operations.

22. *Our lenders have charge over our movable and immovable properties in respect of finance availed by us.*

We have secured our lenders by creating a charge over our movable and immovable properties in respect of loans / facilities availed by us from banks and financial institutions. The total amounts outstanding and payable by us as secured loans were Rs 926.80 Lakhs as on June 30, 2021. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be forfeited by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations. For further information on the Financial Indebtedness please refer to page 131 of this Draft Prospectus.

23. *Any increase in interest rates would have an adverse effect on our results of operations and will expose our Company to interest rate risks.*

We are dependent upon the availability of equity, cash balances and debt financing to fund our operations and growth. Any fluctuations in interest rates may directly impact the interest costs of such loans and, in particular, any increase in interest rates could adversely affect our results of operations. Furthermore, our indebtedness means that a material portion of our expected cash flow may be required to be dedicated to the payment of interest on our indebtedness, thereby reducing the funds available to us for use in our general business operations. If interest rates increase, our interest payments will increase and our ability to obtain additional debt and non-fund-based facilities could be adversely affected with a concurrent adverse effect on our business, financial condition and results of operations. For further details, please refer chapter titled “Financial Indebtedness” beginning on page 131 of this Draft Prospectus.

24. *Our lenders have imposed certain restrictive conditions on us under our financing arrangements. Under our financing arrangements, we are required to obtain the prior, written lender consent for, among other matters, changes in our capital structure, formulate a scheme of amalgamation or reconstruction and entering into any other borrowing arrangement. Further, we are required to maintain certain financial ratios.*

There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain the consents necessary to take the actions we believe are necessary to operate and grow our business. Our level of existing debt and any new debt that we incur in the future has important consequences. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that is not waived by our lenders or is not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans. For further information, see the chapter titled “Financial Indebtedness” on page 131 of the Draft Prospectus.

Though these covenants are restrictive to some extent for us, however it ensures financial discipline, which would help us in the long run to improve our financial performance.

25. *Our loan agreements with various lenders have several restrictive covenants and certain unconditional rights in favour of the lenders, which could influence our ability to expand, in turn affecting our business and results of operations.*

We have entered into agreements for short term and long term borrowings with certain lenders. As on June 30, 2021 an aggregate of Rs. 926.80 lakhs was outstanding towards loans availed from banks and financial institutions. The credit facilities availed by our Company are secured by way of mortgage of fixed assets, hypothecation of assets, and personal guarantees given by our Promoters and members of Promoter Group. In case we are not able to pay our dues in time, the same may amount to a default under the loan documentation and all the penal and

termination provisions therein would get triggered and the loans granted to the Company may be recalled with penal interest. This could severely affect our operations and financial condition. In addition to the above, our loan documentation includes certain conditions and covenants that require us to obtain consents from the aforesaid banks prior to carrying out certain activities like entering into any amalgamation, demerger, merger and corporate reconstruction, changing our management and operating structure, making any fresh borrowings or creating fresh charges on assets, etc. Any failure to comply with any condition or covenant under our financing agreements that is not waived by the lending banks or is not otherwise cured by us, may lead to a termination of our credit facilities, acceleration of all amounts due under the said credit facility, which may adversely affect our ability to conduct our business and operations or implement our business plans. Further, the said credit facilities can be renewed/enhanced/cancelled/suspended/reduced and the terms and conditions of the same can be altered by the lending banks, at their discretion. In the event, the lending banks refuse to renew / enhance the credit facilities and/or cancels / suspends / reduces the said credit facilities and/or alters the terms and conditions to the derogation of our Company, our existing operations as well as our future business prospects and financial condition may be severely affected. As on the date of the Draft Prospectus, we have not received NOC for the Issue from our lenders.

