2. We are exposed to foreign currency exchange rate fluctuations, which may harm our results of operations, impact our cash flows and cause our financial results to fluctuate.

We are exposed to foreign currency exchange fluctuations as our Company is engaged in manufacturing of propeller shafts and its components which are mainly exported to the United States of America United Kingdom, Germany, Singapore, Slovenija, Austria, and Brazil. The exchange rate between the Indian Rupee and these currencies, primarily the USD, has fluctuated in the past and our results of operations and cash flows have been impacted by such fluctuations in the past and may be impacted by such fluctuations in the future. For example, during times of strengthening of the Indian Rupee, we expect that our overseas sales and revenues will generally be negatively impacted as foreign currency received will be translated into fewer Indian Rupees. However, the converse positive effect of depreciation in the Indian Rupee may not be sustained or may not show an appreciable impact in our results of operations in any given financial period, due to other variables impacting our business and results of operations during the same period.

We may, therefore, suffer losses on account of foreign currency fluctuations for sale of our products to our international customers, since we may be able to revise the prices, for foreign currency fluctuations, only on a periodic basis and may not be able to pass on all losses on account of foreign currency fluctuations to our customers.

3. A significant portion of our revenues are dependent on our exports to our international customers. Any failure to fulfil the requirements of our international customers may adversely affect our revenues, result of operations and cash flows.

For the Financial year ended March 31, 2022, 2021 and 2020 export to our overseas customers accounted for 94.07%, 96.22%, and 95.72%, respectively of our Revenue from operations.

As a result, our operations are impacted by various risks inherent in international sales and operations, including:

- currency exchange rate fluctuations;
- regional economic or political uncertainty;
- currency exchange controls;
- differing accounting standards and interpretations;
- differing labour regulations;
- differing domestic and foreign customs, tariffs and taxes;
- current and changing regulatory environments;
- difficulty in staffing and managing widespread operations;
- coordinating and interacting with local representatives and counterparties to fully understand
- local business and regulatory requirements; and
- availability and terms of financing

To the extent that we are unable to effectively manage our global operations and risks such as the above (in particular, as we implement our strategy to enter into new markets where we do not have local knowledge

and resources), we may be unable to grow or maintain our sales and profitability, or we may be subject to additional unanticipated costs or legal or regulatory action. As a consequence, our business, financial condition, results of operations and cash flows may be adversely affected.

4. *The outbreak of COVID-19, or outbreak of any other similar severe communicable disease could have a potential impact on our business, financial condition and results of operations.*

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could adversely affect the overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines and lockdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our respective vendors and suppliers. There is currently substantial medical uncertainty regarding COVID-19 and no government-certified treatment or freely accessible vaccine for larger section of the population is available yet. In case there is a rapid increase in severe cases of infections leading to deaths, where the measures taken by governments are not successful or are any bans imposed by the government in this regard are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts.

If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general. The outbreak has significantly increased economic uncertainty.

It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession. The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. We are still assessing our business operations and system supports and the impact COVID-19 may have on our results and financial condition, but we cannot assure that this analysis will enable us to avoid part or all of any impact from the spread of COVID-19 or its consequences. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people. Further if the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company.

5. *We may not be able to accurately manage our inventory, this may adversely affect our goodwill and business, financial condition and results of operations.*

We maintain physical inventory for substantially all of our products. Changes in consumer requirements and demands for these products expose us to significant inventory risks. The demand for specific products can change between the time of manufacturing a product and the time of shipment of these products from our facilities. Further, accurate assessment of market demand requires significant investment in the creation of a sales and marketing network and training of marketing personnel. There is no guarantee that our estimate of market demand in India or in foreign countries will be accurate. In the event that we overestimate the demand for our products, we will have expended resources in manufacturing excess products, export costs, insurance costs, distribution expenses and storage and other allied expenditures and if we under-stock one or more of our products, we may not be able to obtain additional units in a timely manner and will lose out on sales opportunities that our competitors will capitalize on and thereby increase their respective market shares. In addition, if our products do not achieve widespread consumer acceptance, we may be required to take significant inventory markdowns, or may not be able to sell the products at all. Any incorrect assessment of the demand for our products may adversely affect our business, financial condition and results of operations.

6. *Increases in the prices of raw materials, their availability, quality and cost overruns could have adverse effect on us.*

The key raw material required in manufacturing of our products are Stainless Steel, EN series copper alloys, nickel alloys, Aluminium, Nitronic series, etc. The cost of raw materials constitutes as significant part of our operating expenses. Our Company meets the requirement of raw materials by purchasing the same from local vendors or by importing the same. Our Company also procures raw material from our Group Company, Ameya Europe Limited. We are vulnerable to the risks of rising/fluctuating prices of raw materials, which are determined by demand and supply conditions in Indian Market as well as foreign markets. Any unexpected

price fluctuations after placement orders, shortage, delay in delivery, quality defects or any factors beyond our control may result in interruption in the supply of raw materials.

- 7. *We are dependent upon few suppliers for our raw material for our current manufacturing facilities. In an eventuality where our suppliers are unable to deliver us the required materials in a time-bound manner it may have a material adverse effect on our business operations and profitability.***

For the year ended March 31, 2022, 2021 and 2020, our top 10 suppliers contributed around 91.96%, 87.80% and 93.22%, respectively and top 5 suppliers contributed around 72.49%, 71.14% and 71.68%, respectively of our purchases. In the event of a delay, inadequacy or default in deliveries by any of our vendors, we may not be able to source our raw material on an adequate and timely basis or on commercially acceptable terms. A major disruption to the timely and adequate supplies of our raw materials could adversely affect our business, results of operations and financial condition. Any problems faced by our suppliers in their manufacturing facilities resulting in delays or non-adherence to quality requirements could adversely impact our ability to meet our customers' requirements in time and our operations would be affected to the extent we are unable to line up supplies from alternate suppliers.

- 8. *Our top 10 customers contribute majority of our revenues from operations for the year ended March 31, 2022, 2021 and 2020. Any loss of business from one or more of them may adversely affect our revenues and profitability.***

Our top 10 and top 5 customers contributed 84.74%, 91.39% and 88.65%, respectively and 69.22%, 72.19% and 65.05%, respectively of our revenues from operations for the year ended March 31, 2022, 2021 and 2020. Larger contracts from few customers may represent a larger part of our portfolio, increasing the potential volatility of our results and exposure to individual contract risks. Such concentration of our business on a few projects or clients may have an adverse effect on our results of operations and result in a significant reduction in the award of contracts which could also adversely affect our business if we do not achieve our expected margins or suffer losses on one or more of these large contracts, from such clients. We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations. However, the composition and revenue generated from these customers might change as we continue to add new customers in the normal course of business. While we believe that we shall not face challenges in finding new customers in the ordinary course of business, our results of operations and financial condition may be adversely affected if we remain dependent on few customers.

- 9. *Our Company has manufacturing facility located at Pune, Maharashtra. Any delay in production at, or shutdown of, or any interruption for a significant period of time, in this facility may in turn adversely affect our business, financial condition and results of operations.***

Our Company has manufacturing facility located at Pune, Maharashtra. Our success depends on our ability to successfully manufacture and deliver our products to meet our customer demand. Our manufacturing facility is susceptible to damage or interruption or operating risks, such as human error, power loss, breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, loss of services of our external contractors, terrorist attacks, acts of war, break-ins, earthquakes, other natural disasters and industrial accidents and similar events. Further, our manufacturing facility is also subject to operating risk arising from compliance with the directives of relevant government authorities. Operating risks may result in personal injury and property damage and in the imposition of civil and criminal penalties. If our Company experiences delays in production or shutdowns at any or all of these facilities due to any reason, including disruptions caused by disputes with its workforce or any external factors, our Company's operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations.

