Additional risks and uncertainties not known to us or that we currently believe to be immaterial may also have an adverse effect on our business, results of operations, financial condition and prospects.

If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our cash flows, business, financial condition and results of operations could suffer, the price of our Equity Shares could decline, and you may lose all or part of your investment. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risks where the impact is not quantifiable and hence the same has not been disclosed in such risk factors. Materiality

The Risk factors have been determined and disclosed on the basis of their materiality. The following factors have been considered for determining the materiality:

1. Some events may have material impact quantitatively;
2. Some events may have material impact qualitatively instead of quantitatively;
3. Some events may not be material individually but may be found material collectively;
4. Some events may not be material at present but may be having material impact in future.

INTERNAL RISK FACTORS

1. ***Our Company has been formed specifically for the purpose of acquisition of the business of M/s Quality RO Products (Proprietorship firm of our Promoter) thus we have limited operating history as a Company which may make it difficult for investors to evaluate our historical performance or future prospects.***

Our Company was originally incorporated as a private limited Company under the Companies Act, 2013 with Registrar of Companies, Central Registration Centre through a certificate of incorporation dated September 30, 2021. After incorporation, ccompany has taken-over the running business of Proprietorship firm of our Promoter i.e. M/s Quality RO Products for expansion of the business of Company. We have very limited operating history from which one can evaluate our business, future prospects and viability. Our future revenues and profitability are difficult to estimate and could fluctuate significantly and as a result the price of our Equity Shares may be volatile.

Further our business prospects must be considered in light of the risks and uncertainties in respect of manufacturing of RO Products. The business of manufacturing of RO Products was earlier carried by proprietorship firm which is recently taken

over by our Company, although the proprietorship has placed the growth in past years, and will continue to place by our Company but there is no assurance that this growth will be met successfully in future. We may not be able to increase revenue or maintain profitability on a half year or an annual basis. If this occurs, our results of operations and financial condition will be adversely affected. Our growth exposes us to a wide range of increased risks. It will also place significant demands on our management, financial and other resources and will require us to continuously develop and improve our operational, financial and internal controls.

There can be no assurance that we will be able to successfully pursue our growth strategies, or that pursuing these strategies will provide us the anticipated benefits in terms of growth and profitability. Further, we may be unable to develop adequate systems, infrastructure and technologies, devote sufficient financial resources or develop and attract talent to manage our growth. Our inability to pursue our growth strategies successfully or at all, or an inability to manage our growth, may adversely affect our prospects.

For further details, see the chapter titled “History and Certain Corporate Matters” and “Restated Financial Statements” on page 96 and 118 respectively of the Prospectus.

2. *We rely on suppliers for raw materials for manufacturing of products. In the event of disruption in supply of raw materials, our business, results of operations and financial condition may be adversely affected.*

We rely on suppliers for raw materials. In the event that there are any delays or disruptions in the supply of raw materials from our suppliers, our ability to deliver the products may be affected. Any of our supplier’s failure to adhere to agreed timelines, whether due to their inability to comply with, or obtain, regulatory approvals, or otherwise, may result in delays and disruptions to our sales, increased costs, delayed payments for our products and damage to our reputation leading to an adverse effect on our results of operations. In the event these our suppliers for raw materials cease to be available to us at terms acceptable to us or we experience problems with, or interruptions in, such supplies, and we are unable to find other suppliers to provide similar raw materials on comparable terms and on a timely basis, our operations may be disrupted and our results of operations and financial condition may be adversely affected.

For further details of our business, please refer chapter titled “Business Overview” beginning on Page 78 of this Prospectus.

3. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks of raw materials. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we purchase, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, which could have an adverse impact on our income and cash flows. We estimate our sales based on the demand and requirements and also on the customer specifications.

Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply of raw materials and local transportation. Should our supply of raw materials be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers, or we may not be able to procure raw materials of equal quality or on equally competitive terms, or at all. Such disruption to supply would materially and adversely affect our business, profitability and reputation.

In addition, disruptions to the delivery of raw materials may occur for reasons such as poor handling, transportation bottlenecks, or labour strikes, which could lead to delayed or lost deliveries or damaged products and disrupt supply of these products. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we over-stock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

For further details of our business, please refer chapter titled “Business Overview” beginning on Page 78 of this Prospectus.

4. *Heavy dependence on our Promoter for the continued success of our business through his continuing services, strategic guidance and support.*

We are heavily dependent upon the continued services of our Promoter, along with support of our management team for the continuous success and growth of our organization. Our promoter Mr. Vivek Dholiya is responsible for the execution of our day-to-day business affairs. Also prior to the incorporation and acquisition of the business he was running the same business under his proprietorship concern which have been acquired by our Company. The loss of our Promoter or failure to recruit suitable or comparable replacements could have an adverse effect on our business operations and growth strategies.

For Details of our Promoter, please refer chapter titled “Our Promoter and Promoter Group” beginning on Page 113 of this Prospectus.

5. *Our operating results could be adversely affected by weakening of economic conditions due to previous lock-down in all parts of India and other parts of world & other situation due to pandemic covid-19.*

Our overall performance depends in part on the economic conditions of India. Certain economies have experienced periods of downturn due to the present situation prevailing in India and outside India due to pandemic disease of Covid-19 which impact financial markets, concerns regarding the stability and viability of major financial institutions, declines in gross domestic product, and increases in unemployment and volatility in commodity prices and worldwide stock markets, and excessive government debt. The pandemic disease has adversely affected the business.

Moreover, the instability in the global economy affects countries in different ways, at different times and with varying severity, which makes the impact to our business unforeseeable and indeterminate. Any of these events, as well as a general weakening of, or declining corporate confidence in the global economy, or a curtailment in government or customer spending could delay or decrease our revenues and therefore have a material adverse effect on our business, operating results and financial condition.

6. *The shortage or non-availability of power may adversely affect our manufacturing process and have an adverse impact on our results of operations and financial condition. We are further exposed to fluctuations in the prices of power an inability to pass on increased costs may adversely affect our profitability.*

Our manufacturing process requires substantial amount of power facilities. The quantum and nature of power and fuel requirements of our industry and Company is such that it cannot be supplemented/ augmented by alternative/ independent sources of power supply since it involves significant capital expenditure and per unit cost of electricity produced is very high. We source the power requirements for our manufacturing facilities mainly from state electricity boards. We are exposed to fluctuations in prices of power.

We intend to install solar power project at our manufacturing facility to battle increased electricity costs, for further details, kindly refer to the chapter titled, “Objects of the Issue”, beginning on page 58 of this Prospectus. Although we generally attempt to pass on increases in energy costs to our customers, our ability to do so is dependent upon the rate of increase, competitive pressures and market conditions for our products. Our inability to pass on any increased costs to the customers, may adversely affect our profitability.

7. *We require certain approvals or licenses in the ordinary course of business and the failure to renew, obtain or retain them in a timely manner, or at all, may adversely affect our operations.*

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. Further due to change in constitution from sole proprietorship to Company, the registration on the name of the firm will be transferred or updated on name of our Company. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or seek fresh approvals, from time to time, as and when required in the ordinary course of our business. An inability to obtain or maintain approvals or licenses required for our operations may adversely affect our operations. Also we are in process for applying for Import Export License, Professional Tax and Udyog aadhaar Registration.

For Further details, please see the chapter entitled “Government and other Approvals” on page 157 of this Prospectus.

8. ***We have not yet applied for the registration of our logo. If we fail to obtain trademark registration our brand building efforts may be hampered which might lead to adverse effect on our business.***

Our Company is currently using the logo  which is not yet registered in the name of our Company neither we have made any application for the registration of the trademark with the respective authorities. If we are unable to get the same registered with the trademark authorities then, Our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks in future could have a material adverse effect on our business and goodwill, which in turn could adversely affect our results of operations. Further the domain use by our Company i.e. www.qualityro.in is registered on name of our Promoter Mr. Vivek Dholiya and we have entered into the assignment agreement for use of the domain.

For further details, please refer to chapter titled “Government and Other Approvals” on page 157 of this Prospectus.

