SUMMARY OF OUR INDUSTRY

The India adhesives and sealants market was valued at more than USD 1,100 million in 2021, and it is expected to register an estimated CAGR of over 8% over the forecast period (2022-2027).

The country was negatively affected by the COVID-19 pandemic. The adhesives and sealants market in the country also faced a similar situation. But the market has now reached pre-pandemic levels, and it is expected to grow steadily. The major factors driving the market are the increasing demand from the packaging industry and the growing construction industry in the country. On the flip side, the slowdown of the automotive industry is hindering the growth of the market.

Increasing electronic operations in India and increasing demand for bio-based adhesives are expected to offer various opportunities for the growth of the market over the forecast period.

2. *Inadequate or interrupted supply and price fluctuation of our raw materials could adversely affect our business, results of operations, cash flows, profitability and financial condition.*

Manufacturing quantity and cost of our products are dependent on our ability to source raw materials at acceptable prices and maintain a stable and sufficient supply of our raw materials. The principal raw materials used in our manufacturing process are film, foil, paper & foam & adhesives. The costs of materials consumed for the Fiscals 2022, 2021 and 2020 was Rs. 5275.76 lakhs, Rs. 4632.69 lakhs and Rs. 3893.88 lakhs respectively, representing 82.53%, 83.22%, and 84.02% respectively of our revenue from operations. The raw materials we use are subject

to price volatility and unavailability caused by external conditions, such as commodity price fluctuations within India and globally, weather conditions, supply and demand dynamics, logistics and processing costs, our bargaining power with the suppliers, inflation and governmental regulations and policies. We generally pass on the cost escalations to our customers, however, we may not be able to pass on every instance of escalation in input costs and may have to pursue internal cost control measures or may have absorb in some instances. If we are not able to effectively pass on our escalated costs to customers, such price escalations could have a material adverse impact on our result of operations, financial condition and cash flows. We source our raw materials requirement indigenously. We have not entered into any long-term agreements with any of our raw material or inputs suppliers and we purchase such raw materials and inputs on spot order basis. Purchases made from our top 10 suppliers for the Fiscals 2022, 2021 and 2020 were Rs. 2893.35 lakhs, Rs. 2612.11 lakhs, and Rs. 2156.97 lakhs representing 56.17%, 65.15% and 60.00% of our total raw material purchases for the Fiscals 2022, 2021 and 2020 respectively. While we may find additional suppliers to supply these raw materials, any failure of our suppliers to deliver these raw materials in the necessary quantities or to adhere to delivery schedules, credit terms or specified quality standards and technical specifications may adversely affect our production processes and our ability to deliver orders on time and at the desired level of quality. As a result, we may lose customers which could have a material adverse effect on our business, financial condition and results of operations. Further our raw material supply and pricing may become volatile due to a number of factors beyond our control, including global demand and supply, general economic and political conditions, transportation and labour costs, labour unrest, natural disasters, competition, import duties, tariffs and currency exchange rates, and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use. Therefore, we cannot assure that we will be able to procure adequate supplies of raw materials in the future, as and when we need them on commercially acceptable terms. Further, there can be no assurance that we will be able to effectively manage relationships with our existing or new suppliers or that we will be able to enter into arrangements with new suppliers at attractive terms or at all. If we fail to successfully leverage our existing and new relationships with suppliers, our business and financial performance could be adversely affected.

3. *The outbreak of COVID-19, or outbreak of any other similar severe communicable disease could have a potential impact on our business, financial condition and results of operations.*

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could adversely affect the overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines and lockdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our respective vendors and suppliers. There is currently substantial medical uncertainty regarding COVID-19 and no government-certified treatment or freely accessible vaccine for larger section of the population is available yet. In case there is a rapid increase in severe cases of infections leading to deaths, where the measures taken by governments are not successful or are any bans imposed by the government in this regard are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts.

If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general. The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession. The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. We are still assessing our business operations and system supports and the impact COVID-19 may have on our results and financial condition, but we cannot assure that this analysis will enable us to avoid part or all of any impact from the spread of COVID-19 or its consequences. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our

people. Further if the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company.

4. *We may not be able to accurately manage our inventory, this may adversely affect our goodwill and business, financial condition and results of operations.*

We maintain physical inventory for substantially all of our products. Changes in consumer requirements and demands for these products expose us to significant inventory risks. The demand for specific products can change between the time of manufacturing a product and the time of shipment of these products from our facilities. Further, accurate assessment of market demand requires significant investment in the creation of a sales and marketing network and training of marketing personnel. There is no guarantee that our estimate of market demand in India or in foreign countries will be accurate. In the event that we overestimate the demand for our products, we will have expended resources in manufacturing excess products, export costs, insurance costs, distribution expenses and storage and other allied expenditures and if we under-stock one or more of our products, we may not be able to obtain additional units in a timely manner and will lose out on sales opportunities that our competitors will capitalize on and thereby increase their respective market shares. In addition, if our products do not achieve widespread consumer acceptance, we may be required to take significant inventory markdowns, or may not be able to sell the products at all. Any incorrect assessment of the demand for our products may adversely affect our business, financial condition and results of operations.