- 10. *The shortage or non-availability of power facilities may adversely affect our manufacturing processes and have an adverse impact on our results of operations and financial condition.***

Our manufacturing processes requires substantial amount of power facilities. The quantum and nature of power requirements of our industry and Company is such that it cannot be supplemented/ augmented by alternative/ independent sources of power supply since it involves significant capital expenditure and per unit cost of electricity produced is very high in view of increasing oil prices and other constraints. We are mainly dependent on State Government for meeting our electricity requirements. Any defaults or non-compliance of the conditions may render us liable for termination of the agreement or any future changes in the terms of the agreement may lead to increased costs, thereby affecting the profitability. Further, since we are majorly dependent on third party power supply; there may be factors beyond our control affecting the supply of power. However, we have installed DG sets at our manufacturing facility to meet any disruption or non-availability of power supply failures. Any disruption / non availability of power shall directly affect our production which in turn shall have an impact on profitability and turnover of our Company.

11. *We could become liable to customers, suffer adverse publicity and incur substantial costs as a result of defects in our products, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.*

Any failure or defect in our products could result in a claim against us for damages, regardless of our responsibility for such a failure or defect. We use a PMI machine (Positive Material Identification) at our manufacturing facility to verify chemical composition of our raw materials and finished goods. However, we outsource the mechanical testing of our raw material to third party NABL approved laboratory. Although we attempt to maintain quality standards, we cannot assure that all our products would be of uniform quality, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity. Also, our business is dependent on the trust our customers have in the quality of our products. Any negative publicity regarding our company, brand, or products, including those arising from a drop in quality of merchandise from our vendors, mishaps resulting from the use of our products, or any other unforeseen events could affect our reputation and our results from operations.

12. *We generally do business with our customers on purchase order basis and do not enter into long term contracts with most of them.*

Our business is dependent on our continuing relationships with our customers. Our Company has not entered into any long-term contract with any of customers. Any change in the consumption pattern of our end users or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

13. *Our Company is dependent on third party transportation providers for the delivery of our goods and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.*

Our Company uses third party transportation providers for delivery of our goods. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business. In addition, goods may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our raw materials may have an adverse effect on our business and results of operations. Further, disruptions of transportation services due to weather-related problems, strikes, lock-outs, inadequacies in the road infrastructure, or other events could impair ability to procure raw materials on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

14. *Our results of operations and cash flows could be adversely affected, if we are unable to collect our dues and receivables from, or invoice our unbilled services to, our clients.*

Our business depends on our ability to successfully obtain payment from our clients of the amounts they owe us for work performed. We evaluate the financial condition of our clients and usually bill and collect on relatively short cycles. There is no guarantee that we will accurately assess the creditworthiness of our clients. Such conditions could cause clients to delay payment, request modifications of their payment terms, or default on their payment obligations to us, all of which could increase our receivables. Timely collection of fees for client services also depends on our ability to complete our contractual commitments and subsequently bill for and collect our contractual service fees. If we are unable to meet our contractual obligations, we might experience delays in the collection of, or be unable to collect, our client balances, and if this occurs, our results of operations and cash flows could be adversely affected. Our results of operations and cash flows could be adversely affected, if we are unable to meet our contractual obligations, we might experience delays in the collection of, or be unable to collect, our client balances. In addition, if we experience delays in billing and collection for our services, our cash flows could be adversely affected.

15. *Compliance with, and changes in, safety, health and environmental laws and regulations may adversely affect our business, prospects, financial condition and results of operations.*

Due to the nature of our business, we expect to be or continue to be subject to extensive and increasingly stringent environmental, health and safety laws and regulations and various labour workplace and related laws and regulations. We are also subject to environmental laws and regulations, including but not limited to:

- Environment (Protection) Act, 1986
- Air (Prevention and Control of Pollution) Act, 1981
- Water (Prevention and Control of Pollution) Act, 1974

- Hazardous Waste Management & Handling Rules, 2008
- Other regulations promulgated by the Ministry of Environment and Forests and the Pollution Control Boards of the state of Maharashtra.

which govern the discharge, emission, storage, handling and disposal of a variety of substances that may be used in or result from the operations of our business.

The scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted and hence the costs and management time required to comply with these requirements could be significant. Amendments to such statutes may impose additional provisions to be followed by our Company and accordingly the Company needs to incur clean-up and remediation costs, as well as damages, payment of fines or other penalties, closure of production facilities for non-compliance, other liabilities and related litigation, could adversely affect our business, prospects, financial condition and results of operations.

16. *Continued operations of our manufacturing facility are critical to our business and any disruption in the operation of our facility may have a material adverse effect on our business, results of operations and financial condition.*

Our manufacturing facility is subject to operating risks, such as unavailability of machinery, break-down, obsolescence or failure of machinery, disruption in power supply or processes, performance below expected levels of efficiency, labour disputes, natural disasters, industrial accidents and statutory and regulatory restrictions. Our machines have limited lives and require periodic cleaning as well as annual over hauling maintenance. In the event of a breakdown or failure of such machinery, replacement parts may not be available and such machinery may have to be sent for repairs or servicing. We have not entered into any technical support service agreements for the maintenance and smooth functioning of our equipment and machineries. This may lead to delay and disruption in our production process that could have an adverse impact on our sales, results of operations, business growth and prospects.

17. *Our lenders have charge over our movable and immovable properties in respect of finance availed by us.*

We have secured our lenders by creating a charge over our movable and immovable properties in respect of loans / facilities availed by us from banks and financial institutions. The total amounts outstanding and payable by us as secured loans were Rs 265.24 Lakhs as on March 31, 2022. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be forfeited by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations. For further information on the “*Financial Indebtedness*” please refer to page 149 of this Prospectus.

18. *Any increase in interest rates would have an adverse effect on our results of operations and will expose our Company to interest rate risks.*

We are dependent upon the availability of equity, cash balances and debt financing to fund our operations and growth. Any fluctuations in interest rates may directly impact the interest costs of such loans and, in particular, any increase in interest rates could adversely affect our results of operations. Furthermore, our indebtedness means that a material portion of our expected cash flow may be required to be dedicated to the payment of interest on our indebtedness, thereby reducing the funds available to us for use in our general business operations. If interest rates increase, our interest payments will increase and our ability to obtain additional debt and non-fund-based facilities could be adversely affected with a concurrent adverse effect on our business, financial condition and results of operations. For further details, please refer chapter titled “*Financial Indebtedness*” beginning on page 149 of this Prospectus.

19. *Our loan agreements with various lenders have several restrictive covenants and certain unconditional rights in favour of the lenders, which could influence our ability to expand, in turn affecting our business and results of operations.*

We have entered into agreements for short term and long-term borrowings with certain lenders. As on March 31, 2022 an aggregate of Rs. 265.24 lakhs was outstanding towards loans availed from banks and financial institutions. The credit facilities availed by our Company are secured by way of mortgage of fixed assets, hypothecation of assets. In case we are not able to pay our dues in time, the same may amount to a default under the loan documentation and all the penal and termination provisions therein would get triggered and the loans granted to the Company may be recalled with penal interest. This could severely affect our operations and financial condition. In addition to the above, our loan documentation includes certain conditions and covenants that require us to obtain consents from the aforesaid banks prior to carrying out certain activities like entering into any amalgamation, demerger, merger and corporate reconstruction, changing our management and operating structure, making any fresh borrowings or creating fresh charges on assets, etc. Any failure to comply with any condition or covenant under our financing agreements that is not

waived by the lending banks or is not otherwise cured by us, may lead to a termination of our credit facilities, acceleration of all amounts due under the said credit facility, which may adversely affect our ability to conduct our business and operations or implement our business plans. Further, the said credit facilities can be renewed/enhanced/cancelled/suspended/reduced and the terms and conditions of the same can be altered by the lending banks, at their discretion. In the event, the lending banks refuse to renew / enhance the credit facilities and/or cancels / suspends / reduces the said credit facilities and/or alters the terms and conditions to the derogation of our Company, our existing operations as well as our future business prospects and financial condition may be severely affected.