26. *Unsecured loans taken by our Company can be recalled by the lenders at any time.*

As on June 30, 2021 our Company has unsecured loans amounting to Rs. 1,093.08 lakhs from directors and banks that are repayable on demand to the relevant lender. These loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. In such cases, our Company may be required to repay the entirety of the unsecured loans together with accrued interest. Our Company may not be able to generate sufficient funds at short notice to be able to repay such loans and may resort to refinancing such loans at a higher rate of interest and on terms not favourable to it. Failure to repay unsecured loans in a timely manner may have a material adverse effect on our business, cash flows and financial condition. For further details of unsecured loans of our Company, please refer the chapter titled “Financial Statements as Restated” beginning on page 118 of this Draft Prospectus.

27. *We have taken guarantees from Promoters in relation to debt facilities provided to us.*

We have taken guarantees from Promoters in relation to our secured debt facilities availed from our Bankers. In an event any of these persons withdraw or terminate its/their guarantees, the lender for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition. For more information, please see the chapter titled “Financial Indebtedness” beginning on page 131 of this Draft Prospectus.

28. *Our Company had negative cash flows in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.*

We have experienced negative cash flows in the past which have been set out below:

Particulars	June 30, 2021	March 31, 2021
Net cash generated from/ (used in) operating activities	145.19	(393.26)
Net cash generated from/ (used in) investing activities	(139.13)	(1,613.69)
Net cash generated from/ (used in) financing activities	(12.36)	2,017.80

Cash flows of a company is a key indicator to show the extent of cash generated from the operations of a company to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations. For further details, see section titled “Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 118 and 122, respectively of this Draft Prospectus.

29. *Our success depends largely upon the services of our Directors, Promoters and other Key Managerial Personnel and our ability to attract and retain them. Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.*

Our success is substantially dependent on the expertise and services of our Directors, Promoters and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

30. Our Promoters, Directors and KMP has interests in our Company other than the reimbursement of expenses and normal remuneration or benefits. Any such interests may result in a conflict of interest, which may have an adverse effect on our business.

Our Promoters, directors, and KMP may be deemed to be interested in our Company, in addition to regular remuneration or benefits and reimbursements of expenses, to the extent of Equity Shares held by them, their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company, and to the extent of sitting fee payable to them for attending each of our Board and Committee meetings. For further details, please see the chapters titled “Our Management” and “Our Promoters and Promoter Group” beginning on pages 102 and 113, respectively of this Draft Prospectus.

31. There have been instances of non-compliance of the Companies Act, 2013 and non-filing / delays / incorrect filings in the past with certain Regulatory Authorities. If the Regulatory Authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.

There have been instances of non-compliance of the Companies Act, 2013 and non-filing / delays / incorrect filings in the past with certain Regulatory Authorities. We have failed to File form MGt-14 in respect of special resolution passed u/s. 62(3) of the Act, in the meeting of shareholders held on May 28, 2020. Our Company has filed an application for condonation of delay and extension of time vide application dtd. 23.12.2021 for filing the said form MGT-14 so that the Form MGT-14 can be filed with late fee. We may be subjected to penalty in this respect and be required to file the form with a late fee.

Except as mentioned in this Draft Prospectus, till date, there has been no penalty levied on the company for such delays / defaults. However, it cannot be assured that even in future no such penalty will be levied. Therefore, if the Regulatory Authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.

32. We require certain approvals or licenses in the ordinary course of business and the failure to renew, obtain or retain them in a timely manner, or at all, may adversely affect our operations.

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. Further due to change in constitution from Private Limited to Limited Company, the registration on the name of the erstwhile Private Limited Company will be transferred or updated on altered name of our Company. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or seek fresh approvals, from time to time, as and when required in the ordinary course of our business. An inability to obtain or maintain approvals or licenses required for our operations may adversely affect our operations. Also we have applied for following licenses which are pending for respective authorities: -

S.No.	Particulars	Authority	Date of Application
1.	Application for Notice of occupation and for grant of license / renewal of license of a factory	Department of Labour, Government of Maharashtra	26.10.2021

Further we regularly employ labour on contract basis from time to time as per the requirements on daily wage basis and are yet to obtain registration under Contract Labour (Regulation and Abolition) Act, 1970. For Further details, please see the chapter entitled “Government and other Approvals” on page 136 of this Draft Prospectus.

