For further details regarding our registered office, please refer to the Section titled “Our Business” on page 89 of this Draft Prospectus.

In case of any dispute arise in future may affect our business relation and our results of operation. Upon expiration of the relevant agreement for such premises, we will be required to negotiate the terms and conditions on which the lease agreements may be renewed. In the event that these existing leases are terminated or they are not renewed on commercially acceptable terms or at all, we may suffer a disruption in our operations. If alternative premises are not available at the same or similar costs, size or locations, our business, financial condition and results of operations may be adversely affected.

3. An inability to effectively manage project execution may lead to project delays which may affect our business and results of operations.

Our business is dependent on our ability to effectively manage the execution of our projects. An inability to effectively manage our operations, including ineffective or inefficient project management procedures could increase our costs and expenses, result in project delays and thereby affect our profitability. The effectiveness of our project management processes and our ability to execute projects in a timely manner may be affected by various factors. Additionally, in some projects, in case of delay due to our fault or because of defective work done by us, clients have the right to rectify the defective work, or engage a third party to complete the work and deduct additional costs or charges incurred for completion of the work from the project price payable to us. Such factors would have an effect on our results of operations and financial condition.

4. Our business may be impacted by the rate of and state of technological change, including the digital evolution and other disruptive technologies, and the presence and development of open-sourced content could continue to increase, which could adversely affect our revenue.

Due to the fast-changing digital marketplace, demand for innovative technology has generally resulted in short lead times for producing products that meet customer specifications. Shorter time to market our products increases the risk that our products may contain flaws, and these defects may only become apparent after product launch, particularly for new products and new features to existing products that are developed and brought to market under tight time constraints. Problems with the performance of our digital products could result in liability, loss of revenue or harm to our reputation.

5. We are dependent on third party transportation providers for delivery of raw materials to us from our suppliers and delivery of our products to our customers and distributors. Any failure on part of such service providers to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.

Our success depends on the smooth supply and transportation of the raw materials required for manufacturing and transportation of our products from our units or warehouses to our customers and distributors, which may be subject to various uncertainties and risks. We are significantly dependent on third party transportation providers for the delivery of raw materials to us and delivery of our products to our customers and distributors. Uncertainties and risks such as transportation strikes or delay in supply of raw materials and products could have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to maintain a continuous supply of raw materials or to deliver our products to our customers in an efficient and reliable manner could have a material and adverse effect on our business, results of operations and financial condition.

6. Our manufacturing operations are critical to our business and any shutdown of our manufacturing facility may have an adverse effect on our business, results of operations and financial condition.

Presently we have a manufacturing facility, in Vasai, Palghar District. Any local, social unrest, natural disaster or breakdown of services and utilities could have material adverse effect on the business and result of operations. Our facilities are subject to operating risks like breakdown or failure of equipment, power supply or processes and performance below expected levels of efficiency, obsolescence, natural disaster, industrial accidents and the need to comply with the directives of relevant government authorities. In the event that we are forced to shut down our facilities for a significant period of time, it would have a material adverse effect on our business, results of operations and financial condition. Further, continuous addition of industries in and around our manufacturing facility without commensurate growth of its infrastructural facilities may put pressure on the existing infrastructure therein, which may adversely affect our business. Further, the spiraling cost of living around our facilities may push our manpower costs higher, which may reduce our margin and cost competitiveness.

7. We have not entered into any long-term contracts with any of our customers and typically operate on the basis of work orders, which could adversely impact our revenue and profitability.

We do not have any long-term contracts with our customers and we supply our products and provide services on basis of regular work orders with our customers which could adversely affect the business of our Company. We cater our services on an order to order basis.

Cospower Engineering Limited

Our customers can terminate their relationship with us by giving notice and as such terms and conditions as mutually agreed upon, which could materially and adversely impact our business. Although we believe that we have satisfactory business relations with our customers and have received business from them in the past and will regularly receive the business in future also but there is no certainty that we will receive business in future from them and may affect our profitability.

8. Our top ten customers contribute approximately 69.21% of our revenues during the financial year 2018-19. Any loss of business from one or more of them may adversely affect our revenues and profitability.

Our top ten customers contribute approximately 69.21% of our revenues during the financial year 2018- 19. Any decline in our quality standards, growing competition and any change in the demand for our products by these customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability. However, the composition and revenue generated from these clients might change as we continue to add new clients in normal course of business. We intend to retain our customers by offering solutions to address specific needs in a proactive, cost effective and time efficient manner. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

9. Our work orders with customers expose us to certain risk, which may negatively impact our revenue and profitability.

In the agreements and work orders with our customers, we are required to deliver the services to the customer within the scheduled time lines. Further, each order is customized to the customer's requirement. Termination of work orders, inadequate performance and/or failure on our part or any third party to meet quality and/or scheduled timelines set by our customers could result in a loss of our business or result in non-compliance with our contractual obligations and could materially or adversely affect our business, profit and results of operation.

Besides work orders can be terminated with or without cause and at short notice usually after paying costs incurred by us. Additionally, most of our work orders with our customers are without any commitment to future work. Our business is dependent on the decisions and actions of our customers, and there are a number of factors relating to our customers that are outside our control that might result in the termination of a project or the loss of a customer. In addition, as our scope of services involves providing skilled and trained personnel to our customers for carrying out customer services, such as assisting in network failure and other related issues, failure on part of the personnel provided by us to successfully carry out such services may also result in the termination of a project or the loss of a customer. Any of these factors may adversely affect our revenues and profitability.