9. ***Our Company has acquired sole proprietorship firm of our Promoter I.e. M/s Quality RO Products after its incorporation vide business transfer agreement dated November 02, 2021. Any future acquisition of other businesses could result in operating difficulties, integration issues and other adverse consequences due to our limited past experience in businesses.***

Our Company was originally incorporated on September 30, 2021 as “Quality RO Industries Private Limited” under the provisions of the Companies Act, 2013 with the Registrar of Companies, Central Registration Centre. Subsequently, our Company has acquired the entire business with the assets and liabilities of M/s Quality RO Products, sole proprietorship concern of our Promoter Mr. Vivek Dholiya vide Business Transfer Agreement dated November 02, 2021. Further, our Company was converted into Public Limited Company and consequently name of company was changed from “Quality RO Industries Private Limited” to “Quality RO Industries Limited” vide Special resolution passed by the Shareholders at the Extra-Ordinary General Meeting held on November 29, 2021 and a fresh certificate of incorporation dated December 13, 2021 issued by the Registrar of Companies, Ahmedabad. Further, the company has applied or in some cases will apply for the transition or endorsement of the name of the Company on many of the documents, registration, bank account and other documents which are in the name of our Quality RO Products as per the terms of business transfer agreement. Any delay in the said transition may require the company to pay any penalty or refusal from any authority of such transition or endorsement which may affect the financial position and operation of our Company.

Further any future acquisition may not be beneficial to our Company, we may have to pay a certain amount of premium to the outgoing management / shareholders for synergic benefits that we may accrue compared to valuations of those firms / businesses / companies. Our inability to identify suitable acquisition opportunities in the future, or adequately priced acquisitions, entering into agreement with such parties or obtaining the necessary financing to make such acquisitions could adversely affect our future growth.

10. ***Our Industry has been subjected to newly framed rules called Environment (Protection) 115 Amendment Rules, 2021 and IS Standards and we are supposed to comply with those rules and any other rules and regulations that may be framed by the Ministry of Environment, Forest and Climate Change (MoEF & CC).***

Presently the Industry in which we operate and the products which we manufacture are not subjected to any kind of rules and regulations and we are not required to adhere to any specific quality requirements by way of IS standards. However as per directions of the Hon’be Supreme Court of India and the National Green Tribunal, the Central Government in consultation of MoEF & CC have framed Environment (Protection) 115 Amendment Rules, 2021 notified on October 04, 2021 for the regulation on appropriate use of Reverse Osmosis (RO) Based Water Purification System.

In accordance with the Rules, the Bureau of Indian Standards (BIS) have framed IS standards (IS 16240:2015) for RO based Point of Use (PoU) Water Treatment System and for providing Type approval for RO based Water Purifiers. Also as per the said Rules, our industry has been subjected to regulation by Central Pollution Control Board and all the operators falling under these rules are required to comply with them within 18 months of their notification. Although we shall ensure to take all steps to comply with the framed rules and proposed regulations and guidelines, any failure on our part to adhere to them including the quality requirements, within the given time frame, may subject us to regulatory actions and penalties. Also it is possible that our failure to meet the quality requirements may require to direct the concerned authority to close our production in which case the wealth of the shareholders may be adversely affected.

11. Any delay in production at, or shutdown of our manufacturing facilities, could adversely affect our business, results of operations and financial condition.

Our Company is mainly engaged in manufacturing of RO Products which depends on, among other things, the productivity of our labour force, compliance with regulatory requirements and the continued functioning of our manufacturing processes and machinery. Disruptions in our manufacturing activities could delay production or require us to shut down the affected manufacturing facilities. Such an event will result in us being unable to meet with our contractual commitments, which will have an adverse effect on our business, reputation, results of operation and financial condition.

Additionally, any interruption at our manufacturing facilities, including natural or man-made disasters, workforce disruptions, regulatory approval delays, fire or the failure of machinery, could reduce our ability to meet the demand, which could affect our business prospects, results of operations and financial condition.

For details of business, please refer chapter titled “Business Overview” beginning on Page 78 of this Prospectus.

12. We are dependent on a number of our key managerial personnel and other senior management, and the loss of or our inability to retain such persons could adversely affect our cash flows, business, results of operations and financial condition.

Our performance depends largely on the efforts and abilities of our key managerial personnel and other senior management. Their input and experience are invaluable for the development of our business and the operations and the strategic directions taken by us. We cannot assure you that we will be able to retain these key managerial personnel and other senior management or find adequate replacements in timely manner, or at all, should they choose to discontinue their employment with us. We may need a long period of time to hire and train replacement personnel when key managerial personnel and other senior management terminate their employment with us. We believe that competition for qualified managerial personnel with relevant expertise in India is intense due to scarcity of qualified individuals in the industry in which we operate. The retirement or resignation of any of our key managerial personnel may materially and adversely impact our business, results of operations and financial condition.

In addition, we cannot assure you that our relations with our contracted labour shall remain cordial at all times and that contracted labour will not undertake or participate in strikes, work stoppages or other industrial actions in the future. Any labor disruptions may affect our operations, thereby adversely affecting our business, financial condition and results of operations.

15. *We have an outstanding indebtedness which includes secured and unsecured loan, which requires significant cash flows to service and are subject to certain conditions and restrictions in terms of our financing arrangements, which restricts our ability to conduct our business and operations in the manner we desire.*

As on November 30, 2021, our secured and unsecured borrowing were Rs. 52.85 Lakhs which was taken over vide Business Transfer Agreement dated November 02, 2021 entered between our Company and Quality RO Products (Proprietorship firm of our Promoter and Managing Director Mr. Vivek Dholiya). However, the secured loan from financial institutions are yet to transfer on name of our Company as per terms of Business Transfer Agreement. If our Company face any issue for transfer of loan on our name may effect the business operations of our Company.

Further we will continue to incur additional indebtedness in the future. Our level of indebtedness has important consequences to us, such as:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our ability to borrow additional amounts in the future;
- affecting our capital adequacy requirements; and
- Increasing our finance costs.

In the event we breach any financial or other covenants contained in any of our financing arrangements or in the event we had breached any terms in the past which is noticed in the future, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs. 17. *Any increase in interest rates would have an adverse effect on our results of operations and will expose our Company to interest rate risks.*

We are dependent upon the availability of equity, cash balances and debt financing to fund our operations and growth. Any fluctuations in interest rates may directly impact the interest costs of such loans and, in particular, any increase in interest rates could adversely affect our results of operations. Furthermore, our indebtedness means that a material portion of our expected cash flow may be required to be dedicated to the payment of interest on our indebtedness, thereby reducing the funds available to us for use in our general business operations. If interest rates increase, our interest payments will increase and our ability to obtain additional debt and non-fund based facilities could be adversely affected with a concurrent adverse effect on our business, financial condition and results of operations. 19. *If we are not successful in managing our growth, our profitability may decrease and result in adverse impact on our business, results of operations and financial condition.*

A principal component of our strategy is to continuously grow by expanding the size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

The systems, infrastructure and technologies we currently employ may become obsolete or be unable to support our increased size and scale. 30. Information relating to the installed manufacturing capacity of our manufacturing facilities included in this Prospectus are based on various assumptions and estimates and future production and capacity may vary.

Information relating to the installed manufacturing capacity of our facility included in this Prospectus are based on various assumptions and estimates of our management that have been taken into account by our statutory auditor in the calculation of the installed manufacturing capacity of our manufacturing facility. These assumptions and estimates include the standard capacity calculation practice after examining the equipment installed at the facilities, the period during which the manufacturing facility operated in a year/ period, expected operations, availability of raw materials, expected utilization levels, downtime resulting from scheduled maintenance activities, unscheduled breakdowns, as well as expected operational efficiencies. For further information, see “Business Overview” beginning on page 78. Further, the installed capacity, capacity utilization and other related information may not be computed on the basis of any standard methodology that is applicable across the industry and therefore may not be comparable to capacity information that may be computed and presented by other peer companies. 31. We are subject to the risk of failure of, or a material weakness in, our internal control systems.

We are exposed to risks arising from the inadequacy or failure of internal systems or processes, and any actions we may take to mitigate these risks may not be sufficient to ensure an effective internal control environment. The errors may be repeated or compounded before they are discovered and rectified. Our management information systems and internal control procedures may not be able to identify non-compliance or suspicious transactions in a timely manner, or at all. Where internal control weaknesses are identified, our actions may not be sufficient to fully correct such weaknesses. In addition, several of our collection related processes are yet to be fully automated, which may increase the risk that human error, tampering or manipulation will result in losses that may be difficult to detect. As a result, we may incur expenses or suffer monetary losses, which may not be covered by our insurance policies and may result in a material effect on our business, financial condition and results of operations.