33. We have not yet applied for the registration of our logo. If we fail to obtain trademark registration our brand building efforts may be hampered which might lead to adverse effect on our business.

Our Company has purchased several trademarks as  ,  under class 16 & 20 of the Trademarks Act, vide business purchase agreement dated. 20.03.2020. However the trademarks have expired on 11.08.2018 and are due for renewal failing which they shall be marked as abandoned. we have not made any application for the renewal of the registration of the trademark with the respective authorities. If we are unable to get the same registered with the trademark authorities then, Our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks in future could have a material adverse effect on our business and goodwill, which in turn could adversely affect our results of operations.

For further details, please refer to chapter titled “Government and Other Approvals” on page 136 of this Draft Prospectus.

34. Our Company requires significant amounts of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.

Our business is working capital intensive. Summary of our working capital position as per our Restated Financial Information is given below: -

Particulars	June30, 2021	March 31, 2021
A: Current Assets		
Trade Receivables	312.28	499.45
Inventories	237.59	226.49

Trade Payables	121.24	193.57
Other Current Liabilities	56.50	32.74
Short Term Provisions	6.37	24.47
C: Working Capital (A-B)	442.77	521.51

We intend to continue growing by expanding our business operations. This may result in increase in the quantum of our current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled “Objects of the Issue” beginning on page 62 of this Draft Prospectus.

35. We operate in a competitive environment and face fair competition in our business from organized and unorganized players, which may adversely affect our business operations and financial condition.

The industry in which the Company operates is fairly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins, lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. The domestic segment which we cater to is fragmented and fairly competitive. We compete primarily on the basis of quality of our services, customer satisfaction and marketing. Thus, some of our competitors may have certain other advantages over us, including established track record, superior service offerings, larger portfolio of services, technology and greater market penetration, which may allow our competitors to better respond to market trends. They may also have the ability to spend more aggressively on marketing initiatives and may have more flexibility to respond to changing business and economic conditions than we do. We believe that in order to compete effectively, we must continue to maintain our reputation, be flexible and prompt in responding to rapidly changing market demands and customer preferences, and offer customer quality services at competitive prices. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

36. We generally do business with our customers on purchase order basis and do not enter into long term contracts with most of them.

Our business is dependent on our continuing relationships with our customers. Our Company has not entered into any long-term contract with any of customers. Any change in the consumption pattern of our end users or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

37. Changes in latest technology or requirement of machinery based on business opportunity may adversely affect Our Company’s results of operations and its financial condition.

Modernization and technology upgradation is essential to reduce costs and increase the output. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. Further, the costs in upgrading our technology and modernizing the software may be significant which could substantially affect our finances and operations. Also, the cost of implementing new process as well as R & D would require substantial new capital expenditures and could adversely affect our business, prospects, results of operations and financial condition.

38. We have in the past entered into related party transactions and may continue to do so in the future.

We have entered into various transactions with our Promoters, Directors and their relatives. While we believe that all such transactions are conducted on arm’s length basis, there can be no assurance that we could not have achieved more favourable terms had such transactions were not entered into with related parties. Furthermore, it

is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to chapter “Financial Statements as Restated ” beginning on page 118 of the Draft Prospectus.

39. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It also is possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

40. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

41. *Failure or disruption of our IT and/or business resource planning systems may adversely affect our business, financial condition, results of operations, cash flows and prospects.*

We have implemented various information technology (“IT”) and/or business resource planning systems to cover key areas of our operations. We are dependent on technology in relation to customer order management and dispatches, financial accounting and scheduling raw material purchase and shipments. We rely on our IT infrastructure to provide us with connectivity and data backup across our locations and functions. While the business resource planning systems that we have implemented have enabled us to improve our working capital cycles, despite an increase in our sales over the period, we can provide no assurance that we will be able to do so in the future.