10. If we experience delays and/or defaults in client payments, we may be unable to recover all expenditures.

Because of the nature of our business, we sometimes commit resources to projects prior to receiving payments from the client in amounts sufficient to cover expenditures as they are incurred. In difficult economic times, some of our clients may find it increasingly difficult to pay invoices for our services timely, increasing the risk that our accounts receivables could become uncollectible and ultimately be written off. Delays in client payments may require us to make a working capital investment, which could impact our cash flows and liquidity. If a client fails to pay invoices on a timely basis or defaults in making its payments on a project in which we have devoted significant resources, there could be an adverse effect on our results of operations or liquidity.

11. Our business is dependent on the availability/supply of materials which we source from domestic suppliers. Any decrease in the availability of the materials, could adversely affect our results of operations.

Our Company is dependent on third party suppliers for procuring our materials. Certain materials required for manufacturing are CRCA Sheet, MS structures, capacitors, reactors, LT switchgears, LED lamps, pushbuttons, ammeter, voltmeter, multifunctional meter, panel accessories etc.. We are exposed to fluctuations in the domestic prices of these materials. As we typically do not enter into any long -term supply agreements with our suppliers, we have no long -term rate contract with them. The cost and availability of our materials then becomes dependent upon a variety of factors like cost of electric components, governmental regulations etc., and any significant increase in the prices of these materials could adversely affect our sales and profitability

12. Our business is subject to various operating risks at our sites, the occurrence of which can affect our results of operations and consequently, financial condition of our Company.

Our business operations are subject to operating risks, such as breakdown or failure of equipments used at the sites, weather conditions, shortage of consumables, performance below expected levels of output or efficiency, natural disasters, labour disputes and industrial accidents. The occurrence of these risks, if any, could significantly affect our operating results, and the slowdown / shutdown of business operations may have a material adverse effect on our business operations and financial conditions.

13. Breakdown of machinery and/or equipment used for the purpose of manufacturing process

Any breakdown or defect in the machinery and/or the equipment used for the purpose of our manufacturing process may delay the production process as a whole and result in missing deadlines in delivery of product if we are able to repair the machines or replace it within relevant timelines. Any such delays may have an adverse effect on the business of the Company.

14. Our business is manpower intensive and a high proportion of our total staff comprises of employees on contract. Our business may be adversely affected if we are unable to obtain employees on contract or at commercially attractive costs.

We operate in an industry which requires skilled technical resources and our success depends in large part upon our ability to attract, hire, train and retain qualified employees, including our ability to attract employees with needed skills in the geographic areas in which we operate. In the event we are not be able to attract a high degree of talented employees, or experience high attrition levels which are largely out of our control or are unable to motivate and retain our existing employees, the future of our business and operations may be affected. We cannot assure that we will be successful in reducing attrition rate or ensuring that the attrition rate does not rise further in the future. Given the present scenario, high attrition rate being an industry phenomenon, we have taken recourse by training the new recruits. This has helped us to have duly trained manpower to fill in the vacancy on an immediate basis.

15. Activities involving our manufacturing process can be dangerous and can cause injury to people or property in certain circumstances. A significant disruption at any of our manufacturing facilities may adversely affect our production schedules, costs, revenue and ability to meet customer demand.

Our business involves manufacturing processes that can be potentially dangerous to our employees. An accident may result in loss of life, destruction of property or equipment, manufacturing or delivery delays, or may lead to suspension of our operations and/or imposition of liabilities.

While we believe we may maintain adequate insurance, interruptions in production as a result of an accident may also increase our costs and reduce our revenue, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we or our senior management may become involved in as a result, which may negatively affect our profitability, business, financial condition, results of operations and prospects. Any negative publicity associated therewith, may have a negative effect on our business, financial condition, results of operations and prospects.

16. Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.

Our Company is engaged in business manufacturing of electrical panels, harmonic filters and substation and equipment mounting structure which attracts tax liability such as Excise duty, Value Added Tax, Service Tax and Income Tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund, ESIC, etc. Though, we have deposited the required returns and paid taxes thereon under various applicable Acts but any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

17. We require certain approvals, licenses, registrations and permits to operate our business, and failure to obtain or renew them in a timely manner or maintain the statutory and regulatory permits and approvals required to operate our business may adversely affect our operations and financial conditions.

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Though we believe that we have obtained those permits and licenses which are adequate to run our business. However, the following registrations are pending for approval or at resubmission stage:

Licence Applied for	Date of Application
Factory Licence under factories Act, 1948	12.02.2020

Further, our Company has changed its address of operations in recent past. But certain registrations still exists at the old address and have not been updated and the details of the same are as under:

Sr. No.	Registration certificates not updated
1.	Tax Deduction Account Number (TAN)
2.	Professional Tax Registration Certificate
3.	Registration under Employee Provident Fund (EPF)*
4.	Registration under State Insurance Act (ESI)*

* Registrations are based on the premises of operations and may attract penalty if not updated.

There is no assurance that there are no other statutory/regulatory requirements which we are required to comply with. However, some of the approvals are granted for a fixed period of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. Further, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied with. Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business. For further details, please refer to section titled "Government and Other Statutory Approvals" beginning on page 176 of this Draft Prospectus.

18. We are subject to stringent labour laws or other industry standards and any strike, work stoppage or increased wage demand by our employees or any other kind of disputes with our employees could adversely affect our business, financial condition and results of operations.