32. If there is a change in policies related to tax, duties or other such levies applicable to us, it may affect our results of operations.

We benefit from certain general tax regulations and incentives that accord favorable treatment to certain of our operations as well as for our activities. These tax benefits include income tax deductions and other taxes. For details regarding income tax deductions, please refer to the chapter “Statement of Special Tax Benefits” on page 66 of this Prospectus.

New or revised accounting policies or policies related to tax, duties or other such levies promulgated from time to time by the relevant authorities may significantly affect our results of operations. We cannot assure you that we would continue to be

eligible for such lower tax rates or any other benefits. The reduction or termination of our tax incentives, or non-compliance with the conditions under which such tax incentives are made available, will increase our tax liability and affect our business, prospects, results of operations and financial condition.

33. *Our funds requirements are based on internal management estimates, wherever possible, and have not been appraised by any bank or financial institution. Any increase in the actual deployment of funds may cause an additional burden on our finance plans. We have not entered into definitive agreements to utilize our Issue proceeds.*

The fund requirement mentioned as a part of the Objects of the Issue is based on internal management estimates, wherever possible, and has not been appraised by any bank or financial institution or any external agency. These are based on current conditions and are subject to change in light of changes in external circumstances or costs or in other financial conditions, business strategy, etc. With increase in costs, our actual deployment of funds may exceed our estimates and may cause us an additional burden on our finance plans. As on the date of the Prospectus, we have not entered into any definitive agreements for implementing the Objects of the Issue.

For more information, please refer to “Objects of the Issue” on page 58 of the Prospectus.

34. *Our Company’s management will have flexibility in utilizing the Net Proceeds from the Issue. The deployment of the Net Proceeds from the Issue is not subject to any monitoring by any independent agency.*

Our Company intends to primarily use the Net Proceeds towards capital expenditure, working capital requirement and for general corporate purposes as described in “Objects of the Issue” on page 58 of this Prospectus. In terms of Regulation 262 of the SEBI ICDR Regulations, we are not required to appoint a monitoring agency since the Issue size is not in excess of Rs. 100 crores. The management of our Company will have discretion to use the Net Proceeds from the Issue, and investors will be relying on the judgment of our Company’s management regarding the application of the Net Proceeds from the Issue. Our Company may have to revise its management estimates from time to time and consequently its requirements may change.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and our Promoters or controlling Shareholders will be required to provide an exit opportunity to the Shareholders of our Company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI.

Accordingly, prospective investors in the Issue will need to rely upon our management’s judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue, our business and financial results may suffer.

35. *We have not identified any alternate source of raising the funds mentioned as our “Objects of the Issue”. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

Our Company has not identified any alternate source of funding for our capital expenditure, working capital requirement and for general corporate purposes and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of working capital or may require our Company to borrow funds on unfavorable terms, both of which scenarios may affect the business operation and financial performance of the Company. Also our Company has to borrow funds for purchase of machinery.

For further details of our Object, please refer chapter titled “Object for the Issue” beginning on Page 58 of this Prospectus

36. *The Company is yet to place orders for 100% of the plant & machineries for our proposed object, as specified in the Objects of the Issue. Any delay in placing orders, procurement of plant & machineries may delay our implementation schedule and may also lead to increase in price of these plant & machineries, further affecting our revenue and profitability.*

Although we have identified the type of plant and machineries required to be bought however, we are yet to place orders for 100% of the plant & machinery worth Rs 139.72 lakhs as detailed in the “Objects of the Issue” beginning on page 58 of this Prospectus. These are based on our estimates and on third-party quotations, which are subject to a number of variables, including possible cost overruns, changes in management’s views of the desirability of current plans, change in supplier of plant & machineries, Equipments among others, which may have an adverse effect on our business and results of operations.

Further, we cannot assure that we would be able to procure these plant and machineries, or procure the same within budgeted costs and timelines. Delays in acquisition of the same could result in the cost and time overrun, which would have a material adverse effect on our business, results of operations and financial condition. For further details, please refer to the chapter titled “Objects of the Issue” beginning on page 58 of this Prospectus.

37. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities may differ from those that would apply to a company in another jurisdiction. Investors may have more difficulty in asserting their rights as shareholders in an Indian company than as shareholder of a corporation in another jurisdiction. Shareholders’ rights under Indian law may not be as extensive as shareholders’ rights under the laws of other jurisdictions. Under the Companies Act, prior to issuance of any new equity shares, a public limited company incorporated under Indian law must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain existing ownership, unless such pre-emptive rights are waived by a special resolution by a three-fourths majority of the equity shareholders voting on such resolution. If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document or a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interest in our Company would decline.

38. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “Dividend Policy” on page 117 of this Prospectus.

39. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares has been determined on the basis of the Fixed Price Issue. This price is based on numerous factors. For further information, see “Basis for Issue Price” beginning on page 64 of this Prospectus. This issue price may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

40. *A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.*

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of us. Under the takeover regulations in India, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the Indian takeover regulations.

41. *The average cost of acquisition of Equity Shares by our Promoter could be lower than the Issue Price.*

Our Promoter average cost of acquisition of Equity Shares in our Company is lower than the Issue Price as may be decided by the Company, in consultation with the LM. For further details regarding average cost of acquisition of Equity Shares by our Promoter in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the section “Capital Structure” beginning on page 47 of this Prospectus.

42. *The requirements of being a listed company may strain our resources and distract management.*

We have no experience as a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public that is associated with being a listed company. As a listed company, we will incur additional legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI LODR Regulations which would require us to file audited annual and unaudited semi-annual and limited review reports with respect to our business and financial condition. If we delay making such filings, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

43. *We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.*

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favorable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company’s Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company’s Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company’s major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

44. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE Limited (BSE SME) in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the

Equity Shares on the SME Platform of BSE Limited (BSE SME). Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

45. We have in the last 12 months issued Equity Shares at a price that are at lower than the Issue Price.

In the last 12 months we may have issued fresh Equity Shares of our Company which are as follows: -

- Issue of 10,000 Equity shares of Rs. 10 each at par on Incorporation of our Company dated September 30, 2021
- Preferential issue of Equity Shares in consideration of business acquisition of M/s Quality RO Products dated November 02, 2021 issuing 1,40,000 Equity shares of Rs 10 each at a premium of Rs 72.00 per equity share.
- Right Issue of Equity Shares dated November 26, 2021 issuing 50,000 Equity Shares of Rs.10 each at a premium of Rs 72.00 per equity share
- Bonus Issue of 12,00,000 Equity Shares in ratio 6:1 (six equity Shares for each equity share held) on November 29, 2021.

The Equity Shares allotted to investors pursuant to this Issue may be priced significantly higher due to various reasons including better performance by the Company, better economic conditions and passage of time.

For Further details of equity shares issued, please refer to the section titled “Capital Structure” beginning on page 47 of the Prospectus.

46. We will continue to be controlled by our Promoter and Promoter Group after the listing of the Equity Shares in the Issue.

Upon successful completion of the Issue, our Promoter and Promoter Group will collectively control, directly or indirectly, approximately 60.93% of our outstanding Equity Shares (assuming full subscription to the Issue). As a result, our Promoter and Promoter Group will continue to have the ability to exercise significant control over our Company and all matters requiring shareholder approval, including election of directors, our business strategy and policies, and approval of significant corporate transactions such as mergers and business combinations. The extent of their shareholding in our Company may also have the effect of delaying, preventing or deterring a change in control of our Company, even if such a transaction may be beneficial to the other shareholders. The interests of our Promoter and Promoter Group as controlling shareholders of our Company could be in conflict with the interests of our other shareholders. We cannot assure you that our Promoter and Promoter Group will act to resolve any conflicts of interest in favor of our Company or the other shareholders.

For Further details of Capital Buildup, please refer to the section titled “Capital Structure” beginning on page 47 of the Prospectus.

47. The interests of the Promoters as our controlling shareholder may conflict with the interests of other shareholders.

Under our Articles of Association, the Promoter, by holding a majority of our Equity Share capital may issue directives with respect to the conduct of our business or our affairs, as defined under the Companies Act. The interests of the Promoters may be different from our interests or the interests of other shareholders. As a result, the Promoter may take actions with respect to our business and the businesses of our peers and competitors. In addition, as a result of our controlling ownership by the Promoters, we are required to adhere to certain restrictions with respect to the types of investments we may make using our cash balances, which may restrict us from entering into certain investments providing a higher rate of return. The Promoter will retain control over the decisions requiring adoption by our shareholders and could exercise its powers of control, delay or defer or initiate a change of control of our Company or a change in our capital structure.

48. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months may be subject to capital gains tax in India if Securities Transaction Tax (STT) has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax

in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. In addition, changes in the terms of tax treaties or in their interpretation, as a result of renegotiations or otherwise, may affect the tax treatment of capital gains arising from a sale of Equity Shares

EXTERNAL RISK FACTORS

49. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations and prospects.

Our business and financial performance could be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations applicable to us and our business, including those relating to the Internet and e-commerce, consumer protection and privacy. Such unfavorable changes could decrease demand for our products, increase costs and/or subject us to additional liabilities. Furthermore, the growth and development of e-commerce may result in more stringent consumer protection laws that may impose additional burdens on online businesses generally.

The application of various Indian and international sales, use, occupancy, value-added and other tax laws, rules and regulations to our services and products is subject to interpretation by the applicable taxing authorities. Many of the statutes and regulations that impose these taxes were established before the growth of the Internet, mobile networks and e-commerce. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, particularly with respect to occupancy or value-added or other taxes, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties and, even if we are able to pass on such costs to our customers, such action would decrease the demand for our services and products. As a result, any such changes could have an adverse effect on our business and results of operation. Further, the uncertainty in relation to change of laws, rules and regulations may lead to unpredictability and negatively impact our ability to manage our business prospects.

Separately, unfavorable changes in existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in applicability or implementation of any amendment to, or change in, law, regulation or policy, including due to an absence, or a limited body, of administrative or judicial precedent may be time consuming and costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

50. Recent global economic conditions have been unprecedented and challenging and continue to affect the Indian market, which may adversely affect our business, financial condition, results of operations and prospects.

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general.

There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall. Any persisted or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results.

There are also concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In particular, as China is one of India's major trading partners, there are raising concerns regarding the United States limiting trade and/or imposing a tariff on imports from China and of a possible slowdown in the Chinese economy. Such factors might also result in a slowdown in India's export growth momentum and could materially and adversely affect our operating results and financial performance.

In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have a material adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

Adverse economic developments overseas in countries where we have operations could have a material adverse effect on our business and the trading price of the Equity Shares.

51. *An outbreak of an infectious disease or any other serious public health concerns in India or elsewhere could adversely affect our business.*

The outbreak of an infectious disease in India or elsewhere or any other serious public health concern, such as Covid-19, which is currently having a negative impact on the global economy, financial markets and business activities worldwide, which also turn adversely affect our business. Although, we can give no assurance that a future outbreak of a similar infectious disease or any other serious public health concern will not have a material adverse effect on our business.

Despite precautionary measures for our business, there can be no guarantee that it will not be affected in the future in case of an outbreak of any such contagious disease. If a wide spread of disease has affected the Indian market, we may not be able to cater customers. An outbreak of a disease, whether directly impact our supply or not, may attract negative publicity resulting in declining demand. As a result of these and other factors, any outbreak of disease, or the possibility of an outbreak of disease could adversely affect our business, financial condition and results of operations.

52. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

53. *Our business and activities may be further regulated by the Competition Act and any adverse application or interpretation of the Competition Act could materially and adversely affect our business, financial condition and results of operations.*

The Competition Act seeks to prevent business practices that have or are likely to have an appreciable adverse effect on competition in India and has established the Competition Commission of India (the “CCI”). Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which has or is likely to have an appreciable adverse effect on competition is void and attracts substantial penalties. Any agreement among competitors which, directly or indirectly, determines purchase or sale prices, results in bid rigging or collusive bidding, limits or controls the production, supply or distribution of goods and services, or shares the market or source of production or providing of services by way of allocation of geographical area or type of goods or services or number of customers in the relevant market or in any other similar way, is presumed to have an appreciable adverse effect on competition and shall be void. Further, the Competition Act prohibits the abuse of a dominant position by any enterprise. If it is proven that a breach of the Competition Act committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the breach themselves and may be punished as an individual. If we, or any of our employees are penalized under the Competition Act, our business may be adversely affected. Further, the Competition Act also regulates combinations and requires approval of the CCI for effecting any acquisition of shares, voting rights, assets or control or mergers or amalgamations above the prescribed asset and turnover based thresholds.

On March 4, 2011, the Government of India notified and brought into force new provisions under the Competition Act in relation to combined entities (the “Combination Regulation Provisions”), which came into effect from June 1, 2011. The Combination Regulation Provisions require that any acquisition of shares, voting rights, assets or control or mergers or amalgamations, which cross the prescribed asset and turnover based thresholds, must be notified to and preapproved by the CCI. In addition, on May 11, 2011, the CCI issued the final Competition Commission of India (Procedure in regard to the transaction of business relating to combinations) Regulations, 2011 (as amended). These regulations, as amended, set out the mechanism for the implementation of the Combination Regulation Provisions under the Competition Act.

54. *A significant change in the Government of India's economic liberalization and deregulation policies could adversely affect our business and the price of our Equity Shares.*

The Government of India has traditionally exercised, and continues to exercise, a dominant influence over many aspects of the economy. Unfavourable government policies including those relating to the internet and e-commerce, consumer protection and data-privacy, could adversely affect business and economic conditions in India, and could also affect our ability to implement our strategy and our future financial performance. Since 1991, successive governments, including coalition governments, have pursued policies of economic liberalization, including significantly relaxing restrictions on the private sector and encouraging the development of the Indian financial sector. However, the members of the Government of India and the composition of the coalition in power are subject to change. As a result, it is difficult to predict the economic policies that will be pursued by the Government of India. The rate of economic liberalization could change and specific laws and policies affecting the financial services industry, foreign investment, currency exchange and other matters affecting investment in our securities could change as well. Any significant change in India's economic liberalization and deregulation policies could adversely affect business and economic conditions in India generally and our business in particular.

55. *Companies in India are required to prepare financial statements under the new Indian Accounting Standards. In addition, all income-tax assessee in India will be required to follow the Income Computation and Disclosure Standards.*

The Ministry of Corporate Affairs ("MCA"), Government of India, has through notification dated February 16, 2015 issued the Indian Accounting Standards Rules, 2015 ("Ind AS") which have come into effect from April 1, 2015 and are applicable to companies which fulfill certain conditions. Further, there can be no assurance that the adoption of Ind AS will not affect our reported results of operations or financial condition. Any of these factors relating to the use of Ind AS may adversely affect our financial condition and results of operations.

Further, the Ministry of Finance, Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards ("ICDS"), thereby creating a new framework for computation of taxable income. The ICDS shall apply from the assessment year 2017-2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

56. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which investors may be more familiar with and may consider material to their assessment of our financial condition.*

Our financial statements are prepared and presented in conformity with Indian GAAP. No attempt has been made to reconcile any of the information given in this document to any other principles or to base it on any other standards. Indian GAAP differs in certain significant respects from IFRS, U.S. GAAP and other accounting principles with which prospective investors may be familiar in other countries. If our financial statements were to be prepared in accordance with such other accounting principles, our results of operations, cash flows and financial position may be substantially different. Prospective investors should review the accounting policies applied in the preparation of our financial statements, and consult their own professional advisers for an understanding of the differences between these accounting principles and those with which they may be more familiar.

57. *Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.*

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

GLOBAL OUTLOOK

The global recovery continues but the momentum has weakened, hobbled by the pandemic. Fueled by the highly transmissible Delta variant, the recorded global COVID-19 death toll has risen close to 5 million and health risks abound, holding back a full return to normalcy. Pandemic outbreaks in critical links of global supply chains have resulted in longer-than-expected supply disruptions, further feeding inflation in many countries. Overall, risks to economic prospects have increased, and policy trade-offs have become more complex.

The global economic recovery is continuing, even as the pandemic resurges. The fault lines opened up by COVID-19 are looking more persistent—near-term divergences are expected to leave lasting imprints on medium-term performance. Vaccine access and early policy support are the principal drivers of the gaps. Rapid spread of Delta and the threat of new variants have increased uncertainty about how quickly the pandemic can be overcome. Policy choices have become more difficult, confronting multidimensional challenges—subdued employment growth, rising inflation, food insecurity, the setback to human capital accumulation, and climate change—with limited room to maneuver.