We believe that we have deployed adequate IT disaster management systems including data backup and retrieval mechanisms, at our manufacturing facilities and registered office. However, any failure or disruption in the operation of these systems or the loss of data due to such failure or disruption (including due to human error or sabotage) may affect our ability to plan, track, record and analyse work in progress and sales, process financial information, manage our creditors, debtors and hedging positions, or otherwise conduct our normal business operations, which may increase our costs and otherwise adversely affect our business, financial condition, results of operations and cash flows.

42. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation and goodwill of our Company. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

43. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since, the Proceeds from Issue is less than Rs.10,000 lakh, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

44. *Within the parameters as mentioned in the chapter titled ‘Objects of this Issue’ beginning on page 62 of this Draft Prospectus, our Company’s management will have flexibility in applying the proceeds of the Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.*

We intend to use Net Proceeds towards meeting the funding the working capital requirements of the Company and General corporate purposes. We intend to deploy the Net Proceeds in financial year 2021-22 and financial year 2022-23 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Net Proceeds, please refer chapter titled “Objects of the Issue” beginning on page 62 of this Draft Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled ‘Objects of the Issue’ beginning on page 62 of this Draft Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the proceeds of this Issue.

However, Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. However, in accordance with Section 27 of the Companies Act, 2013, and relevant provisions of SEBI ICDR Regulations, 2018, a company shall not vary the objects of the Issue without our Company being authorised to do so by our shareholders by way of special resolution and other compliances in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

45. Any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders’ approval.

Our Company intends to use Net Proceeds raised pursuant to the Fresh Issue in the manner set out in the section titled “Objects of the Issue” on page 62. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations.

In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

46. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “Objects of the Issue” beginning on page 62 of this Draft Prospectus.

47. Our insurance coverage may not be adequate.

Our Company has obtained insurance coverage in respect of certain risks. We maintain insurance policies in respect of our business and operations covering building, plant and machinery, furniture and fixtures, fittings and other equipment and raw material, stock with an add cover for damage resulting from earthquake. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected. For further details, please refer chapter titled “Our Business” beginning on page 82 of this Draft Prospectus.

48. We have issued Equity Shares during the last 12 months at a price which may be below the Issue price.

We have issued certain Equity shares in the last twelve months at a price which may be lower than the Issue Price. Details of such issuances are given in the table below:

Date of Allotment	Number of Equity Shares	Face Value (Rs)	Issue Price (Rs)	Reasons for Allotment	Benefits Accrued to our Company
November 04, 2021	27,00,000	10.00	N. A	Bonus issue 60:1	Expansion of capital base of the Company

49. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

After completion of the Issue, our Promoters and Promoter Group will collectively own 50.41 % of the Equity Shares. As a result, our Promoter together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our AoA. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoter will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

50. *Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

51. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “Dividend Policy” on page 117 of this Draft Prospectus.

52. *Information relating to the installed manufacturing capacity of our manufacturing facilities included in this Draft Prospectus are based on various assumptions and estimates and future production and capacity may vary.*

Information relating to the installed manufacturing capacity of our facility included in this Draft Prospectus are based on various assumptions and estimates of our management that have been taken into account in the calculation of the installed manufacturing capacity of our manufacturing facility. These assumptions and estimates include the standard capacity calculation practice after examining the equipment installed at the facilities, the period during which the manufacturing facility operated in a year/ period, expected operations, availability of raw materials, expected utilization levels, downtime resulting from scheduled maintenance activities, unscheduled breakdowns, as well as expected operational efficiencies. For further information, see “Our Business - Capacity and Capacity Utilization” on page 82. Further, the installed capacity, capacity utilisation and other related information may not be computed on the basis of any standard methodology that is applicable across the industry and therefore may not be comparable to capacity information that may be computed and presented by other peer companies. Undue reliance should therefore not be placed on our historical installed capacity information for our existing facilities included in this Draft Prospectus.