Our manufacturing activities are labour-intensive. We employ labour on contract basis at our manufacturing facility and projects sites. We are subject to a number of stringent labour laws that protect the interests of our workers, including legislation that stipulates rigorous procedures for dispute resolution and retrenchment of workers and imposes financial obligations on employers. While we have not experienced significant labour unrest in the past, strikes, lock-outs and other labour action, may have an adverse impact on our operations, and if not resolved in a timely manner, could lead to disruptions in our operations. We cannot guarantee that we will not experience any strike, work stoppage or other industrial action in the future and any such event could adversely affect our business, results of operation and financial condition. Further, our third-party raw material suppliers may experience strikes or other labour disruptions and shortages that could affect our operations, possibly for a significant period of time, result in increased wages, shortage in manpower and other costs and otherwise have a material adverse effect on our business, results of operations or financial condition. Additionally, our inability to recruit employees, in particular skilled employees and retain our current workforce could have a material adverse effect on our business, financial condition and profitability.

19. We have to update the name of our company in all the statutory approvals and certificates due to the conversion of our Company.

Most of our statutory approvals and certificates are in the name of Cospower Engineering Private Limited. Since our company was converted into a public limited company pursuant to shareholder's resolution dated January 23, 2020 and fresh certificate of incorporation dated February 19, 2020 we have to update the name Cospower Engineering Limited on all of the statutory approvals and certificates including PAN. We cannot ensure that we will be able to update the said documents on timely manner.

20. We have had certain inaccuracy in relation to regulatory filings to be made with RoC and our company has made non-compliances for non-filing of certain statutory forms under the provisions of Companies Act.

Our Company has not complied with certain provisions of the Companies Act in the past, for instance, non-filing of annual filing related forms for FY 2013-14. Although no show cause notice have been issued against the Company till date in respect of above and Company is in the process of rectifying non-compliances made by the Company

Cospower Engineering Limited

In the event of any cognizance being taken by the concerned authorities in respect of above, penal actions may be taken against the Company and its directors, in which event the financials of the Company and its directors may be affected.

21. Our Company has filed forms for allotment of shares inadvertently with Registrar of Companies.

In the year 2013-14, our Company had filed Form 2 dated December 18, 2013 for allotment of shares inadvertently with Registrar of Companies where Company has mentioned face value of Rs. 100 instead of Rs. 10. Under the provisions of the Companies Act, if any form is filed inaccurately, then the company and/or every officer of the company who is in default may be punishable with fine

22. We face competition in our business from domestic competitors. Such competition would have an adverse impact on our business and financial performance.

The industry, in which we are operating, is highly and increasingly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by, competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

23. If we are unable to establish and maintain an effective system of internal controls and compliances our business and reputation could be adversely affected.

We manage regulatory compliance by monitoring and evaluating our internal controls, and ensuring that we are in compliance with all relevant statutory and regulatory requirements. However, there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all. As we continue to grow, there can be no assurance that there will be no other instances of such inadvertent non-compliances with statutory requirements, which may subject us to regulatory action, including monetary penalties, which may adversely affect our business and reputation.

24. We may not be able to successfully implement our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively. We have successfully executed our business strategies in the past but there can be no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

25. Our Company does not have any listed peer companies for comparison of performance and therefore, investors must rely on their own examination of accounting ratios of our Company for the purposes of investment in the Issue.

As of the date of this Draft Prospectus, there are no companies which are involved in the business similar to our business, which are listed on the Indian stock exchanges and accordingly, we are not in a position to provide comparative analysis of our performance with any listed company. Therefore, investors must rely on their own examination of accounting ratios of our Company for the purposes of investment in the Issue.

26. Our success largely depends upon the knowledge and experience of our Promoters and our Key Management Personnel as well as our ability to attract and retain skilled personnel. Any loss of our Key Management Personnel or our ability to attract and retain them and other skilled personnel could adversely affect our business, results of operations and financial condition.

We depend on the management skills and guidance of our Promoters for development of business strategies, monitoring their successful implementation and meeting future challenges. Further, we also significantly depend on the expertise, experience and continued efforts of our Key Management Personnel. Our future performance will depend largely on our ability to retain the continued

Cospower Engineering Limited

service of our management team. If one or more of our Key Management Personnel are unable or unwilling to continue in his or her present position, it could be difficult for us to find a suitable or timely replacement and our business could be adversely affected.

There is significant competition for management and other skilled personnel in the industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages, incentives and other perquisites to such skilled personnel. Further, in the event we are not able to attract and retain talented employees, as required for conducting our business, or if we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and results of operations may be adversely affected. For further details, see "Our Management" on page 112 of this Draft Prospectus.