20. Unsecured loans taken by our Company can be recalled by the lenders at any time.

As on March 31, 2022 our Company has unsecured loans amounting to Rs. 33.41 lakhs from directors that are repayable on demand to the relevant lender. These loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. In such cases, our Company may be required to repay the entirety of the unsecured loans together with accrued interest. Our Company may not be able to generate sufficient funds at short notice to be able to repay such loans and may resort to refinancing such loans at a higher rate of interest and on terms not favourable to it. Failure to repay unsecured loans in a timely manner may have a material adverse effect on our business, cash flows and financial condition. For further details of unsecured loans of our Company, please refer the chapter titled “Financial Statements as Restated” beginning on page 133 of this Prospectus.

21. Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of our Company.

Our Company may have not complied with certain accounting standards and has not taken Actuarial Valuation Report as required as per AS-15 Employee Benefits. Although, no show cause notice in respect of the same has been received by the Company till date. Any penalty imposed for such non-compliance could affect our financial conditions to that extent. In relation to gratuity, we have not received any notice/communication from the relevant authority, for the previous defaults till date. However, our Company has obtained any insurance for its liability towards the payment of gratuity from Life Insurance Corporation of India.

22. We have taken guarantees from Promoters in relation to debt facilities provided to us.

We have taken guarantees from Promoters in relation to our secured debt facilities availed from our Bankers. In an event any of these persons withdraw or terminate its/their guarantees, the lender for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition. For more information, please see the chapter titled “Financial Indebtedness” beginning on page 149 of this Prospectus.

23. Our Company had negative cash flows in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.

We have experienced negative cash flows in the past which have been set out below:

Cash flows of a company is a key indicator to show the extent of cash generated from the operations of a company to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations. For further details, see section titled “Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 133 and 136, respectively of this Prospectus.

24. Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our promoters remain associated with us.

Our Promoters have been actively involved in the day-to-day operations and management. Accordingly, our performance is heavily dependent upon the services

of our Promoters. If our Promoter is unable or unwilling to continue in his present position, we may not be able to replace them easily or at all. Our Promoters, have over the years-built relations with various customers and other persons who are form part of our stakeholders and are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

25. *Our success depends on our ability to attract and retain key employees, and our failure to do so could harm our ability to grow our business and execute our business strategies.*

We rely on the skills, expertise and experience of our employees to provide quality services to our customers. Our performance and success substantially depend on the ability to attract and retain our key employees, including our management team and experienced engineers. Although some of the members of our senior management have been with us for a long period of time, there can be no assurance that any member of our senior management or other key employees will not leave us in the future. Our success is also highly dependent on our continuous ability to identify, hire, train, retain and motivate highly qualified management, technical, sales and marketing personnel. In particular, the recruitment of skilled engineers and experienced sales personnel remains critical to our success. Further, if we fail to identify suitable replacements of our departed staff, our business and operation could be adversely affected and our future growth and expansions may be inhibited.

26. *We depend on skilled personnel and if we are unable to recruit and retain skilled personnel, our ability to operate or grow our business could be affected.*

Our services are skilled and creative manpower intensive and we engage a considerable number of skilled personnel every year to sustain our growth. Further, we spend significant time and resources in training the manpower we hire. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower. High attrition and competition for manpower may limit our ability to attract and retain the skilled manpower necessary for our future growth requirements. We cannot assure you that skilled manpower will continue to be available in sufficient numbers suitable to our requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may affect our business, financial condition, results of operations and prospects.

27. *We require a number of approvals, NOCs, licenses, registrations and permits in the ordinary course of our business. Some of the approvals are required to be transferred in the name of Ameya Precision Engineers Limited from Ameya Precision Engineers Private Limited pursuant to name change of our Company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations.*

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Inability to obtain or non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. Further, we are required to keep already obtained valid key approvals such as Tax Registrations, IEC Code, for running our operations in a smooth manner. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business.

29. *Our Company does not own the land on which our Registered office is situated.*

Our Company does not own the land on which our Registered office is located. We have taken the same on rent from our director. If we are unable to renew the rent agreement or if the agreement is not renewed on favourable conditions, it may affect our operations adversely. Also if we do not comply with certain conditions of the rent agreement, it may lead to termination of the agreement. In the event of non-renewal or termination of the agreement, we may have to vacate our current premises and shift to new premises. There can be no assurance that we shall be able to find a suitable location, or one at present terms and conditions. Any additional burden due to shifting of premises, or increased capital expenditure, may adversely affect our business operations and financial conditions. For details on properties taken on lease by our Company please refer to the heading titled “*Land & Property*” in chapter titled “*Our Business*” beginning on page 96 of this Prospectus.

30. *We operate in a competitive environment and face fair competition in our business from organized and unorganized players, which may adversely affect our business operations and financial condition.*

The industry in which the Company operates is fairly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins, lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. The domestic segment which we cater to is fragmented and fairly competitive. We compete primarily on the basis of quality of our services, customer satisfaction and marketing. Thus some of our competitors may have certain other advantages over us, including established track record, superior service offerings, larger portfolio of services, technology and greater market penetration, which may allow our competitors to better respond to market trends. They may also have the ability to spend more aggressively on marketing initiatives and may have more flexibility to respond to changing business and economic conditions than we do. We believe that in order to compete effectively, we must continue to maintain our reputation, be flexible and prompt in responding to rapidly changing market demands and customer preferences, and offer customer quality services at competitive prices. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

31. *Changes in latest technology or requirement of machinery based on business opportunity may adversely affect Our Company’s results of operations and its financial condition.*

Modernization and technology upgradation is essential to reduce costs and increase the output. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. Further, the costs in upgrading our technology and modernizing the software may be significant which could substantially affect our finances and operations. Also, the cost of implementing new process as well as R & D would require substantial new capital expenditures and could adversely affect our business, prospects, results of operations and financial condition.

32. *We have in the past entered into related party transactions and may continue to do so in the future.*

We have entered into various transactions with our Promoters, Directors and their relatives and Group Companies. While we believe that all such transactions are conducted on arm’s length basis, there can be no assurance that we could not have achieved more favourable terms had such transactions were not entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to chapter “*Financials Statements*” beginning on page 133 of the Prospectus.

33. *There may be potential conflict of interests between Our Company and other venture or enterprises promoted by our promoter or directors.*

The main business object/activities of one of our group company, Ameya Europe Limited permit it to undertake similar business to that of our business, which may create a potential conflict of interest and which in turn, may have an implication on our operations and profits. Conflicts of interests may arise in allocating business opportunities between our Company and our Group Company in circumstances where our respective interests diverge. Further Ameya Europe Limited is allowed to carry on activities as per its MOA, which are similar to the activities carried by our Group. However, there have been no operations in the said Group Company till date. Further, our Promoters, are also directors on the board of our Group Companies. This may be a potential source of conflict of interest in addressing business opportunities, strategies, implementing new plans and affixing priorities. In cases of conflict, our Promoters may favour other companies in which our Promoters have interest.

34. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It also is possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

35. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

36. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation and goodwill of our Company. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

37. *The deployment of funds raised through this Offer shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since, the Proceeds from Offer is less than Rs.10,000 lakh, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Offer. The deployment of these funds raised through this Offer, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Offer proceeds could adversely affect our financials.

38. *Within the parameters as mentioned in the chapter titled “Objects of this Offer” beginning on page 70 of this Prospectus, our Company’s management will have flexibility in applying the proceeds of the Offer. The fund requirement and deployment mentioned in the Objects of this Offer have not been appraised by any bank or financial institution.*

We intend to use Net Proceeds towards meeting the funding the working capital requirements of the Company and General corporate purposes. We intend to deploy the Net Proceeds in financial year 2022-23 and 2023-24 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Offer may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Net Proceeds, please refer chapter titled “Objects of the Offer” beginning on page 70 of this Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment is based on internal management estimates and has not been

appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled “*Objects of the Offer*” beginning on page 70 of this Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Offer. Our Board of Directors will monitor the proceeds of this Offer.

However, Audit Committee will monitor the utilization of the proceeds of this Offer and prepare the statement for utilization of the proceeds of this Offer. However, in accordance with Section 27 of the Companies Act, 2013, and relevant provisions of SEBI ICDR Regulations, 2018, a company shall not vary the objects of the Offer without our Company being authorised to do so by our shareholders by way of special resolution and other compliances in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

39. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Offer. Further we have not identified any alternate source of financing the ‘Objects of the Offer’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Offer. We meet our capital requirements through our bank finance, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Offer or any shortfall in the Offer proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “*Objects of the Offer*” beginning on page 70 of this Prospectus.

40. *Our insurance coverage may not be adequate.*

Our Company has obtained insurance coverage in respect of certain risks. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected. For further details, please refer chapter titled “*Our Business*” beginning on page 96 of this Prospectus.

41. *Our Promoter and members of the Promoter Group will continue jointly to retain majority control over our Company after the Offer, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

After completion of the Offer, our Promoters and Promoter Group will collectively own 72.00% of the Equity Shares. As a result, our Promoter together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our AoA. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoter will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

42. *Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

- 43. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 132 of this Prospectus.

- 44. *In addition to normal remuneration or benefits and reimbursement of expenses, some of our directors and key managerial personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.***

Our Directors and Key Managerial Personnel (“KMP”) are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Directors and KMP may also be interested to the extent of their shareholding and dividend entitlement in our Company. For further information, see “*Capital Structure*” and “*Our Management*” on pages 58 and 114, respectively, of this Prospectus.

- 45. *Industry information included in this Prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.***

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although, we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us, or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Prospectus.

- 46. *Information relating to the installed manufacturing capacity of our manufacturing facilities included in this Prospectus are based on various assumptions and estimates and future production and capacity may vary.***

Information relating to the installed manufacturing capacity of our facility included in this Prospectus are based on various assumptions and estimates of our management that have been taken into account in the calculation of the installed manufacturing capacity of our manufacturing facility. These assumptions and estimates include the standard capacity calculation practice after examining the equipment installed at the facilities, the period during which the manufacturing facility operated in a year/ period, expected operations, availability of raw materials, expected utilization levels, downtime resulting from scheduled maintenance activities, unscheduled breakdowns, as well as expected operational efficiencies. For further information, see “*Our Business- Capacity and Capacity Utilization*” on page 96. Further, the installed capacity, capacity utilisation and other related information may not be computed on the basis of any standard methodology that is applicable across the industry and therefore may not be comparable to capacity information that may be computed and presented by other peer companies. Undue reliance should therefore not be placed on our historical installed capacity information for our existing facilities included in this Prospectus.

- 47. *We have issued Equity Shares during the last 12 months at a price which may be below the Offer price.***

We have issued certain Equity shares in the last twelve months at a price which may be lower than the Offer Price. Details of such issuances are given in the table below:

Date of Allotment	Number of Equity Shares	Face Value (Rs)	Issue Price (Rs)	Reasons for Allotment	Benefits Accrued to our Company
December 22, 2021	40,00,000	10	Other than Cash	Bonus issue 1:2 ⁽²⁾	Expansion of capital base of the Company

48. The average cost of acquisition of Equity Shares by our Promoters is lower than the price determined at time of registering the Prospectus.

Our Promoters average cost of acquisition of Equity Shares in our Company is lower than the Price as may be decided by the Company in consultation with the LM. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer chapter title “Capital Structure” beginning on page 58 of this Prospectus.

49. Our operations could be adversely affected by work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.

Our business model is not human resource intensive and as at March 31, 2022, our Company’s work force comprised only 118 full time employees including our senior management team. While we consider our current employee relations to be good, we cannot assure you that we will not experience disruptions in work due to disputes or other problems with our work force, which may adversely affect our ability to perform our obligations for the projects. Any disputes may also result in disruptions in our operations, which may adversely affect our business and results of operation.

OFFER SPECIFIC RISK

50. Our Company will not receive any proceeds from the Offer for Sale.

The Offer includes an Offer for Sale of 6,00,000 Equity Shares, in the aggregate, by the Selling Shareholder. Our Company will not receive any proceeds of the Offer for Sale by the Selling Shareholder. However, in the event that the Offer is withdrawn or not completed for any reason whatsoever, all the Offer related expenses will be exclusively borne by our Company. The expenses of the Selling Shareholder will, at the outset, be borne by our Company and the Selling Shareholder will reimburse our Company for such expenses incurred by our Company on behalf of the Selling Shareholder, in relation to the Offer, upon successful completion of the Offer in the manner as prescribed under applicable law and agreed amongst the Company and the Selling Shareholder. For further information, please see “Objects of the Offer” on page 70.

51. The Offer price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Offer and the market price of our Equity Shares may decline below the Offer Price and you may not be able to sell your Equity Shares at or above the Offer Price.

The Offer Price of our Equity Shares has been determined by fixed price method. The price is based on numerous factors (For further information, please refer chapter titled “Basis for Offer Price” beginning on page 76 of this Prospectus) and may not be indicative of the market price of our Equity Shares after the Offer.

The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Offer Price. Among the factors that could affect our share price include without limitation. The following:

- i. quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- ii. changes in revenue or earnings estimates or publication of research reports by analysts;
- iii. results of operations that vary from those of our competitors;
- iv. speculation in the press or investment community;
- v. new laws and governmental regulations applicable to our industry;
- vi. future sales of the Equity Shares by our shareholders;
- vii. general market conditions; and
- viii. domestic and international economic, legal and regulatory factors unrelated to our performance.

52. Our Equity Shares have never been publicly traded, and may experience price and volume fluctuations following the completion of the Offer. Further, our Equity Shares may not result in an active or liquid

market and the price of our Equity Shares may be volatile and you may be unable to resell your Equity Shares at or above the Offer Price or at all.

Prior to the Offer, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained after the Offer. Listing and quotation does not guarantee that a market for our Equity Shares will develop or, if developed, does not guarantee the liquidity of such market for the Equity Shares. Investors might not be able to rapidly sell the Equity Shares at the quoted price if there is no active trading in the Equity Shares. The Offer Price of the Equity Shares has been determined by our Company and Selling Shareholder in consultation with the LM through the Fixed Price Process. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

53. Fluctuations in the exchange rate of the Rupee and other currencies could have a material adverse effect on the value of the Equity Shares, independent of our operating results.