53. *Industry information included in this Draft Prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Prospectus. These reports are subject to various limitations and based upon certain assumptions that are

subjective in nature. We have not independently verified data from such industry reports and other sources. Although, we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us, or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft Prospectus.

We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

55. Our Equity Shares have never been publicly traded, and may experience price and volume fluctuations following the completion of the Issue. Further, our Equity Shares may not result in an active or liquid market and the price of our Equity Shares may be volatile and you may be unable to resell your Equity Shares at or above the Issue Price or at all.

Prior to the Issue, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for our Equity Shares will develop or, if developed, does not guarantee the liquidity of such market for the Equity Shares. Investors might not be able to rapidly sell the Equity Shares at the quoted price if there is no active trading in the Equity Shares. The Issue Price of the Equity Shares will be determined by our Company in consultation with the LM through the Fixed Price Process. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

56. Fluctuations in the exchange rate of the Rupee and other currencies could have a material adverse effect on the value of the Equity Shares, independent of our operating results.

The Equity Shares would be quoted in Rupees on the stock exchange. Any dividends in respect of the Equity Shares will be paid in Rupees and subsequently converted into appropriate foreign currency for repatriation. Any adverse movement in exchange rates during the time it takes to undertake such conversion may reduce the net dividend to investors. In addition, any adverse movement in exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the net proceeds received by shareholders.

The exchange rate of the Rupee has changed substantially in the last two decades and could fluctuate substantially in the future, which may have a material adverse effect on the value of the Equity Shares and returns from the Equity Shares, independent of our operating results.

57. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized in excess of Rs. 1,00,000/- on the sale of listed equity shares on a stock exchange held for more than 12 months will be subject to long term capital gains tax in India at the specified rates in case STT was paid on the sale transaction. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of Securities Transaction Tax ("STT"), on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

58. *Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.*

Indian legal principles relating to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholders of our Company than as shareholders of a corporation in another jurisdiction.

59. *The requirements of being a listed company may strain our resources.*

We are not a listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

EXTERNAL RISK FACTORS

60. *The outbreak of COVID-19, or outbreak of any other similar severe communicable disease could have a potential impact on our business, financial condition and results of operations.*

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could adversely affect the overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines and lockdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our respective vendors and suppliers. There is currently substantial medical uncertainty regarding COVID-19 and no government-certified treatment or freely accessible vaccine for larger section of the population is available yet. In case there is a rapid increase in severe cases of infections leading to deaths, where the measures taken by governments are not successful or are any bans imposed by the government in this regard are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts.

If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general. The outbreak has significantly increased economic uncertainty.

It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession. The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. We are still assessing our business operations and system supports and the impact COVID-19 may have on our results and financial condition, but we cannot assure that this analysis will enable us to avoid part or all of any impact from the spread of COVID-19 or its consequences. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people. Further if the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company.

61. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located elsewhere, including India. Adverse economic developments, such as rising fiscal or trade deficit, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the countries in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

62. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

63. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Our borrowing costs and our access to the debt capital markets depend significantly on the credit ratings of India. India's sovereign ratings have recently been downgraded. Any further adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing. A downgrading of India's credit ratings may occur, for example, upon a change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favourable terms and consequently adversely affect our business and financial performance and the price of the Equity Shares.

64. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Prospectus.

As stated in the reports of the Auditor included in this Draft Prospectus under chapter “Financial Statements as restated” beginning on page 118, the financial statements included in this Draft Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Prospectus. Accordingly, the degree to which the financial information included in this Draft Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

65. The occurrence of natural or man-made disasters could adversely affect our results of operations and financial condition. Hostilities, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural or man-made disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India or countries to who we export our products could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

66. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, financial condition and results of operations.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For instance, The Finance Act, 2020 (“Finance Act”), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax (“DDT”), will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident and likely be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Further, the Finance Act, 2019 stipulates any sale, transfer and issue of securities through exchanges, depositories or otherwise to be charged with stamp duty. The Finance Act, 2019 has also clarified that the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures, on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. As such, there is no certainty on the impact that the Finance Act, 2019 may have on our Company’s business and operations.