We have in the course of our business entered into, and will continue to enter into, several transactions with our related parties. For details, please refer to the Statement of Related Party Transactions under chapter "Financial Statement" beginning on page --- of this Draft Prospectus. We cannot assure you that we will receive similar terms in our related party transactions in the future. The STT will be levied on and collected by an Indian Stock Exchange on which equity shares are sold. The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

62. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

63. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

64. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

65. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

66. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

INDUSTRY OVERVIEW

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the issue has independently verified the information provided in this section. Industry sources and publications, referred to in this section, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

GLOBAL ECONOMIC OVERVIEW

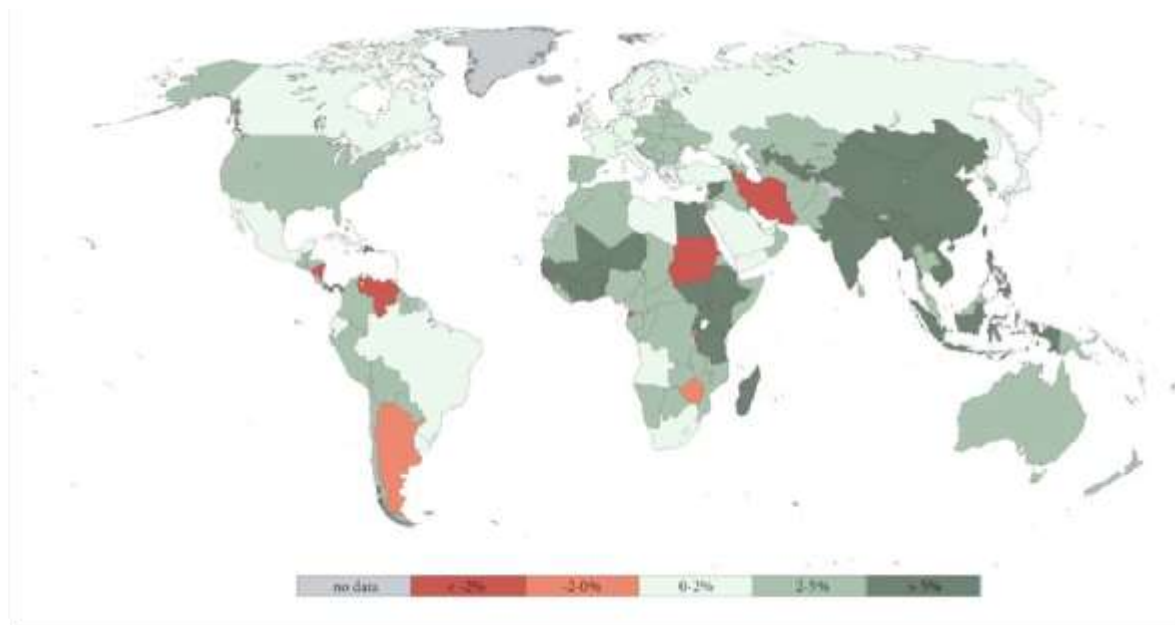

The global growth outlook has weakened amid unresolved trade tensions and elevated international policy uncertainty. Across both developed and developing countries, growth projections for 2019 have been downgraded. Alongside a slowdown in international trade, business sentiments have deteriorated, casting a cloud on investment prospects. In response to softening economic activity and subdued inflationary pressures, major central banks have eased their monetary policy stances.

While part of the growth slowdown reflects temporary factors, downside risks remain high. Prolonged trade disputes could have significant spillovers, including through weaker investment and the disruption of production networks. Recent monetary policy shifts have reduced short-term financial pressures, but may further fuel debt accumulation, increasing medium-term risks to financial stability. These persistent macroeconomic risks are compounded by greater frequency and intensity of natural disasters, reflecting the rising effects of climate change.

In the face of these multifaceted challenges, tackling the current growth slowdown and placing the world economy on a robust path towards the 2030 Agenda for Sustainable Development require more comprehensive and well-targeted policy responses. This should include a combination of monetary, fiscal and development-oriented measures. A coordinated, multilateral approach to global climate policy, including a price on carbon, is an important element of this policy mix. Increasing use of internal CO₂ prices by the private sector indicates some willingness by firms to adapt to expected policy changes. The deterioration in growth prospects of many countries that are already lagging behind poses additional challenges for sustainable development, especially the goal to universally eradicate poverty by 2030. Future progress on poverty reduction will, to a significant extent, depend on the effective management of ongoing urbanization, particularly in Africa and South Asia.

Growth projections for 2019 have been revised downward in all major developed economies. In the United States, the growth momentum is projected to moderate as headwinds from trade policy are compounded by the waning effects of fiscal stimulus. In Europe, while the effects of auto production disruptions are expected to dissipate, economic activity will be dampened by weaker confidence, softer external demand and prolonged uncertainty surrounding Brexit developments. In Japan, weak external demand has weighed on investment in the manufacturing sector, while household consumption remains sluggish.

The growth outlook for many developing economies has also weakened. Southern Africa, Western Asia and Latin America and the Caribbean have seen particularly large downward revisions for growth in 2019. The weaker prospects for Southern Africa are attributable to the devastation caused by cyclone Idai, coupled with a subdued outlook for South Africa's economy, which is severely hampered by power shortages. In Western Asia, growth in Saudi Arabia is projected to slow amid oil production cuts, while Turkey will only gradually emerge from recession, following a sharp contraction in domestic demand in the second half of 2018. The downward revision of the outlook for Latin America and the Caribbean reflects weaker-than-expected activity in the region's largest economies—Argentina, Brazil and Mexico—and a further severe contraction in the Bolivarian Republic of Venezuela. In contrast, growth prospects remain favourable in other developing regions, most notably East Africa and East Asia. In China, recent policy stimulus measures will largely offset the adverse effects from trade tensions. Despite downward revisions, growth in India remains strong amid robust domestic demand. ECONOMIC OUTLOOK OF INDIA

As the world's third largest economy in purchasing parity terms, India aspires to better the lives of all its citizens and become a high-middle income country by 2030. Between 2011-15, more than 90 million people escaped extreme poverty and improved their living standards thanks to robust economic growth. However, India's growth rate has decelerated in the past two years.