The Equity Shares would be quoted in Rupees on the stock exchange. Any dividends in respect of the Equity Shares will be paid in Rupees and subsequently converted into appropriate foreign currency for repatriation. Any adverse movement in exchange rates during the time it takes to undertake such conversion may reduce the net dividend to investors. In addition, any adverse movement in exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the net proceeds received by shareholders.

The exchange rate of the Rupee has changed substantially in the last two decades and could fluctuate substantially in the future, which may have a material adverse effect on the value of the Equity Shares and returns from the Equity Shares, independent of our operating results.

54. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized in excess of Rs. 1,00,000/- on the sale of listed equity shares on a stock exchange held for more than 12 months will be subject to long term capital gains tax in India at the specified rates in case STT was paid on the sale transaction. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of Securities Transaction Tax (“STT”), on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

55. Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders

56. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.

Under the Companies Act, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the preemptive rights have been waived by adoption of a special resolution. However, if the laws of the jurisdiction the investors are located in do not permit them to exercise their pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless we make such a filing. If we elect not to file a registration

statement, the new securities may be issued to a custodian, who may sell the securities for the investor's benefit. The value the custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emptive rights granted in respect of the Equity Shares held by them, their proportional interest in us would be reduced.

57. *Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.*

Indian legal principles relating to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholders of our Company than as shareholders of a corporation in another jurisdiction.

58. *The requirements of being a listed company may strain our resources.*

We are not a listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

59. *There is no guarantee that our Equity Shares will be listed on the Emerge Platform of National Stock Exchange of India Limited in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Offer and until Allotment of Equity Shares pursuant to this Offer. In accordance with current regulations and circulars issued of SEBI, our Equity Shares are required to be listed on the Emerge Platform of NSE within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

EXTERNAL RISK FACTORS

60. *The outbreak of COVID-19, or outbreak of any other similar severe communicable disease could have a potential impact on our business, financial condition and results of operations.*

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could adversely affect the overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines and lockdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our respective vendors and suppliers. There is currently substantial medical uncertainty regarding COVID-19 and no government-certified treatment or freely accessible vaccine for larger section of the population is available yet. In case there is a rapid increase in severe cases of infections leading to deaths, where the measures taken by governments are not successful or are any bans imposed by the government in this regard are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts.

If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In

addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general. The outbreak has significantly increased economic uncertainty.

It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession. The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. We are still assessing our business operations and system supports and the impact COVID-19 may have on our results and financial condition, but we cannot assure that this analysis will enable us to avoid part or all of any impact from the spread of COVID-19 or its consequences. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people. Further if the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company.

61. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located elsewhere, including India. Adverse economic developments, such as rising fiscal or trade deficit, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the countries in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

62. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

63. *Foreign investors are subject to foreign investment restrictions under Indian laws that may limit our ability to attract foreign investors, which may have a material adverse impact on the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. For further details, see "*Restrictions on Foreign Ownership of Indian Securities*" on page 201. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, Government of India, investments where the beneficial

owner of the Equity Shares is situated in or is a citizen of a country which shares land border with India, can only be made through the Government approval route, as prescribed in FDI Policy. These investment restrictions shall also apply to subscribers of offshore derivative instruments. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

64. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Our borrowing costs and our access to the debt capital markets depend significantly on the credit ratings of India. India's sovereign ratings have recently been downgraded. Any further adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing. A downgrading of India's credit ratings may occur, for example, upon a change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favourable terms and consequently adversely affect our business and financial performance and the price of the Equity Shares.

65. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Prospectus.*

As stated in the reports of the Peer Reviewed Auditor included in this Prospectus under chapter "*Financial Statements as restated*" beginning on page 133, the financial statements included in this Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Prospectus. Accordingly, the degree to which the financial information included in this Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Prospectus should accordingly be limited.

66. *The occurrence of natural or man-made disasters could adversely affect our results of operations and financial condition. Hostilities, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.*

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural or man-made disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India or countries to who we export our products could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

67. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, financial condition and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For instance, The Finance Act, 2020 ("Finance Act"), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax ("DDT"), will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident and likely be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Further, the Finance Act, 2019 stipulates any sale, transfer and issue of securities through exchanges, depositories or otherwise to be charged with stamp duty. The Finance Act, 2019 has also clarified that the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures, on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. As such, there is no certainty on the impact that the Finance Act, 2019 may have on our Company's business and operations.

Further, the Government of India has announced the union budget for Fiscal 2021, pursuant to which the Finance Act, effective from July 1, 2020, has introduced various amendments. As such, there is no certainty on the impact that the Finance Act, 2020 may have on our business and operations or on the industry in which we operate.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs relating to compliance with such new requirements, which may also require management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

68. *Investors may not be able to enforce a judgment of a foreign court against us.*

Our Company is a company incorporated under the laws of India. All our Company's Directors and officers are residents of India and all of our assets are located in India. As a result, it may not be possible for investors to effect service of process upon our Company or such persons in jurisdictions outside India, or to enforce judgments obtained against such parties outside India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if that court was of the view that the amount of damages awarded was excessive or inconsistent with public policy, or if judgments are in breach or contrary to Indian law. In addition, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI to execute such a judgment or to repatriate outside India any amounts recovered.

69. *If inflation were to rise in India, we might not be able to increase the prices of our products at a proportional rate in order to pass costs on to our customers and our profits might decline.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

70. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could impact our business, our future financial performance and the prices of the Equity Shares.

GLOBAL ECONOMY OVERVIEW

The global economy enters 2022 in a weaker position than previously expected. As the new Omicron COVID-19 variant spreads, countries have reimposed mobility restrictions. Rising energy prices and supply disruptions have resulted in higher and more broad-based inflation than anticipated, notably in the United States and many emerging market and developing economies. The ongoing retrenchment of China's real estate sector and slower-than-expected recovery of private consumption also have limited growth prospects.

Global growth is expected to moderate from 5.9 in 2021 to 4.4 percent in 2022—half a percentage point lower for 2022 than in the October World Economic Outlook (WEO), largely reflecting forecast markdowns in the two largest economies. A revised assumption removing the Build Back Better fiscal policy package from the baseline, earlier withdrawal of monetary accommodation, and continued supply shortages produced a downward 1.2 percentage-points revision for the United States. In China, pandemic-induced disruptions related to the zero-tolerance COVID-19 policy and protracted financial stress among property developers have induced a 0.8 percentage-point downgrade. Global growth is expected to slow to 3.8 percent in 2023. Although this is 0.2 percentage point higher than in the previous forecast, the upgrade largely reflects a mechanical pickup after current drags on growth dissipate in the second half of 2022. The forecast is conditional on adverse health outcomes declining to low levels in most countries by end-2022, assuming vaccination rates improve worldwide and therapies become more effective.

Elevated inflation is expected to persist for longer than envisioned in the October WEO, with ongoing supply chain disruptions and high energy prices continuing in 2022. Assuming inflation expectations stay well anchored, inflation should gradually decrease as supply-demand imbalances wane in 2022 and monetary policy in major

economies responds.

Risks to the global baseline are tilted to the downside. The emergence of new COVID-19 variants could prolong the pandemic and induce renewed economic disruptions. Moreover, supply chain disruptions, energy price volatility, and localized wage pressures mean uncertainty around inflation and policy paths is high. As advanced economies lift policy rates, risks to financial stability and emerging market and developing economies' capital flows, currencies, and fiscal positions—especially with debt levels having increased significantly in the past two years—may emerge. Other global risks may crystallize as geopolitical tensions remain high, and the ongoing climate emergency means that the probability of major natural disasters remains elevated.