The forecast: The global economy is projected to grow 5.9 percent in 2021 and 4.9 percent in 2022 (0.1 percentage point lower for 2021 than in the July 2021 World Economic Outlook (WEO) Update). The downward revision for 2021 reflects a downgrade for advanced economies—in part due to supply disruptions—and for low-income developing countries, largely due to worsening pandemic dynamics. This is partially offset by stronger near term prospects among some commodity-exporting emerging market and developing economies. Employment is generally expected to continue lagging the recovery in output.

Beyond 2022 global growth is projected to moderate to about 3.3 percent over the medium term. Advanced economy output is forecast to exceed pre-pandemic medium-term projections—largely reflecting sizable anticipated further policy support in the United States that includes measures to increase potential. By contrast, persistent output losses are anticipated for the emerging market and developing economy group due to slower vaccine rollouts and generally less policy support compared to advanced Economies.

The global economic recovery continues amid a resurging pandemic that poses unique policy challenges. Vaccinations have proven effective at mitigating the adverse health impacts of COVID-19. However, unequal access to vaccines, vaccine hesitancy, and higher infectiousness have left many people still susceptible, providing fuel to the pandemic. The marked spread of the Delta variant and the threat of new variants that could undermine vaccine effectiveness make the future path of the pandemic highly.

uncertain. This has implications for the resilience of a recovery already in uncharted territory—characterized by pandemic-induced supply-demand mismatches that could worsen with a more protracted health crisis.

Note: Data as of September 22, 2021. Economy group and regional classifications are those in the *World Economic Outlook*. Other advanced economies in terms of International Organization for Standardization (ISO) country codes are AUS, CAN, CHE, CZE, DNK, GBR, HKG, ISL, ISR, JPN, KOR, MAC, NOR, NZL, SGP, SMR, SWE, and TWN.

Gaps in expected recoveries across economy groups have widened since the July forecast, for instance between advanced economies and low-income developing countries. As recoveries proceed, the risks of derailments and persistent scarring in heavily impacted economies remain so long as the pandemic continues.

Near-Term Recovery Continues while the Pandemic Resurges

GDP growth in the first half of 2021 was broadly in line with expectations: Outturns for first quarter global GDP were stronger than anticipated, reflecting continued adaptation of economic activity to the pandemic and associated restrictions as well as ongoing policy support in many countries. Momentum, however, weakened in the second quarter, weighed down by increasing infections in many emerging market and developing economies and by supply disruptions. Expenditure decompositions are consistent with input shortages contributing to weak investment in the second quarter. Recent high-frequency data are mixed. They suggest that the recovery continues, but with some softening in the third quarter, even while broadening across sectors. Services production is expanding, albeit prone to setbacks.

Figure 1.2. Drivers of Global Growth
(Quarter-over-quarter growth contributions, percentage points)

Supply disruptions are weighing on private investment.

Figure 1.3. Global Activity Indicators
(Three-month moving average, annualized percent change for industrial production; deviations from 50 for PMIs)

Higher-frequency indicators point to softening momentum.

The global growth outlook is revised down for 2021 and is unchanged for 2022. The global economy is projected to grow 5.9 percent in 2021 and 4.9 percent in 2022. The 2021 forecast is revised down 0.1 percentage point relative to the July World Economic Outlook (WEO) Update, reflecting forecast downgrades to the advanced economy and low-income developing countries groups, as discussed below.

Vaccine access remains the principal driver of fault lines in the global recovery, reinforced by the resurgence of the pandemic: Many advanced economies have seen remarkable progress in vaccinations since the April 2021 WEO. By contrast, most emerging market and developing economies have had a much slower rollout, hampered by lack of supply and export restrictions.

- Advanced economies have achieved broad availability of vaccines, with hesitancy (rather than inadequate supply) being the main constraint on further gains. About 58 percent of the population in advanced economies has been fully

vaccinated. By contrast, the rest of the world has starkly lower shares of population that are fully vaccinated against COVID-19, at about 36 percent in emerging market economies and less than 5 percent in low-income developing countries. In these economies, vaccine supply and distribution remain the primary constraints.

- The forecast assumes that some emerging market economies will join advanced economies in gaining broad vaccine access in 2021. Most countries are assumed to acquire broad access by the end of 2022 and some only in 2023. However, it seems likely that vaccinations alone will not be able to completely stamp out SARS-CoV-2 transmission, even though they remain effective against the most adverse health effects of the pandemic (severe illness and death). As a result, hospitalizations and deaths are expected to be brought to low levels everywhere by the end of 2022 through a combination of improved access to vaccines and therapies, combined with more highly targeted and effective precautions. Some countries may be able to reduce adverse public health outcomes sooner than others, depending on country-specific circumstances. The projections are tempered by the possibility of renewed outbreaks, particularly before vaccines become widely available.
- So long as the enormous differences in vaccine access persist, the inequalities in health and economic outcomes will increase, driving further divergences across two blocs of countries: those that can look forward to further normalization later this year (almost all advanced economies); and those that will struggle with the adverse health and economic impacts from resurgent infections. The pressure for booster shots in countries with already-high rates of vaccination could further delay access in others still at early stages of getting first jabs into arms. The continuing wide circulation of the virus, particularly within countries and populations where vaccination rates are low, poses threats to health and economic recoveries everywhere. The World Health Organization is warning that more transmissible and deadly variants—which could escape protection from existing vaccines—are likely to evolve so long as a substantial share of the world population remains unprotected.

Figure 1.4. The Great Vaccination Divide
(Percent of population)

Progress in vaccinations against COVID-19 remains highly unequal across the world.

Differences in policy support across countries also underlay gaps in recovery speeds: Sizable fiscal support continues in advanced economies, while many emerging market economies are reducing policy support this year as policy space shrinks with the duration of the pandemic. Major advanced economy central banks are assumed to leave policy rates unchanged through late 2022 though, in some cases, asset purchases are expected to be scaled back before then—a process already underway, for example, in Australia and Canada. Meanwhile, some emerging market central banks—including in Brazil, Chile, Mexico, and Russia—have shifted to a less accommodative stance over 2021, with tightening expected in more countries over the coming quarters.

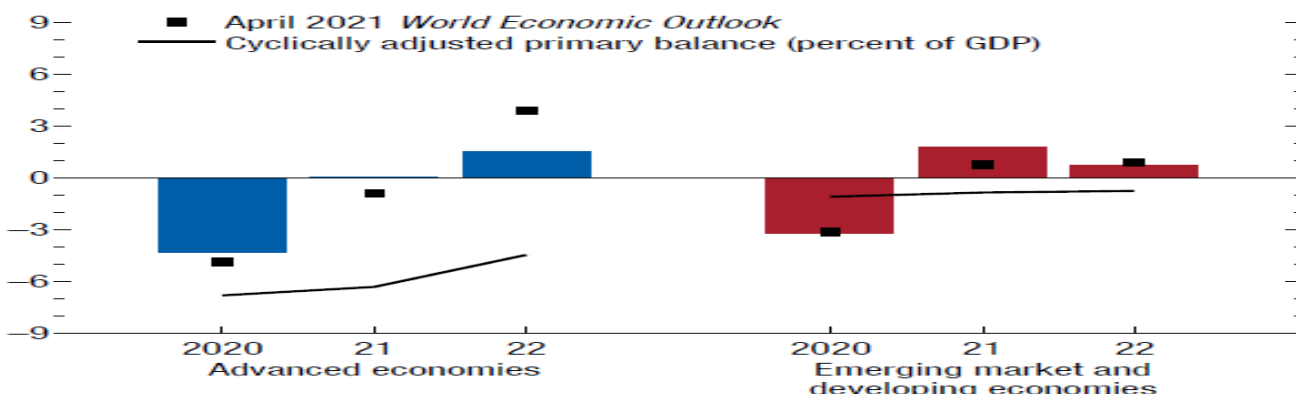

- Policy support has helped create the conditions for a handoff to private demand in the recovery. Where deployed, extensive fiscal measures have provided insurance to households and firms, enabling many to replenish or build up their savings, and creating the conditions for private demand to propel the recovery, particularly in 2022 when the advanced economy group is projected to shift its fiscal stance toward tightening. Indeed, household savings accumulated in excess of the pre-pandemic trend shows a positive relationship vis-a-vis the extent of fiscal support.