In recent years, the country has made a significant dent in poverty levels, with extreme poverty dropping from 46 percent to an estimated 13.4 percent over the two decades before 2015. While India is still home to 176 million poor people, it is seeking to achieve better growth, as well as to promote inclusion and sustainability by reshaping policy approaches to human development, social protection, financial inclusion, rural transformation, and infrastructure development.

While the country's development trajectory is strong, challenges remain. Economic performance has been strong, but development has been uneven, with the gains of economic progress and access to opportunities differing between population groups and geographic areas. Implementation challenges of indirect tax reforms, stress in the rural economy and a high youth unemployment rate in urban areas may have moderated the pace of poverty reduction since 2015. Despite regulatory improvements to spur competitiveness, levels of private investment and exports continue to be relatively low, undermining prospects for longer term growth. The country's human development indicators – ranging from education outcomes to a low and declining rate of female labor force participation - underscore its substantial development needs.

India's ability to achieve rapid, sustainable development will have profound implications for the world. India's success will be central to the world's collective ambition of ending extreme poverty and promoting shared prosperity, as well as for achieving the 2030 Sustainable Development Goals (SDGs). Indeed, the world will be only able to eliminate poverty if India succeeds in lifting its citizens above the poverty line.

For international trade and the health of the global economy too, India's growth will be ever more important. Growth is projected to be 6.0 percent this fiscal year and expected to rise to 6.9 percent in 2020/21 and to 7.2 percent in the following year. In addition, the carbon footprint India leaves as it propels its high growth will have a significant influence on the planet's ability to keep global warming within the 2-degree threshold.

Cospower Engineering Limited

On crucial issues ranging from managing scarce water resources, to modernizing food systems, to improving rural livelihoods, to ensuring that megacities become engines of sustainable economic growth and inclusion, India’s development trajectory will have a major influence on the rest of the world.

At the same time, India’s growing economic and political stature and the relevance of its experience, know-how and investments for the development efforts of other nations well-position the country to play a greater leadership role in the global arena.

India continues to remain the fastest growing major economy in the world in 2018- 19, despite a slight moderation in its GDP growth from 7.2 per cent in 2017-18 to 6.8 per cent in 2018-19. On the other hand, the world output growth declined from 3.8 per cent in 2017 to 3.6 per cent in 2018. The slowdown in the world economy and Emerging Market and Developing Economies (EMDEs) in 2018 followed the escalation of US China trade tensions, tighter credit policies in China, and financial tightening alongside the normalization of monetary policy in the larger advanced economies. In 2019, when the world economy and EMDEs are projected to slow down by 0.3 and 0.1 percentage points respectively, growth of Indian economy is forecast to increase. (Source: <https://www.worldbank.org/en/country/india/overview#1>)

Growth rate of real GDP (per cent):

India is the seventh largest economy in terms of Gross Domestic Product (GDP) in current US\$ and has emerged as the fastest growing major economy. The average growth rate of India was not only higher than China’s during 2014-15 to 2017-18 but much higher than that of other top major economies (measured in terms of GDP at current US\$ terms) as well. With Purchasing Power Parity (PPP) adjustments, India’s GDP at current international dollar, ranks third in the world.

The contribution of the Indian economy to the GDP of EMDEs and world economy has increased consistently over the years. In a span of less than a decade, India’s contribution to EMDEs GDP has increased by around 1.3 percentage points and to the world economy by around 0.7 percentage points. India’s share in GDP of EMDEs stood at 8 per cent in 2018. As per the WEO, April 2019 of IMF, going forward, the growth of world economy will be bolstered mainly by growth in China and India and their increasing weights in world income. In EMDEs group, India and China are the major drivers of growth. The global economy—in particular the global growth powerhouse, China—is rebalancing, leading to an increasing role for India. Hence, India’s contribution has become much more valuable to the global economy.

India’s share in GDP of EMDEs and World (per cent)

Outlook of the Economy

The year 2019-20 has delivered a huge political mandate for the government, which augurs well for the prospects of high economic growth. Real GDP growth for the year 2019-20 is projected at 7 per cent, reflecting a recovery in the economy after a deceleration in the growth momentum throughout 2018-19. The growth in the economy is expected to pick up in 2019-20 as macroeconomic conditions continue to be stable while structural reforms initiated in the previous few years are continuing on course. However, both downside risks and upside prospects persist in 2019-20.

Investment rate, which was declining from 2011-12 seems to have bottomed out. It is expected to pick up further in the year 2019-20 on the back of higher credit growth and improved demand. The political stability in the country should push the animal spirits of the economy, while the higher capacity utilization and uptick in business expectations should increase investment activity in 2019-20.

The oil prices increased in 2018-19 by around 14 \$/bbl. However, oil prices are expected to decline in 2019-20 from the current level (based on the oil futures price for 2019-20). This should provide a positive push to consumption.

Prospects of export growth remain weak for 2019-20 if status quo is maintained. However, reorientation of export policies to target countries/markets based on our own relative comparative advantage and the importing country's exposure to Indian goods can foster export performance. Under status quo, the outlook for the global economy is bleak in 2019, with most of the countries projected to slow down. Power is one of the most critical components of infrastructure crucial for the economic growth and welfare of nations. The existence and development of adequate infrastructure is essential for sustained growth of the Indian economy.