With the pandemic continuing to maintain its grip, the emphasis on an effective global health strategy is more salient than ever. Worldwide access to vaccines, tests, and treatments is essential to reduce the risk of further dangerous COVID-19 variants. This requires increased production of supplies, as well as better in-country delivery systems and fairer international distribution. Monetary policy in many countries will need to continue on a tightening path to curb inflation pressures, while fiscal policy—operating with more limited space than earlier in the pandemic—will need to prioritize health and social spending while focusing support on the worst affected. In this context, international cooperation will be essential to preserve access to liquidity and expedite orderly debt restructurings where needed. Investing in climate policies remains imperative to reduce the risk of catastrophic climate change.

GLOBAL MANUFACTURING INDUSTRY

Introduction

Manufacturing is the use of labour, goods and machines to produce goods for use or for sale. Manufacturing sector covers work performed in electronics industry, mechanical industry, energy industries, food and beverage industries, plastic industry, metalworking industries, transport and telecommunications industries, chemical or physical transformation of materials, substances, or components into new products. The process of assembling of components or parts of manufactured products also falls into the bracket of manufacturing unless the activity is appropriately put into construction. Construction on the other hand primarily covers works encompassing construction of buildings or assembling of infrastructure (for e.g., highways and utility systems). All those companies performing work in the preparation of sites for new construction and those involved in subdividing land for sale as building sites also are included in construction.

Manufacturing uses raw materials that are products of agriculture, bakery, fishing, forestry, mining and other products of manufacturing operations. Plants, factories or mills that use power-driven machines and materials-handling equipment, transform the raw materials into new finished products and components requiring further manufacturing.

On the other hand, construction market includes new work, maintenance or repairs. Production responsibilities are specified contractually with constructions owners (prime contractors) or contracts with subcontractors.

Manufacturing industries are the chief wealth generating sectors of any economy. These industries adopt various technologies and methods widely known as manufacturing process management. Manufacturing industries are important for an economy as they employ a huge share of the labour force and produce materials required by sectors of strategic importance such as national infrastructure and defence. Some of the industries we cover under manufacturing are aerospace, agriculture, defence, environmental services like air purification, glass, lighting, paper and forest products, machinery, metals (like aluminium, copper, exotic metals, iron and steel, non-ferrous metals and precious metals), mining, minerals, packaging and textiles.

The world manufacturing industries in a capitalist economy indulge in mass production and make them available as earning profits. Manufacturing in collectivist economy is guided by a state run agency for making available the manufactured goods depending on the requirement. Manufacturing industry in a modern economy operates under regulations framed by the Government.

It is unusual to see positive economic indicators paired with historic labour and supply chain challenges. But this is the trajectory for US manufacturing in 2022 emerging from the pandemic. The recovery gained momentum in 2021 on the heels of vaccine rollout and rising demand. As industrial production and capacity utilization surpassed pre-pandemic levels midyear, strong increases in new orders for all major subsectors signal growth continuing in 2022.1 Projections based on the Oxford Economic Model (OEM) anticipate GDP growth in manufacturing of 4.1% for 2022. As capital expenditures rise, a combination of high business valuations, strong earnings, and low-cost debt may also encourage companies to add technology capabilities, gain share, and expand in new markets with M&A. Policy initiatives and infrastructure investment have the potential to contribute to manufacturing's recovery.

However, optimism around revenue growth is held in check by caution from ongoing risks. Workforce shortages and supply chain instability are reducing operational efficiency and margins. Job openings— at more than twice the gap to reach pre-pandemic employment levels—hover near all-time highs at more than 800,000. Sourcing bottlenecks and global logistics logjams are likely to remain challenges in 2022 along with cost pressure and inflation risk. Steel, aluminium, and other commodity prices have surged amid shortages. Adding to this mix are risks from COVID-19 variants, cyberattacks, environmental challenges, and higher corporate tax rates. The industry can expect elevated uncertainty from a range of potential disruptors globally.

Manufacturers looking to capture growth and protect long-term profitability should embrace digital capabilities from corporate functions to the factory floor. Smart factories, including green field and brownfield investments for many manufacturers, are viewed as one of the keys to driving competitiveness. More organizations are making progress and seeing results from more connected, reliable, efficient, and predictive processes at the plant. In 2022, 45% of manufacturing executives surveyed expect further increases in operational efficiency from investments in industrial Internet of Things (IIoT) that connect machines and automate processes.

US manufacturers have room to run with advanced manufacturing compared to many competitors globally. The number of industrial robots as a share of manufacturing workers in the United States is below countries like Korea, Singapore, and Germany. Half of executives we surveyed expect to increase operational efficiency in 2022 through their investments in robots and cobots. Investment in artificial intelligence technologies is also expected to see a compound annual growth rate (CAGR) above 20% through 2025. Discrete manufacturing is among the top-three industries expected to invest most heavily in AI, primarily in quality management and automated preventive maintenance use cases.

Manufacturers should look not only at their cyber defences, but also at the resiliency of their business in the event of a cyber-attack. Eighty-five percent of executives in our survey expect their organizations will invest more in prevention in 2022, while 56% of those surveyed anticipate more for detection and 29% plan to allocate more for areas of response. Cybercriminals can cause harm beyond intellectual property theft and financial losses, using malware that now ties in AI and crypto currencies. They can also shut down operations and disrupt entire supplier networks, compromising safety as well as productivity. A patchwork of regulations for different industries could be consolidated under the current administration's "whole-of-nation" approach to protect critical infrastructure.28 The potential for additional oversight is likely to prompt more industrials to rethink preparedness for crisis response.

GLOBAL BALL AND ROLLER BEARING INDUSTRY

Introduction

The global ball bearing market reached a value of US\$ 39.4 Billion in 2021. Looking forward, the publisher expects the market to reach US\$ 50.7 Billion by 2027, exhibiting a CAGR of 4.3% during 2022-2027. Keeping in mind the uncertainties of COVID-19, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use industries. These insights are included in the report as a major market contributor.

A ball bearing, also known as an anti-friction component, is a type of rolling-element which has two ring-like tracks with small, freely rotating metal balls between them. These metal balls provide a smooth and low friction motion by supporting both axial and radial loads. Ball bearings are easy to maintain and are durable in operations due to their simple design. They also help in supporting weight, facilitating efficient transmission of power and

ensuring proper alignment of movable components. Owing to these properties, ball bearings are extensively used for high speed and rotatory applications in numerous industries.

The world outlook for ball and roller bearing parts and components across more than 2,000 cities. For the year reported, estimates are given for the latent demand, or potential industry earnings (P.I.E.), for the city in question (in millions of U.S. dollars), the percent share the city is of the region, and of the globe. These comparative benchmarks allow the reader to quickly gauge a city vis-à-vis others. Using econometric models which project fundamental economic dynamics within each country and across countries, latent demand estimates are created. This report does not discuss the specific players in the market serving the latent demand, nor specific details at the product level. The study also does not consider short-term cyclicalities that might affect realized sales. The study, therefore, is strategic in nature, taking an aggregate and long-run view, irrespective of the players or products involved.

Ball bearings, complete, unmounted; Tapered roller bearings (including cups and cones), unmounted; Other roller bearings, unmounted; Mounted bearings (excluding plain); Parts and components for ball and roller bearings (including balls and rollers), sold separately (excluding cups and cones); Ball and roller bearing manufacturing.

The Ball & Roller Bearings (B2B Procurement) Purchasing World Report gives data on a list of 67 categories of Raw Materials, Semi-Finished & Finished Products, Services, Sub-contracted Expenditures and Expenses by the 637 entities in the Ball & roller bearings sector. The data analyses each of up to 200 countries by each Product by 3 Time series: From 1997- 2019 and Forecasts 2020- 2027 & 2027-2046.