- Moreover, there are signs that historically low-saving countries have tended to accumulate greater savings in the wake of the COVID-19 crisis, putting their finances on firmer footing going forward. The forecast assumes a smooth handoff from extraordinary policy support to private activity-led growth, with some of the additional savings buildup retained in places where previous saving rates were low. Demand is assumed to pick up as vaccination coverage rises— given that vaccines seem to protect against severe illness. The speed with which this happens—and excess savings are drawn down—will influence the pace of the recovery and inflationary pressures (if supply is unable to adjust quickly enough).

Figure 1.5. Fiscal Stance, 2020–22
(Change in structural primary fiscal balance, percent of potential GDP)

Fiscal tightening is already under way in emerging market and developing economies and will pick up in advanced economies as well in 2022.

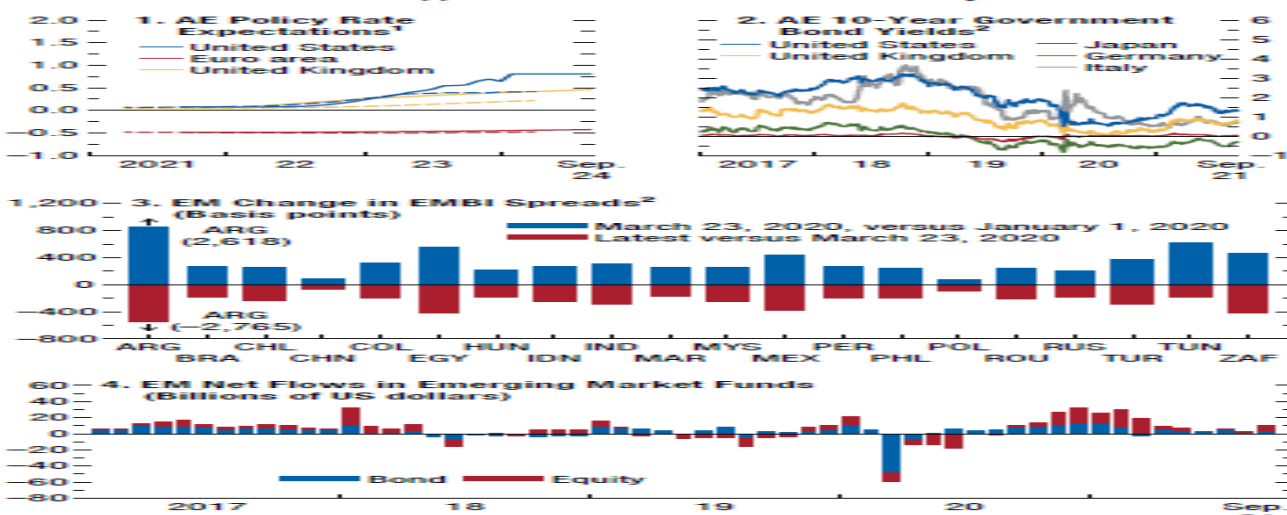

The forecast is predicated on financial conditions remaining supportive. Financial market sentiment has largely stayed attuned to the policy outlook as the recovery has proceeded. However, the high uncertainty around the conjuncture has also led to heightened sensitivity to any news, in particular about inflation prospects in advanced economies. The first quarter of 2021 and a brief period in June saw a bout of financial market volatility, with investors repositioning portfolio holdings as they reassessed the outlook for US inflation and monetary policy. Concerns about the spread of the Delta variant and associated implications for the recovery have also sparked episodes of volatility.

Even so, the overall picture is still one of broadly supportive financial conditions. Equity markets are buoyant, credit spreads remain tight, and net flows to emerging market economies have hitherto been broadly stable (particularly into hard currency bond funds). The global growth forecast is predicated on this support continuing.

Figure 1.6. Monetary and Financial Conditions
(Percent, unless noted otherwise)

Financial conditions are supportive and attuned to the recovery.

Advanced economies: Growth prospects for 2021 are revised down compared to the July forecast, largely reflecting downgrades to the United States (due to large inventory drawdowns in the second quarter, in part reflecting supply disruptions, and softening consumption in the third quarter); Germany (in part because of shortages of key inputs weighing on manufacturing output); and Japan (reflecting the effect of the fourth State of Emergency from July to September as infections hit a record level in the current wave). The US outlook incorporates the infrastructure bill recently passed by the Senate and anticipated legislation to strengthen the social safety net, equivalent to about \$4 trillion in spending over the next 10 years. The baseline also includes expected Next Generation European Union (EU) grants and loans for EU economies. Across advanced economies, an anticipated stronger rebound in the first half of next year, as vaccination proceeds, yields an upward revision to the growth forecast for 2022.

Emerging market and developing economies: The forecast for the group is marked up slightly compared to the July 2021 WEO Update, reflecting upgrades across most regions. China's prospects for 2021 are marked down slightly due to stronger-than-anticipated scaling back of public investment. Outside of China and India, emerging and developing Asia is downgraded slightly as the pandemic has picked up. Growth forecasts in other regions have been revised up slightly for 2021. The revisions in part reflect improved assessments for some commodity exporters outweighing drags from pandemic developments (Latin America and the Caribbean, Middle East and Central Asia, sub-Saharan Africa). Elsewhere, stronger-than-anticipated domestic demand in key regional economies further lifts the 2021 forecast (emerging and developing Europe).

The growth forecast for the low-income developing country group is marked down 0.6 percentage point relative to July, with the continuing slow rollout of vaccines as the main factor weighing on the recovery. IMF staff analysis indicates that low-income developing countries will require close to \$200 billion in spending to combat the pandemic and \$250 billion to regain the convergence paths they were on prior to the pandemic. Labor market prospects for low-skilled workers and youth continue to be relatively bleak compared to other demographic groups, pointing to increasing inequality and higher vulnerability to incomes falling below extreme poverty thresholds within countries in this group. About 65–75 million additional people are estimated to be in extreme poverty in 2021 compared to pre-pandemic projections.

Government Initiatives

The first Union Budget of the third decade of 21st century was presented by Minister for Finance & Corporate Affairs, Ms. Nirmala Sitharaman in the Parliament on February 1, 2020. The budget aimed at energising the Indian economy through a combination of short-term, medium-term and long-term measures.

In the Union Budget 2021-22, capital expenditure for FY22 is likely to increase by 34.5% at Rs. 5.5 lakh crore (US\$ 75.81 billion) over FY21 (BE) to boost the economy.

Increased government expenditure is expected to attract private investments, with production-linked incentive scheme providing excellent opportunities. Consistently proactive, graded and measured policy support is anticipated to boost the Indian economy.

In September 2021, Prime Minister Mr. Narendra Modi approved the production-linked incentive (PLI) scheme in the textiles sector—for man-made fibre (MMF) apparel, MMF fabrics and 10 segments/products of technical textiles—at an estimated outlay of Rs. 10,683 crore (US\$ 1.45 billion).

In September 2021, the government approved a production-linked incentive (PLI) scheme for automobile and drone industries with an outlay of Rs. 26,058 crore (US\$ 3.54 billion) to boost the country's manufacturing capabilities.

In September 2021, Union Cabinet approved major reforms in the telecom sector, which is expected to boost employment, growth, competition and consumer interests. Key reforms include rationalisation of adjusted gross revenue, rationalisation of bank guarantees (BGs) and encouragement to spectrum sharing.

In September 2021, the government announced plans to release Rs. 56,027 crore (US\$ 7.62 billion) under various export promotion schemes to boost exports.

In August 2021, the Indian government approved Deep Ocean Mission (DOM) with a budget outlay of Rs. 4,077 crore (US\$ 553.82 million) over the next five years.

In May 2021, the government approved the production linked incentive (PLI) scheme for manufacturing advanced chemistry cell (ACC) batteries at an estimated outlay of Rs. 18,100 crore (US\$ 2.44 billion); this move is expected to attract domestic and foreign investments worth Rs. 45,000 crore (US\$ 6.07 billion).

The Union Cabinet approved the production linked incentive (PLI) scheme for white goods (air conditioners and LED lights) with a budgetary outlay of Rs. 6,238 crore (US\$ 848.96 million) and the 'National Programme on High Efficiency Solar PV (Photo Voltic) Modules' with an outlay of Rs. 4,500 crore (US\$ 612.43 million).