India's power sector is one of the most diversified in the world. Sources of power generation range from conventional sources such as coal, lignite, natural gas, oil, hydro and nuclear power to viable non-conventional sources such as wind, solar, and agricultural and domestic waste. Electricity demand in the country has increased rapidly and is expected to rise further in the years to come. In order to meet the increasing demand for electricity in the country, massive addition to the installed generating capacity is required.

In May 2018, India ranked 4th in the Asia Pacific region out of 25 nations on an index that measures their overall power.

RECENT TURNOVER

For the Fiscal year ended as at September 30, 2019, March 31, 2018 and March 31, 2017 our gross revenues stood at 506.92 Lakhs, 1006.89 Lakhs and 1,010.71 lakhs respectively. Further, our PAT (Profit after Tax) for the Fiscal year ended on as at February 28, 2018, March 31, 2017 and March 31, 2016 were 161.87 Lakhs, 63.87 Lakhs and 32.35 Lakhs respectively.

MARKET SIZE

Indian power sector is undergoing a significant change that has redefined the industry outlook. Sustained economic growth continues to drive electricity demand in India. The Government of India's focus on attaining 'Power for all' has accelerated capacity addition in the country. At the same time, the competitive intensity is increasing at both the market and supply sides (fuel, logistics, finances, and manpower).

Total installed capacity of power stations in India stood at 356.82 Gigawatt (GW) as of May 2019.

ACHIEVEMENTS

Following are the achievements of the government in the past four years:

- India's rank jumped to 24 in 2018 from 137 in 2014 on World Bank's Ease of doing business - "Getting Electricity" ranking.
- Energy deficit reduced to 0.7 per cent in FY18 from 4.2 per cent in FY14.
- As of April 28, 2018, 100 per cent village electrification achieved under DeenDayal Upadhyaya Gram Jyoti Yojana (DDUGJY).

GOVERNMENT INITIATIVES

The Government of India has identified power sector as a key sector of focus so as to promote sustained industrial growth. Some initiatives by the Government of India to boost the Indian power sector:

- As of September 2018, a draft amendment to Electricity Act, 2003 has been introduced. It discusses separation of content & carriage, direct benefit transfer of subsidy, 24*7 Power supply is an obligation, penalisation on violation of PPA, setting up Smart Meter and Prepaid Meters along with regulations related to the same.
- UjwalDiscoms Assurance Yojana (UDAY) was launched by the Government of India to encourage operational and financial turnaround of State-owned Power Distribution Companies (DISCOMS), with an aim to reduce Aggregate Technical & Commercial (AT&C) losses to 15 per cent by FY19.
- As of August 2018, the Ministry of New and Renewable Energy set solar power tariff caps at Rs 2.50 (US\$ 0.04) and Rs 2.68 (US\$ 0.04) unit for developers using domestic and imported solar cells and modules, respectively.
- The Government of India approved National Policy on Biofuels – 2018, the expected benefits of this policy are health benefits, cleaner environment, employment generation, reduced import dependency, boost to infrastructural investment in rural areas and additional income to farmers.

THE ROAD AHEAD

The Government of India has released its roadmap to achieve 175 GW capacity in renewable energy by 2022, which includes 100 GW of solar power and 60 GW of wind power. The Union Government of India is preparing a 'rent a roof' policy for supporting its target of generating 40 gigawatts (GW) of power through solar rooftop projects by 2022.

Coal-based power generation capacity in India, which currently stands at 191.09 (As of May 2019) GW is expected to reach 330-441 GW by 2040.

India could become the world's first country to use LEDs for all lighting needs by 2019, thereby saving Rs 40,000 crore (US\$ 6.23 billion) on an annual basis.

All the states and union territories of India are on board to fulfil the Government of India's vision of ensuring 24x7 affordable and quality power for all by March 2019, as per the Ministry of Power and New & Renewable Energy, Government of India.

REPORTS

India has the fifth largest power generation capacity in the world. The country ranks third globally in terms of electricity production. Our manufacturing process

Cospower Engineering Limited

Our machines are equipped with complete machinery for fabrication, assembly and updated testing facilities of electrical panels to ensure that the end product is of a highest quality level. We have and may have dedicated production lines based on the size and frequency of the orders of our customers.

The production process may be diagrammatically explained in the following manner:

Autocad Drawings

Assembly of components

Busbars work

Busbars work

Control wiring

Control wiring

Finishing

Routine Testing

Packing and Dispatch

The process undergone in the manufacturing is briefly described hereunder:

Design and fabrication: The manufacturing process begins with fabrication of panel. This is done as per the designs done by our design department. All drawings are vetted by the engineering department. Along with the drawings we have initiate the procurement of raw materials so that materials are available to start the assembly work as soon as the panels are fabricated and powder coated.

Assembly of components : All the components of the panels are purchased from reputed suppliers. Raw materials are procured by our project department based on the bill of materials and the specification of the materials. We have a proper vendor development procedure to ensure that materials are procured from the most reliable source and at competitive prices prevailing in the market. All the components are assembled in the panel as per the drawings. Every component that are used in the assembly have distinctive numbers which are recorded in the job card to maintain a proper history of the production process and the end product. Besides, components like Ammeter, Voltmeter, Multi-functional meters, relays, LED lamps, pushbuttons etc. are fitted on the doors of the panels. The alignment of the components assembled is closely supervise by the supervisors to maintain a proper aesthetic look and also enable ease in power and control connection.