Further, the Government of India has announced the union budget for Fiscal 2021, pursuant to which the Finance Act, effective from July 1, 2020, has introduced various amendments. As such, there is no certainty on the impact that the Finance Act, 2020 may have on our business and operations or on the industry in which we operate.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs relating to compliance with such new requirements, which may also require management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to,

or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

67. *If inflation were to rise in India, we might not be able to increase the prices of our products at a proportional rate in order to pass costs on to our customers and our profits might decline.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

68. *Investors may not be able to enforce a judgment of a foreign court against us.*

Our Company is a company incorporated under the laws of India. All our Company's Directors and officers are residents of India and all of our assets are located in India. As a result, it may not be possible for investors to effect service of process upon our Company or such persons in jurisdictions outside India, or to enforce judgments obtained against such parties outside India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if that court was of the view that the amount of damages awarded was excessive or inconsistent with public policy, or if judgments are in breach or contrary to Indian law. In addition, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI to execute such a judgment or to repatriate outside India any amounts recovered.

69. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could impact our business, our future financial performance and the prices of the Equity Shares.

In the event of the estimated utilisation of the Net Proceeds in a scheduled financial year being not undertaken in its entirety, the remaining Net Proceeds shall be utilised in subsequent financial years, as may be decided by our

Company, in accordance with applicable laws. Further, if the Net Proceeds are not completely utilised for the Objects during the respective periods stated above due to factors such as (i) economic and business conditions; (ii) increased competition; (iii) timely completion of the Issue; (iv) market conditions outside the control of our Company; and (v) any other commercial considerations, the remaining Net Proceeds shall be utilised (in part or full) in subsequent periods as may be determined by our Company, in accordance with applicable laws.

The fund requirements mentioned above are based on the internal management estimates of our Company and have not been verified by the Lead Manager or appraised by any bank, financial institution or any other external agency. The fund requirements are based on current circumstances of our business and our Company may have to revise its estimates from time to time on account of various factors beyond its control, such as market conditions, competitive environment, costs of commodities and interest or exchange rate fluctuations. Consequently, the fund requirements of our Company are subject to revisions in the future at the discretion of the management. In the event of any shortfall of funds for the activities proposed to be financed out of the Net Proceeds as stated above, our Company may re-allocate the Net Proceeds to the activities where such shortfall has arisen, subject to compliance with applicable laws. Further, in case of a shortfall in the Net Proceeds or cost overruns, our management may explore a range of options including utilising our internal accruals or seeking debt financing.

Means of Finance

The fund requirements set out for the aforesaid Objects are proposed to be met entirely from the Net Proceeds, internal accruals, networth and existing debt financing. Accordingly, we confirm that there is no requirement for us to make firm arrangements of finance through verifiable means towards at least 75% of the stated means of finance, excluding the amount to be raised through the Net Proceeds and existing identifiable internal accruals.

Details of the Objects of the Issue

The details in relation to Objects of the Issue are set forth herein below.

1. Repayment/Prepayment of certain secured borrowings availed by our Company

Our Company has entered into various borrowing arrangements with banks and financial institutions including borrowings in the form of terms loans, and fund based and non-fund based working capital facilities. For details of these financing arrangements including indicative terms and conditions, see “*Financial Indebtedness*” on page 131 of Draft Prospectus.