In June 2021, the RBI (Reserve Bank of India) announced that the investment limit for FPI (foreign portfolio investors) in the State Development Loans (SDLs) and government securities (G-secs) would persist unaffected at 2% and 6%, respectively, in FY22.

To boost the overall audit quality, transparency and add value to businesses, in April 2021, the RBI issued a notice on new norms to appoint statutory and central auditors for commercial banks, large urban co-operatives and large non-banks and housing finance firms.

In May 2021, the Government of India has allocated Rs. 2,250 crore (US\$ 306.80 million) for development of the horticulture sector in 2021-22.

In November 2020, the Government of India announced Rs. 2.65 lakh crore (US\$ 36 billion) stimulus package to generate job opportunities and provide liquidity support to various sectors such as tourism, aviation, construction and housing. Also, India's cabinet approved the production-linked incentives (PLI) scheme to provide ~Rs. 2 trillion (US\$ 27 billion) over five years to create jobs and boost production in the country.

Numerous foreign companies are setting up their facilities in India on account of various Government initiatives like Make in India and Digital India. Mr. Narendra Modi, Prime Minister of India, launched Make in India initiative with an aim to boost country's manufacturing sector and increase purchasing power of an average Indian consumer, which would further drive demand and spur development, thus benefiting investors. The Government of India, under its Make in India initiative, is trying to boost the contribution made by the manufacturing sector with an aim to take it to 25% of the GDP from the current 17%. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy.

Some of the recent initiatives and developments undertaken by the Government are listed below:

- By November 1, 2021, India and the United Kingdom hope to begin negotiations on a free trade agreement. The proposed FTA between these two countries is likely to unlock business opportunities and generate jobs. Both sides have renewed their commitment to boost trade in a manner that benefits all.
- In August 2021, NITI Aayog and Cisco collaborated to encourage women's entrepreneurship in India.

Manufacturing Industry in India

Introduction

Manufacturing has emerged as one of the high growth sectors in India. Prime Minister of India, Mr Narendra Modi, launched the 'Make in India' program to place India on the world map as a manufacturing hub and give global recognition to the Indian economy. Government aims to create 100 million new jobs in the sector by 2022.

Market Size

India's gross domestic product (GDP) at current prices stood at Rs. 51.23 lakh crore (US\$ 694.93 billion) in the first quarter of FY22, as per the provisional estimates of gross domestic product for the first quarter of 2021-22. The manufacturing GVA at current prices was estimated at US\$ 97.41 billion in the first quarter of FY22.

India has potential to become a global manufacturing hub and by 2030, it can add more than US\$ 500 billion annually to the global economy.

The IHS Markit India Manufacturing Purchasing Managers' Index (PMI) stood at 53.7 in September 2021.

As per the survey conducted by the Federation of Indian Chambers of Commerce and Industry (FICCI), capacity utilisation in India's manufacturing sector stood at 72.0% in the second quarter of FY22, indicating significant recovery in the sector.

Road Ahead

India is an attractive hub for foreign investments in the manufacturing sector. Several mobile phone, luxury and automobile brands, among others, have set up or are looking to establish their manufacturing bases in the country.

The manufacturing sector of India has the potential to reach US\$ 1 trillion by 2025. The implementation of the Goods and Services Tax (GST) will make India a common market with a GDP of US\$ 2.5 trillion along with a population of 1.32 billion people, which will be a big draw for investors. The Indian Cellular and Electronics Association (ICEA) predicts that India has the potential to scale up its cumulative laptop and tablet manufacturing capacity to US\$ 100 billion by 2025 through policy interventions.

With impetus on developing industrial corridors and smart cities, the Government aims to ensure holistic development of the nation. The corridors would further assist in integrating, monitoring and developing a conducive environment for the industrial development and will promote advance practices in manufacturing.

OUR COMPANY OPERATIONS

1. Manufacturing of Water softener equipment:

Our company is engaged in the business of manufacturing spun filter cartridge (also commonly known as pp spun filter cartridge, spun polypropylene filter cartridge, spun water filter cartridge, spun sediment filter) which is a depth-filter cartridge with a 100% high purity polypropylene filter media. It has long on-stream life and broad chemical compatibility.

Quality RO spun filter cartridges are widely used as a pre-filter or final filter for industrial, such as spun filters for reverse-osmosis, pp spun filters for process water & groundwater remediation, poly spun filter cartridges for chemical process, pharmaceutical, and other applications. Our spun filter cartridges range from 0.5 to 120 microns with lengths from 5" to 40". For manufacturing, we procure polypropylene raw materials and manufacture various types of softener equipment such as filter parts, premium filter cartridges, taps, membrane housing etc.

Polypropylene (PP) is the most common media in the manufacturing process. Compared to pleated filters, they have a limited surface area and not have a wide chemical compatibility or operating temperature with wound filters, but they have the advantage of depth filtration. Spun filter cartridges can be used either as a pre-filter or final filter for industrial, chemical process, pharmaceutical, food/beverage, cosmetics, water, and other applications.

2. Contract Manufacturing:

Our company is also engaged in contractual manufacturing based on die casting. During the die casting process, molten metal is forced into a mould cavity under high pressure. The moulds, also called dies, are made from non-ferrous metals such as zinc and aluminium. Manufacturers generally use die casting for high-volume production, especially for small to mid-sized castings. Die cast parts are ubiquitous, from everyday consumer objects such as sink faucets and steering wheels to industrial parts such as pneumatic nailers.

3. Trading of RO equipment spares and associated products:

As a trader, our company is a reseller of RO equipment and spares. We purchase these items from wholesalers and resell it to smaller-sized businesses. At the moment, our trading segment is more focused on the B2B model.

4. Contractual Logistics to local infrastructure and manufacturing companies:

Our company is also engaged in contractual logistics services to local infrastructure and manufacturing companies. OUR PRODUCTS

Products	Description
1. Membrane Housing 	Membrane housing is a pressure vessel for loading membrane elements in a reverse osmosis water treatment system. Currently, there are three types of membrane housings with different materials for water treatment on the market: FRP (fiberglass reinforce plastic), stainless steel and PVC. However, in recent years, more and more reverse osmosis water treatment systems have chosen to use FRP membrane housing. This is because the FRP membrane housing has a strong advantage in terms of pressure bearing capacity, design size, material properties and operating temperature compared to stainless steel and PVC membrane shells. Our company manufacture member housing from Polypropylene and its weight range from 265 to 300 gm.
2. Kent Tap 	Kent Tap is used as water dispenser for domestic reverse osmosis plant. This tap comes in weight of 30 gm and is made up of Polypropylene material. It is available in different colors like White, Blue, Green, Pink and Black.
3. PP Spun Filter Cartridge 	Spun filters are manufactured through a process that thermally bonds pure Polypropylene microfibers with lower density at the outside surface and progressively higher density toward the center. The all-propylene construction provides excellent thermal & chemical compatibility with high & low pH chemicals. Also, the graded density design efficiently captures contaminants throughout the media matrix resulting in excellent contaminant holding capacity, increased lifetime & low pressure drop. Spun Bonded Cartridges can be used either as a pre-filter or final filter for industrial, chemical process, pharmaceutical, food/beverage, cosmetics, water and other applications. These Filters Spun cartridges are available in a wide range of lengths ranging from 5 inch to 40 inch and micron sizes from 90 to 900 gm.
4. RO Bowl 	RO Bowl is a Pre filter housing unit installed in RO water purifier. This is used to pre-filter water so that the life of RO machine can be enhanced. The contaminated water gets filtered first in this bowl and after that goes to water purifier. It clears all the physical impurities from the raw water and also reduces the chances of damage to RO Membrane. Its weight range between 340 to 360 gm.