Power Connections :The next process is the power connection which are done through aluminium or copper busbars. Busbars are actually flat strips of sizes based on the current rating of the panels. These are specified in the bill of materials. Busbar size selection are done on specially designed software to eliminate any errors in calculations. The busbars are used for making inter connections between electrical components as per the drawing.

This work involves cutting, drilling or punching and bending processes which are done on our hydraulic machines and drilling machines. These finished busbars are provided with heat shrinkable sleeves for insulation. All the busbars are supported to the panels sturdily through epoxy insulators that are tailor made for our panels. Also, connections are made through power cables wherever providing busbars are not feasible. This involves cutting of cables and crimping of cables lugs on both ends. Crimping is done on pneumatic or hydraulic crimping machine. This is a very important activity as the connection of lug has to be just adequate i.e. neither loose nor too tight as both can lead to adverse performance of the panels. For critical application we also use fiber glass insulation cables which has superior features compared to normal cables. The assembly of the complete panels is an important aspect of production as the panels are at times subjected to short circuit forces during operation which the panels should be able to withstand.

Control wiring : The next process is control wiring of the entire panel. This is done as per the electrical diagram approved by the engineering department. The cables are procured from reputed manufacturers. The cross section of the cables are as per sizes given in the bill of materials made by the design department and approved by the engineering department. Every control cable is fitted with identification ferrules which are made in the ferrule printing machine. Finally, the lugs are crimped to the cables for connecting the same to the components. Cables are routed through cable trunk and neatly dressed to give a good aesthetic look.

Finishing: In the next process the panels are thoroughly cleaned and the necessary labels, rating plate, danger plate and our company's logo are affixed on the panel doors. Each final product is provided with a distinctive serial number.

Routine Testing: The panels are tested by the quality control department based on the prescribed quality check document. This document also includes random test for workmanship which are very stringent norm. No failure is permitted and if there is even one failure then the entire panel is rejected by the quality control department.

Packing and Dispatch: The panels are then packed. During packing activity, all care is taken that the components fitted on the doors is protected with good packing materials. All necessary supports are provided while loading the finished panels such that the panels reaches its destination safely.

Infrastructure facilities

Raw materials

The major raw materials required to carry the manufacturing activities are CRCA Sheet, MS structures, capacitors, reactors, LT switchgears, LED lamps, pushbuttons, ammeter, voltmeter, multifunctional meter, panel accessories etc. are available locally through distributors and manufactures.

The main utilities required for our manufacturing activities are:

Power: The requirement of power for our operations is met through Maharashtra State Electricity Distribution Board Ltd.

Electricity	Consumer No.	Sanction Load	Unit of Measurement
MSEDCL	002113879109	27	KWA

Fuel: There is no requirement of any hazardous fuel for manufacturing our products. However, fuel is required only for the Generators, which is sourced from the local source available nearby.

Water: Water required for the manufacturing and allied process is procured through the existing water supply network in that area.

Effluent Treatment: Our Company does not generate any industrial effluents which is hazardous to the environment.

Competition

We operate in an increasingly high competitive market, with participants in the organized and the unorganized sector. We face competition from other manufacturers, traders, suppliers and importers of electric equipment in relation to our offerings. Suppliers in the electric equipment industry are based on key attributes including technical competence, product quality, strength of sales and distribution network, pricing and timely delivery. While our competitors in the organized sector focus more on technology and quality of their products, their unorganized counterparts supply their products at extremely competitive prices, which we may be unable to effectively compete with. For instance, we face competition from electric equipment of Chinese origin, primarily in the switchgear and panels verticals, which have gained significant presence in the Indian electric equipment market and which may be sold at more competitive prices than what we offer.

Quality control, certifications and accreditations

In the precision components manufacturing industry, adherence to quality standards is a critical factor as any defects in any of the products manufactured by us, or failure to comply with the design specifications of our customers, may lead to cancellation of the purchase order placed by our customers and further loss of reputation. In order to maintain the quality standards and comply with the design specifications provided by our customers, we follow a stringent quality control mechanism. At each stage of the manufacturing process, the components are checked by our operators, to ensure there is no defect from the previous stage operator.

As a result of our quality assurance efforts over the years, our manufacturing unit has received ISO 14001:2015, ISO 9001:2015 and ISO 45001:2018 respectively for design, manufacturing, supply, commissioning and consultancy for electrical and mechanical equipment and Manufacturing of high/ low voltage electrical panels.

The Competition Act prohibits anti competitive agreements, abuse of dominant positions by enterprises and regulates "combinations" in India. The Competition Act also established the Competition Commission of India (the "CCI") as the authority mandated to implement the Competition Act. The provisions of the Competition Act relating to combinations were notified on March 4, 2011 and have come into effect on June 1, 2011. There are also different thresholds for those categorized as 'Individuals' and 'Group'. The CCI may enquire into all combinations, even if taking place outside India, or between parties outside India, if such combination is likely to have an appreciable adverse effect on competition in India. Effective June 1, 2011, all combinations have to be notified to the CCI within 30 days of the execution of any agreement or other document for any acquisition of assets, shares, voting rights or control of an enterprise under Section 5(a) and (b) of the Competition Act (including any binding document conveying an agreement or decision to acquire control, shares, voting rights or assets of an enterprise); or the board of directors of a company (or an equivalent authority in case of other entities) approving a proposal for a merger or amalgamation under Section 5(c) of the Competition Act. B. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

1. BASIS OF PREPARATION OF FINANCIAL STATEMENTS

The Restated Statement of Assets and Liabilities of the Company as on December 31, 2019, March 31, 2019, March 31, 2018 and March 31, 2017, and the Restated Statement of Profit and Loss and Restated Statements of Cash Flows for the period ended on December 31, 2019 and for the year ended on March 31, 2019, March 31, 2018 and March 31, 2017 and the annexure thereto (collectively, the "**Restated Financial Statements**" or "**Restated Summary Statements**") have been extracted by the management from the Audited Financial Statements of the Company for the period ended December 31, 2019 and for the year ended March 31, 2019, March 31, 2018 and March 31, 2017.