Our Company intends to utilize Rs [●] lakhs of the Net Proceeds towards repayment or prepayment of all or a portion of the principal amount and the accrued interest thereon in case of certain loans availed by our Company. Pursuant to the terms of the borrowing arrangements, prepayment of certain indebtedness may attract prepayment charges as prescribed by the respective lender. Such prepayment charges, as applicable, will also be funded out of the Net Proceeds. Given the nature of the borrowings and the terms of repayment or prepayment, the aggregate outstanding amounts under the borrowings may vary from time to time and our Company may, in accordance with the relevant repayment schedule, repay or refinance some of their existing borrowings prior to Allotment. Also, our Company may avail additional loan facilities or draw down on in its working capital facilities from time to time to meet its business requirements. Accordingly, our Company may utilise the Net Proceeds for repayment/prepayment of any such refinanced facilities (including any prepayment fees or penalties thereon) or any additional facilities obtained by our Company. However, the aggregate amount to be utilised from the Net Proceeds towards prepayment or repayment of borrowings (including refinanced or additional facilities availed, if any), in part or full, will not exceed Rs [●] lakhs. We believe that such repayment or prepayment will help reduce our outstanding indebtedness and debt servicing costs and enable utilization of the internal accruals for further investment towards business growth and expansion. In addition, we believe that this would improve our ability to raise further resources in the future to fund potential business development opportunities.

The details of the outstanding loans proposed for repayment or prepayment, in full or in part from the Net Proceeds are set forth below.

GLOBAL ECONOMIC OVERVIEW

Global economic activity is accelerating as the world emerges from the deepest global recession since World War II (World Bank 2020). Barring a protracted global resurgence of COVID-19, the baseline outlook described in the main text envisages the strongest global recovery from any of the five global recession in the past 80 years. However, the recovery is remarkably uneven across countries, as it largely reflects sharp rebounds in some major economies, with poorer countries lagging behind. In addition, there is substantial uncertainty around the baseline growth trajectory, especially beyond 2021. The recovery in global activity may not last, as explored in a “Faltering Recovery” scenario. In this case, growth would slow starting in 2022 as recurring COVID-19 flare-ups would weigh on risk sentiment, while mounting inflation pressures amid elevated macroeconomic vulnerabilities would trigger a sharp tightening of global financial conditions (Reinhart and Reinhart 2020). Alternatively, in a “Sustained Expansion” scenario, the rebound could broaden and become self-sustaining, anchored by improved confidence, an accelerated pace of technological change, and a renewed push for reforms that boost longer term productivity in EMDEs (World Bank 2021a; Kose and Ohnsorge 2021). The global implications of these scenarios are assessed using a large-scale global semi structural projection model.

(Source: <https://openknowledge.worldbank.org/bitstream/handle/10986/35647/9781464816659.pdf>)

The global economy is projected to grow 5.9 percent in 2021 and 4.9 percent in 2022. The downward revision for 2021 reflects a downgrade for advanced economies—in part due to supply disruptions—and for low-income developing countries, largely due to worsening pandemic dynamics. This is partially offset by stronger near term prospects among some commodity-exporting emerging market and developing economies. Employment is generally expected to continue lagging the recovery in output. Beyond 2022 global growth is projected to moderate to about 3.3 percent over the medium term. Advanced economy output is forecast to exceed pre-pandemic medium-term projections—largely reflecting sizable anticipated further policy support in the United States that includes measures to increase potential. By contrast, persistent output losses are anticipated for the emerging market and developing economy group due to slower vaccine rollouts and generally less policy support compared to advanced economies.

(Source: <https://www.imf.org/en/Publications/WEO/Issues/2021/10/12/world-economic-outlook-october-2021>)

Recent price pressures for the most part reflect unusual pandemic-related developments and transitory supply-demand mismatches. Inflation is expected to return to its pre-pandemic ranges in most countries in 2022 once these disturbances work their way through prices, though uncertainty remains high. Elevated inflation is also

expected in some emerging market and developing economies, related in part to high food prices. Central banks should generally look through transitory inflation pressures and avoid tightening until there is more clarity on underlying price dynamics. Clear communication from central banks on the outlook for monetary policy will be key to shaping inflation expectations and safeguarding against premature tightening of financial conditions. There is, however, a risk that transitory pressures could become more persistent and central banks may need to take preemptive action.