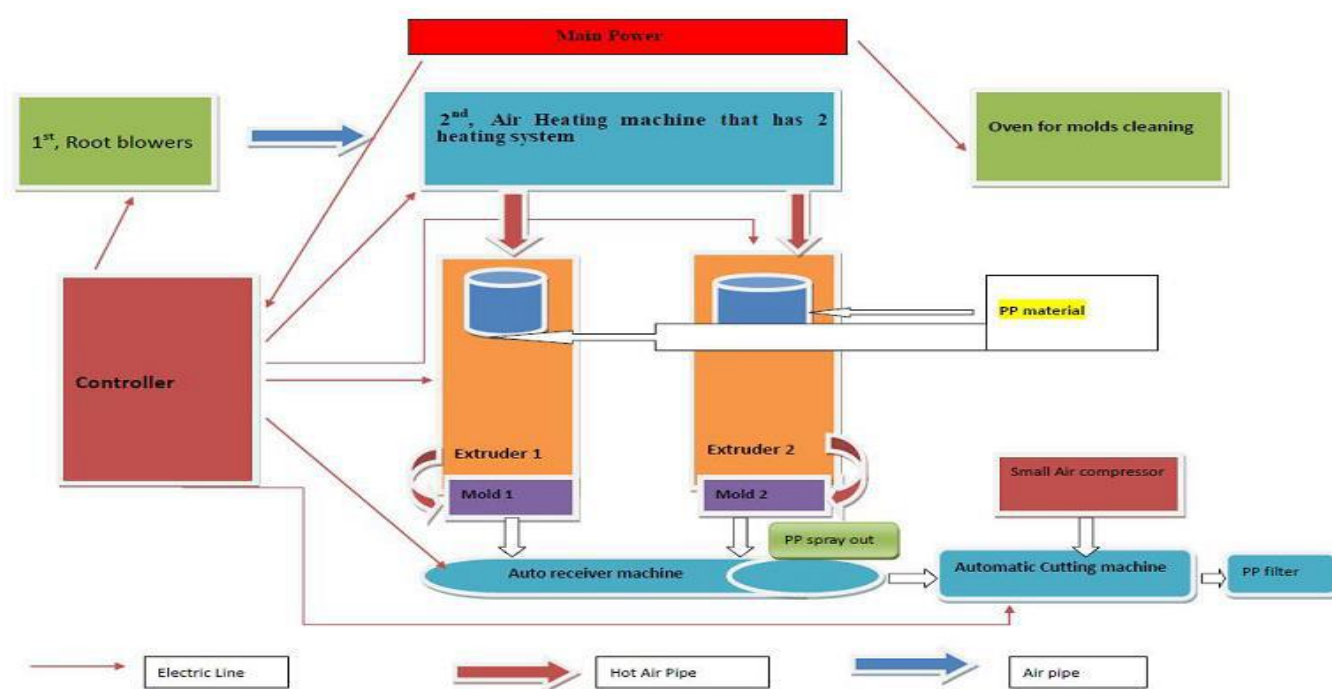

5. Jug Tap		Jug Tap is used as water dispenser for Jugs. This tap comes in weight of 35 gm and is made up of Polypropylene material.
6. Dolphin Tap		Dolphin Tap is used as water dispenser for domestic reverse osmosis plant, Pet water dispenser and earthen pots. This tap comes in weight of 28 gm and is made up of Polypropylene material.

The demand for our products is dependent on and directly affected by factors affecting industries where our products are used. Despite the impact of Covid- 19 pandemic, our revenue from operations for the period ended November 30, 2021 was Rs 16.78 lakhs. Further, India is in the stage of distribution of vaccines, we cannot predict the timeline as to when the vaccines shall reach at mass level. We continue to closely

OUR COMPANY OPERATIONS

1. Manufacturing of Water softener equipment:

Our company is engaged in the business of manufacturing spun filter cartridge (also commonly known as pp spun filter cartridge, spun polypropylene filter cartridge, spun water filter cartridge, spun sediment filter) which is a depth-filter cartridge with a 100% high purity polypropylene filter media. It has long on-stream life and broad chemical compatibility.

Quality RO spun filter cartridges are widely used as a pre-filter or final filter for industrial, such as spun filters for reverse-osmosis, pp spun filters for process water & groundwater remediation, poly spun filter cartridges for chemical process, pharmaceutical, and other applications. Our spun filter cartridges range from 0.5 to 120 microns with lengths from 5" to 40". For manufacturing, we procure polypropylene raw materials and manufacture various types of softener equipment such as filter parts, premium filter cartridges, taps, membrane housing etc.

Polypropylene (PP) is the most common media in the manufacturing process. Compared to pleated filters, they have a limited surface area and not have a wide chemical compatibility or operating temperature with wound filters, but they have the advantage of depth filtration. Spun filter cartridges can be used either as a pre-filter or final filter for industrial, chemical process, pharmaceutical, food/beverage, cosmetics, water, and other applications.

2. Contract Manufacturing:

Our company is also engaged in contractual manufacturing based on die casting. During the die casting process, molten metal is forced into a mould cavity under high pressure. The moulds, also called dies, are made from non-ferrous metals such as zinc and aluminium. Manufacturers generally use die casting for high-volume production, especially for small to mid-sized castings. Die cast parts are ubiquitous, from everyday consumer objects such as sink faucets and steering wheels to industrial parts such as pneumatic nailers.

3. Trading of RO equipment spares and associated products:

As a trader, our company is a reseller of RO equipment and spares. We purchase these items from wholesalers and resell it to smaller-sized businesses. At the moment, our trading segment is more focused on the B2B model.

4. Contractual Logistics to local infrastructure and manufacturing companies:

Our company is also engaged in contractual logistics services to local infrastructure and manufacturing companies. Presently, while these services are outsourced to third-party providers, our Company intends to invest in logistic assets (viz. OUR PRODUCTS

Products	Description
1. Membrane Housing	Membrane housing is a pressure vessel for loading membrane elements in a reverse osmosis water treatment system. Currently, there are three types of membrane housings with different materials for water treatment on the market: FRP (fiberglass reinforce plastic), stainless steel and PVC. However, in recent years, more and more reverse osmosis water treatment systems have chosen to use FRP membrane housing. This is because the <u>FRP membrane housing</u> has a strong advantage in terms of pressure bearing capacity, design size, material properties and operating temperature compared to stainless steel and PVC membrane shells. Our company manufacture member housing from Polypropylene and its weight range from 265 to 300 gm.
2. Kent Tap	Kent Tap is used as water dispenser for domestic reverse osmosis plant. This tap comes in weight of 30 gm and is made up of Polypropylene material. It is available in different colors like White, Blue, Green, Pink and Black.
3. PP Spun Filter Cartridge	Spun filters are manufactured through a process that thermally bonds pure Polypropylene microfibers with lower density at the outside surface and progressively higher density toward the center. The all-propylene construction provides excellent thermal & chemical compatibility with high & low pH chemicals. Also, the graded density design efficiently captures contaminants throughout the media matrix resulting in excellent contaminant holding capacity, increased lifetime & low pressure drop. Spun Bonded Cartridges can be used either as a pre-filter or final filter for industrial, chemical process, pharmaceutical, food/beverage, cosmetics, water and other applications. These Filters Spun cartridges are available in a wide range of lengths ranging from 5 inch to 40 inch and micron sizes from 90 to 900 gm.
4. RO Bowl	RO Bowl is a Pre filter housing unit installed in RO water purifier. This is used to pre-filter water so that the life of RO machine can be enhanced. The contaminated water gets filtered first in this bowl and after that goes to water purifier. It clears all the physical impurities from the raw water and also reduces the chances of damage to RO Membrane. Its weight range between 340 to 360 gm.
5. Jug Tap	Jug Tap is used as water dispenser for Jugs. This tap comes in weight of 35 gm and is made up of Polypropylene material.
6. Dolphin Tap	Dolphin Tap is used as water dispenser for domestic reverse osmosis plant, Pet water dispenser and earthen pots. This tap comes in weight of 28 gm and is made up of Polypropylene material.

Phased implementation of Unified Payments Interface

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the “UPI Circulars”) in relation to streamlining the process of public issues of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Investor had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and the continuation of this phase has been extended until March 31, 2020. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and is replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. Further, pursuant to SEBI circular dated March 30, 2020, this phase has been extended till further notice.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs issuing facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Investors into the UPI payment mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement of SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Applicants to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law.

1. The total number of Shares to be allocated to each category as a whole shall be arrived at on a proportionate basis i.e., the total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of applicants in the category X number of Shares applied for).
2. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India ("DPIIT").

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("FDI") through press notes and press releases. The DPIIT, has issued consolidated FDI Policy Circular of 2020 ("FDI Policy 2020"), effective from October 15, 2020, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2020 will be valid until the DIPP issues an updated circular.

The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI and Master Direction –Foreign Investment In India (updated upto March 08, 2019). In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular and Master Direction. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

In case of investment in sectors through Government Route, approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2020 has to be obtained.

The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP / RBI, from time to time.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company. Investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.