Global Ball Bearing Market Drivers/Constraints:

- Wind turbines require maintenance-free and high-quality ball bearings that help enhance turbine reliability and performance. The growing number of windmill farms worldwide is creating a huge demand for ball bearings in this sector.
- The manufacturers have developed sensor components for ball bearings which are used in conveyors, road rollers and electric motors. These components help in digital monitoring of revolution speed, axial movement, acceleration, deceleration and weight carrying capacity.
- Manufacturers are focusing on upgrading the working capability of ball bearings efficiently at lower costs. They are also improving the characteristics of the existing bearings such as lowering torque, increasing temperature range, reducing weight, decreasing energy consumption, enhancing the lifecycle and refining friction resistance.
- Counterfeit products act as the major hindrance to the global ball bearing market growth. These counterfeit ball bearings can drastically affect the performance of the equipment, leading to a decline in their sales.

Moreover, a rise in demand for specialized bearing solutions that meet different industry-specific requirements and challenges is projected to boost the market. For instance, the rising application of high-capacity products in wind turbines is expected to catapult the demand. Wind turbines utilize these products to enhance turbine performance and reliability, increase energy production, and reduce lubricant consumption.

Manufacturers constantly work on improving the product designs to increase performance and energy efficiency. They use a special material for raceways, cages, and rolling elements as well as redesigned raceway profiles. Furthermore, technological advancements in seal and lubrication technologies and the use of lightweight materials in high-performance products are generating huge prospects for the manufacturers. Integration of electro-mechanical features directly into the bearings helps in performance improvement and reductions in size and cost.

Rising demand for high-performance bearings has resulted in manufacturers integrating advanced sensor units in their products. The sensor units assist in digital monitoring of axial movement, deceleration, acceleration, rotation speed, and load-carrying capacity of the product. Additionally, the advent of the Agricultural Internet of Things (IoT) has encouraged the adoption and constant monitoring of connected equipment and machinery. This trend has also influenced the market positively.

The railway and aerospace segment are anticipated to emerge as the fastest-growing segment by 2028. This growth can be attributed to growing interest in travel activities, the growing need to renew aging fleets owing to stringent environmental legislation, and fuel price pressure coupled with the availability of improved ways to assist global and local transportation systems. Demand from the railway segment is also anticipated to rise on account of accelerated railway construction in developing countries. Further, surging demand for small single-aisle aircraft and helicopters from emerging economies is anticipated further drive the growth of the segment.

About 10.75 lakh tea workers will benefit from this, including 6.23 lakh women workers involved in the large tea estates of Assam and West Bengal.

Road Ahead

India is an attractive hub for foreign investments in the manufacturing sector. Several mobile phone, luxury and automobile brands, among others, have set up or are looking to establish their manufacturing bases in the country.

The manufacturing sector of India has the potential to reach US\$ 1 trillion by 2025. The implementation of the Goods and Services Tax (GST) will make India a common market with a GDP of US\$ 2.5 trillion along with a population of 1.32 billion people, which will be a big draw for investors. The Indian Cellular and Electronics Association (ICEA) predicts that India has the potential to scale up its cumulative laptop and tablet manufacturing capacity to US\$ 100 billion by 2025 through policy interventions.

With impetus on developing industrial corridors and smart cities, the Government aims to ensure holistic development of the nation. The corridors would further assist in integrating, monitoring and developing a conducive environment for the industrial development and will promote advance practices in manufacturing.

INDIAN BALL AND ROLLER BEARING INDUSTRY

Introduction

India is a leading country in both manufacturing and exporting bearing products. Bearing production in India has been increasing steadily over the years due to the increasing need for bearings in industries - such as automotive, water pumps, fans, etc.

India has always been the largest importer of bearings and has a huge import of ball bearings, roller bearings, etc. Every year, a large number of bearing products are imported by India, and many of these are exported to other countries.

The bearings are important parts of a machine as they allow them to function without friction. Bearings can also make the machine more efficient by reducing energy loss and are vital in the production process. And are also used in a wide range of applications such as devices, machines, and engines. With all the different types of

bearings, there's no wonder that bearing manufacturers in India are in high demand.

Indian Market

India bearings market size was valued at US\$ 1,772.6 Mn in 2021 and is projected to expand up to US\$ 3,374.4 Mn by the end of 2027. The market is registering growth at a CAGR of 10.9% during the forecast period 2022-2027. Bearings are highly engineered, precisely made components that enable machinery to move at extremely high speed and carry remarkable loads with ease and efficiency. It is a part of a machine that allows one part to rotate in contact with another part with less friction. Bearings are used in every kind of equipment or machinery, ranging from automobile parts, farm equipment, and household appliances to defence and aerospace equipment.

In India, the market for bearing has gained an impressive impetus owing to the rising utilization of bearing in motors and increasing demand for automotive electrification. Moreover, the Indian government's initiatives such as 'Make in India' and 'Aatmanirbhar Bharat', aimed at reviving the manufacturing sector in turn increases the demand for bearings. However, the low-cost, and easy availability of counterfeit products are major threats to the India-bearing market.

India bearing market was divided into various segments (such as based on product type, size, materials, and application) and sub-segments to get a holistic picture of the market. Value chain analysis, PESTLE analysis, and Porter's five forces analysis were conducted to identify strengths, weaknesses, and potential threats. Furthermore, the performances of the competitors were measured to understand the scope of the business in the India bearing industry. To further double-check the data and results in data triangulation technique was implemented.

Roller Bearing holds the highest market share in 2021

The roller bearings segment dominated the market and accounted for the largest revenue share of more than 45% in 2021. Further, this segment is also anticipated to continue its dominance and emerge as the fastest-growing segment by 2027. These products reduce rotational friction, support radial and axial loads, and can sustain limited axial loads and heavy radial loads more efficiently than their counterparts. The widespread espousal of roller bearings by several industries, such as capital equipment, automobiles, home appliances, and aerospace, is estimated to positively impact the product demand.

The automotive segment is anticipated to have the highest growth share by 2027

The automotive segment dominated the market and held the largest revenue share of approximately 50% in 2021. The fastest-growing segment is anticipated to register a growth in revenue from US\$ 803.7 Mn in 2021 to US\$ 1,419.1 by 2027. The high share of this segment can be attributed to high automotive production. Also, the demand for vehicles with technologically advanced solutions is escalating, thus, leading to rising in vehicle manufacturing that necessitates instrumented products.

Ball Bearing Market

The ball bearing market is estimated to witness a considerable growth in the forthcoming years, ascribed to the aim to achieve energy efficiency. Energy saving and bearings go hand-in-hand. The primary aim of this element is saving energy by reducing friction, be it during the rotation of shafts of a transmission or the wheel of a vehicle. Additionally, rising demand for commercial vehicles is expected to catapult the demand from automotive sector across the world.

Advancements in technology including smart bearings, development of cutting-edge materials and lubricants, and integrating sensor units, are anticipated to provide high growth potential to the market.

A mature ball bearing market is closely related to the dynamic demand in the state of engineering industries and capital goods. However, companies are offering integrated products that significantly decrease the number of bearings that go into an assembled product and reduce the overall cost of equipment. Incidentally, this also increases the shelf-life and reliability of the product. Of late, manufacturers are heavily investing in R&D to address the intensifying competition by providing innovative products.

The growth of India's bearings industry in the days to come is expected to be led by growth in industrial production as well as demand from automobile sector.