Risks around the global baseline are to the downside. Slower-than-anticipated vaccine rollout would allow the virus to mutate further. Financial conditions could tighten rapidly, for instance from a reassessment of the monetary policy outlook in advanced economies if inflation expectations increase more rapidly than anticipated. A double hit to emerging market and developing economies from worsening pandemic dynamics and tighter external financial conditions would severely set back their recovery and drag global growth below this outlook's baseline.

Multilateral action has a vital role to play in diminishing divergences and strengthening global prospects. The immediate priority is to deploy vaccines equitably worldwide. A \$50 billion IMF staff proposal, jointly endorsed by the World Health Organization, World Trade Organization, and World Bank, provides clear targets and pragmatic actions at a feasible cost to end the pandemic. Financially constrained economies also need unimpeded access to international liquidity. The proposed \$650 billion General Allocation of Special Drawing Rights at the IMF is set to boost reserve assets of all economies and help ease liquidity constraints. Countries also need to redouble collective efforts to reduce greenhouse gas emissions. These multilateral actions can be reinforced by national-level policies tailored to the stage of the crisis that help catalyze a sustainable, inclusive recovery. Concerted, well-directed policies can make the difference between a future of durable recoveries for all economies or one with widening fault lines—as many struggle with the health crisis while a handful see conditions normalize, albeit with the constant threat of renewed flare-ups.

In the Union Budget 2021-22, capital expenditure for FY22 is likely to increase by 34.5% at Rs. 5.5 lakh crore (US\$ 75.81 billion) over FY21 (BE) to boost the economy.

MANUFACTURING PROCESS

PROCESS FLOW CHART OF PRODUCTION DEPARTMENT

Our manufacturing process begins with procurement of raw materials such as Particle Board, Aluminium Frames,

Ceramic Coil, Gi Sheet, Pre-Painted Resin Coated Steel, Adhesive, Cartons and ABS Corners. Procurement of these raw materials is done from both domestic and international markets. The material is on the basis of the rates offered by supplier. We procure the material from various approved vendors and maintain the stock of raw material. We also timely import the Ceramic Sheet Coils from the international market and keep a Container stock at our factory.

For manufacturing of a board firstly we have to cut the particle boards as per the size required, along with that we also cut GI Sheet as well as Ceramic Sheet. This process is completed in Shearing machine. After cutting all the material we spread adhesive on all the surface and stick them in a sandwich pattern keeping particle board as a core material after which we place the board in Hot Press Machine where all the air, if any between particle board and Ceramic as well as GI Sheet gets removed at a temperature of 36 Degree Celsius and bonding between two layers become very rigid to come out.

After the above process, the boards are then transferred to assembly section where Aluminium frames are cut as per the required sizes and with the combination of Plastic corners and frame the board is assembled. Finally, MS brackets are added on corners for hanging the boards to wall.

After the assembly of board, they are transferred to packing department where our quality team checks the board with respect to size or any other manufacturing defect if any. After the final approval from quality team, the boards are then cleaned for any and packing cleaning of board for any extra adhesive or dust particles and after that the board is packed in corrugated boxes.

After packing is completed, the board is transferred to stores where the inward of finish good is done and then the store department transfers the board for further to dispatch.

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the “UPI Circulars”) in relation to streamlining the process of public issues of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Investor had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and the continuation of this phase has been extended until March 31, 2020. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. Further, pursuant to SEBI circular dated March 30, 2020, this phase has been extended till further notice.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and

without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("FDI") through press notes and press releases. The DIPP, has issued consolidated FDI Policy Circular of 2020 ("FDI Policy 2020"), effective from October 15, 2020, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2020 will be valid until the DIPP issues an updated circular.

The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI and Master Direction –Foreign Investment in India (updated upto March 08, 2019). In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular and Master Direction. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

In case of investment in sectors through Government Route, approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2020 has to be obtained.

The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP / RBI, from time to time. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country ("Restricted Investors"), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company. Investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.