The financial statements are prepared and presented under the historical cost convention and evaluated on a going-concern basis using the accrual system of accounting in accordance with the accounting principles generally accepted in India (Indian GAAP) and the requirements of the Companies Act, including the Accounting Standards as prescribed by the Companies (Accounting Standards) Rules, 2014 as per section 133 of the Companies Act, 2013.

2. USE OF ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles ('GAAP') in India requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities on the date of the financial statements, and the reported amount of revenue and expenses during the reporting period. The estimates and assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements which in management's opinion are prudent and reasonable. Actual results may differ from the estimates used in preparing the accompanying financial statements. Any revision to accounting estimates is recognized prospectively in current and future periods.

3. FIXED ASSETS

Fixed assets are stated at historical cost less accumulated depreciation and impairment losses. Cost includes purchase price and all other attributable cost to bring the assets to its working condition for the intended use.

Subsequent expenditures related to an item of tangible asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

4. DEPRECIATION

Depreciation is provided on a straight line basis over the useful lives of assets, which is as stated in Schedule II of the Companies Act 2013 or based on technical estimation made by the Company. The details of estimated life for each category of assets are as under:

Category of assets	Estimated Life (Yrs)
Computer	3
Motor Cars	8
Office Equipment's	5
Plant & Machinery	15
Furniture & Fixtures	10
Leasehold Improvements	20

Depreciation and amortization methods, useful lives and residual values are reviewed at each reporting date.

5. BORROWING COSTS

Borrowing costs attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for intended use. All other borrowing costs are recognized as an expense in the period in which they are incurred. Capitalization of borrowing costs is suspended during the extended period in which active development is interrupted. Capitalization of borrowing costs is ceased when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete. Other borrowing costs are charged to statement of profit and loss as and when incurred.

6. IMPAIRMENT OF ASSETS

In accordance with AS 28 on 'Impairment of assets' as prescribed in the Companies (Accounting Standards) Rules, 2006, the Company assesses at each balance sheet date, whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. The recoverable amount of the assets (or where applicable that of the cash generating unit to which the asset belongs) is estimated as the higher of its net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of the assets and from its disposal at the end of its useful life. An impairment loss is recognized whenever the carrying amount of an asset or the cash-generating unit to which it belongs, exceeds its recoverable amount. Impairment loss is recognized in the statement of profit and loss or against revaluation surplus, where applicable. If at the balance sheet date, there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is re-assessed and the asset is reflected at the recoverable amount subject to a maximum of the depreciated historical cost.

7. INVESTMENTS

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

8. INVENTORIES

Inventories of finished goods are valued at cost or net realizable value, whichever is lower. Cost of finished goods includes purchase cost, cost incurred in bringing the inventories to their present location and condition, excise duty etc.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs necessary to make the sale.

9. CURRENT/NON CURRENT CLASSIFICATIONS

The Schedule III to the Act requires assets and liabilities to be classified as either Current or Non-current. An asset is classified as current when it satisfies any of the following criteria:

- a) it is expected to be realized in, or is intended for sale or consumption in, the entity's normal operating cycle;

- c) it is expected to be realized within twelve months after the balance sheet date; or

(ii) Geographical Segment

The Company operates in one Geographical Segment namely “within India” and hence no separate information for geographic segment wise disclosure is required.

14. ACCOUNTING FOR TAXES ON INCOME

Current Tax

Current tax is determined as the amount of tax payable under the provisions of Income Tax Act, 1961, in respect of taxable income for the year.

Deferred Tax

Deferred income taxes reflect the impact of current year timing difference between taxable income and accounting income for the year and reversal of timing difference of earlier year. Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realized in the future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognized only if there is virtual certainty of realization of such assets. Deferred tax assets are reviewed at each balance sheet date and written down or written up to reflect the amount that is reasonably / virtually certain (as the case may be) to be realized.

15. CONTINGENT LIABILITIES AND PROVISIONS

The Company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources would be required to settle the obligation, the provision is reversed.

Contingent assets are not recognized in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an inflow of economic benefits will arise, the asset and related income are recognized in the period in which the change occurs.

Loss contingencies arising from claims, litigation, assessment, fines, penalties, etc. are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated.

16. EARNINGS PER SHARE:

Basic earnings per share are computed by dividing the net profit for the year attributable to the equity shareholders by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the net profit attributable to the equity shareholders for the year by the weighted average number of equity and dilutive equity equivalent shares outstanding during the year, except where the results would be anti-dilutive.

17. CASH FLOW:

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("FDI") through press notes and press releases. The DIPP, has issued consolidated FDI Policy Circular of 2017 ("FDI Policy 2017"), with effect from April 28, 2017 later amended in January 2018, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 with amendments in January 2018 will be valid until the DIPP issues an updated circular.