The shifting focus on renewable energy will further lead to increased demand for bearings in India as wind and water turbines require heavy usage of bearings to convert the kinetic energy into electricity. Government of India has so far played a dormant role in the development and building of bearings market in the country. However, after the Modi government came to power and introduced certain policies including the 'Make in India' initiative, tax incentives, R&D incentives and others are likely to encourage the bearings manufacturers as well as attract investments in the industry.

MANUFACTURING PROCESS

The manufacturing process begins with first receiving the enquiry from the customer. The enquiry consists of the drawing of the component, material in which the component and any other specific quality requirements. Our Company reviews the enquiry for technical feasibility, and if the same is approved by us, we then proceed to quote the customer our final supply price and delivery lead time. If the quote is approved, they we received a Purchase Order which is then accepted by sending order acceptance (OA) to customer.

After the order acceptance, we start procuring the raw materials. Our raw materials include castings, forgings or bars depending on customer requirement. Simultaneously our engineering department starts producing process control drawings, for each individual machining process to achieve the end product. These drawings are called PCP's, and our internal manufacturing happens according to these drawings.

After procurement of raw material, the same undergoes a quality check and after passing the same, it is issued for further processing. Machining operations can be carried out in-house or at a supplier end depending on the nature of the operation, the load in-house, criticality of the tolerance. As a thumb rule, precision operations are carried out inhouse whereas rough machining operations are carried out at suppliers' end. Our Company has added 2 PTA (plasma transfer arc) welding machines for overlaying and a heat treatment furnace as part of its ongoing integration plans.

Machining involves turning the raw material and converting it into a finished product by way of CNC (automatic) turning, CNC milling and drilling, spline milling, key-way machining, hard-facing/overlay and other value-added functions in line with customer requirements. Machining operations can be carried out in-house or by the supplier depending on the nature of the operation, the load in-house and the criticality of the tolerance. As a thumb rule, precision operations are carried out in-house whereas rough machining operations are carried out at the suppliers' end. Our Company has machines for overlaying and a heat treatment furnace as part of its ongoing integration plans.

The finished products can be broadly classified into shafts, and other valve and pump trim components. Every product undergoes strict quality checks before being dispatched to the customer (along with documentary evidence of these checks, such as material certification and inspection reports).

The Company is primarily engaged in Manufacture Pump and Valve Components and Other Engineering Components used in Valve Industry etc. The Company has set up a manufacturing facility at Pune.

B. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

1. BASIS OF PREPARATION OF FINANCIAL STATEMENTS

The Restated Statement of Assets and Liabilities of the Company as on March 31, 2022, March 31, 2021 and March 31, 2020, and the Restated Statement of Profit and Loss and Restated Statements of Cash Flows for the year ended on March 31, 2022, March 31, 2021 and March 31, 2020 and the annexure thereto (collectively, the “**Restated Financial Statements**” or “**Restated Summary Statements**”) have been extracted by the management from the Audited Financial Statements of the Company for the year ended March 31, 2022, March 31, 2021 and March 31, 2020.

The financial statements are prepared and presented under the historical cost convention and evaluated on a going-concern basis using the accrual system of accounting in accordance with the accounting principles generally accepted in India (Indian GAAP) and the requirements of the Companies Act, including the Accounting Standards as prescribed by the Companies (Accounting Standards) Rules, 2014 as per section 133 of the Companies Act, 2013.

2. USE OF ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles (‘GAAP’) in India requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities on the date of the financial statements, and the reported amount of revenue and expenses during the reporting period. The estimates and assumptions used in the accompanying financial statements are based upon management’s evaluation of the relevant facts and circumstances as of the date of the financial statements which in management’s opinion are prudent and reasonable. Actual results may differ from the estimates used in preparing the accompanying financial statements. Any revision to accounting estimates is recognized prospectively in current and future periods.

3. FIXED ASSETS

Fixed assets are stated at historical cost less accumulated depreciation and impairment losses. Cost includes purchase price and all other attributable cost to bring the assets to its working condition for the intended use.

Subsequent expenditures related to an item of tangible asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

4. DEPRECIATION

Depreciation is provided on a straight line basis over the useful lives of assets, which is as stated in Schedule II of the Companies Act 2013 or based on technical estimation made by the Company.

Depreciation and amortization methods, useful lives and residual values are reviewed at each reporting date.

5. BORROWING COSTS

Borrowing costs attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for intended use. All other borrowing costs are recognized as an expense in the period in which they are incurred. Capitalization of borrowing costs is suspended during the extended period in which active development is interrupted. Capitalization of borrowing costs is ceased when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete. Other borrowing costs are charged to statement of profit and loss as and when incurred.

6. IMPAIRMENT OF ASSETS

In accordance with AS 28 on 'Impairment of assets' as prescribed in the Companies (Accounting Standards) Rules, 2006, the Company assesses at each balance sheet date, whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. The recoverable amount of the assets (or where applicable that of the cash generating unit to which the asset belongs) is estimated as the higher of its net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of the assets and from its disposal at the end of its useful life. An impairment loss is recognized whenever the carrying amount of an asset or the cash-generating unit to which it belongs, exceeds its recoverable amount. Impairment loss is recognized in the statement of profit and loss or against revaluation surplus, where applicable. If at the balance sheet date, there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount subject to a maximum of the depreciated historical cost.

7. INVESTMENTS

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

8. INVENTORIES

Raw materials, stores and spares and trading goods are valued at lower of cost and net realizable value.

Work-in-Progress and finished goods are valued at the lower of cost and net realizable value. Cost includes direct materials and labour and a part of manufacturing overheads based on normal operating capacity.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realized in the future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognized only if there is virtual certainty of realization of such assets. Deferred tax assets are reviewed at each balance sheet date and written down or written up to reflect the amount that is reasonably / virtually certain (as the case may be) to be realized.

15. CONTINGENT LIABILITIES AND PROVISIONS

The Company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources would be required to settle the obligation, the provision is reversed.

Contingent assets are not recognized in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an inflow of economic benefits will arise, the asset and related income are recognized in the period in which the change occurs.

The Company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources would be required to settle the obligation, the provision is reversed. Contingent assets are not recognized in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an inflow of economic benefits will arise, the asset and related income are recognized in the period in which the change occurs.

Loss contingencies arising from claims, litigation, assessment, fines, penalties, etc. are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated.

16. EARNINGS PER SHARE:

Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Investor had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and the continuation of this phase has been extended until March 31, 2020. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. Further, pursuant to SEBI circular dated March 30, 2020, this phase has been extended till further notice.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSBs and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under applicable law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the LM will be required to compensate the concerned investor.

Further, in terms of the UPI Circulars, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the LM, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.

For further details, refer to the General Information Document available on the websites of the Stock Exchanges, and the LM.

All SCSBs issuing facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the applicants using the UPI payment mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include,

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The responsibility of granting approval for foreign investment under the Consolidated FDI Policy and FEMA has been entrusted to the concerned ministries/departments.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry (formerly Department of Industrial Policy and Promotion), Government of India (“**DPIIT**”) issued the Consolidated FDI Policy, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. Up to 100% foreign investment under the automatic route is currently permitted in the sector of “Manufacturing”, which includes manufacture of cement and concrete products.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that: (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations, (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI policy, and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“**Restricted Investors**”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Each Applicant should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Applicant shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Offer.

The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States, and unless so registered may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, such Equity Shares are being offered and sold (i) outside of the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur; and (ii) to “qualified institutional buyers” (as defined in Rule 144A under the U.S. Securities Act), pursuant to the private placement exemption set out in Section 4(a) of the U.S. Securities Act.

The above information is given for the benefit of the Applicants. Our Company and the Lead Manager are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Prospectus.