5. *Our top 10 customers contribute majority of our revenues from operations for the year ended March 31, 2022. Any loss of business from one or more of them may adversely affect our revenues and profitability.*

Our top 10 and top 5 customers contributed 61.46% and 49.32% of our revenues for the year ended March 31, 2022, 56.40% and 43.87% for the year ended March 31, 2021 and 60.58% and 47.05% for the year ended March 31, 2020. Larger contracts from few customers may represent a larger part of our portfolio, increasing the potential volatility of our results and exposure to individual contract risks. Such concentration of our business on a few projects or clients may have an adverse effect on our results of operations and result in a significant reduction in the award of contracts which could also adversely affect our business if we do not achieve our expected margins or suffer losses on one or more of these large contracts, from such clients. We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations. However, the composition and revenue generated from these customers might change as we continue to add new customers in the normal course of business. While we believe that we shall not face challenges in finding new customers in the ordinary course of business, our results of operations and financial condition may be adversely affected if we remain dependent on few customers.

6. *Our Company has manufacturing facilities located at Bengaluru, Karnataka. Any delay in production at, or shutdown of, or any interruption for a significant period of time, in this facility may in turn adversely affect our business, financial condition and results of operations.*

Our Company has manufacturing facilities located at Bengaluru, Karnataka. Our success depends on our ability to successfully manufacture and deliver our products to meet our customer demand. Our manufacturing facilities is susceptible to damage or interruption or operating risks, such as human error, power loss, breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, loss of services of our external contractors, terrorist attacks, acts of war, break-ins, earthquakes, other natural disasters and industrial accidents and similar events. Further, our manufacturing facilities are also subject to operating risk arising from compliance with the directives of relevant government authorities. Operating risks may result in personal injury and property damage and in the imposition of civil and criminal penalties. If our Company experiences delays in production or shutdowns at any or all of these facilities due to any reason, including disruptions caused by disputes with its workforce or any external factors, our Company's operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations.

7. *The shortage or non-availability of power facilities may adversely affect our manufacturing processes and have an adverse impact on our results of operations and financial condition.*

Our manufacturing processes requires substantial amount of power facilities. The quantum and nature of power requirements of our industry and Company is such that it cannot be supplemented/ augmented by alternative/ independent sources of power supply since it involves significant capital expenditure and per unit cost of electricity produced is very high in view of increasing oil prices and other constraints. We are mainly dependent on State Government for meeting our electricity requirements. Any defaults or non-compliance of the conditions may render us liable for termination of the agreement or any future changes in the terms of the agreement may lead to increased costs, thereby affecting the profitability. Further, since we are majorly dependent on third party power supply; there may be factors beyond our control affecting the supply of power. However, we have installed DG sets at our manufacturing facilities to meet any disruption or non-availability of power supply failures. Any disruption / non availability of power shall directly affect our production which in turn shall have an impact on profitability and turnover of our Company.

8. ***We could become liable to customers, suffer adverse publicity and incur substantial costs as a result of defects in our products, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.***

We face an inherent business risk of exposure to product defects and subsequent liability claims if the use of any of our product's results in personal injury or property damage. We may not be able to meet regulatory relevant quality standards in India, or the quality standards imposed by our customers and applicable to our manufacturing processes, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

If any of our products do not meet regulatory standards or are defective, we may be, inter alia, (i) responsible for damages relating to any defective products, (ii) required to replace, recall or redesign such products or (iii) incur significant costs to defend any such claims.

The failure by us or any of our suppliers to achieve or maintain compliance with regulatory requirements or quality standards may disrupt our ability to supply products sufficient to meet demand until compliance is achieved or, until a new supplier has been identified and evaluated. The quality of raw materials will have an impact on the quality of the finished products and in turn affect our brand image, business and revenue. There is no assurance that our products will always meet the satisfaction of our customers' quality standards. Our failure to comply with applicable regulations could cause adverse consequences to be imposed on us, including fines, injunctions, civil penalties, the refusal of regulatory authorities to grant approvals or renewal, delays, suspensions or withdrawal of approvals, license revocation, seizures or recalls of products, operating restrictions and criminal prosecutions, all of which could harm our business. There can be no assurance that if we need to engage new suppliers to satisfy our business requirement, we will be able locate new suppliers in compliance with regulatory requirements in a timely manner, or at all. Failure to do so could lead to the cancellation of existing and future orders and have a material adverse effect on our business and revenue.

9. ***The restated financial statements have been provided by peer reviewed chartered accountants who is not statutory auditor of our Company.***

The restated financial statements of our Company for the financial year ended March 31 2022, 2021, 2020 has been provided by a peer reviewed chartered accountants who is not statutory auditor of our Company. Our statutory auditor do not hold a valid peer reviewed certificate and hence the same has been provided by the different chartered accountant.

10. ***Our Company has advanced funds against purchase of land, not in consonance with the terms of allotment of the land to original allottee and any event of failure to comply with the land allotment details may require us to loose the land allotment;***

Our company has entered into a Memorandum of Understanding for purchase of an industrial land originally allotted to the vendor on a lease with condition that the allottee shall not transfer the land to any third party without the commencement of commercial operations. Accordingly in the event, the Karnataka Industrial Development Board does not transfer the land in favour of our Company, on terms of breach of terms of allotment, our company may stand to loose the amount so advanced against the purchase of the said land and any other amount it have invested in terms of development, deployed on the land.

11. We generally do business with our customers on purchase order basis and do not enter into long term contracts with most of them.

We have not entered into any long term or definitive agreements with our customers and instead rely on purchase orders to govern the volume, pricing and other terms of sales of our products. However, such orders may be amended or cancelled prior to finalization, and should such an amend mentor cancellation take place, we may be unable to seek compensation for any surplus unpurchased products that we manufacture. Our customers do not, typically, place firm purchase orders until a short time before the products are required from us as a result of which, we do not hold a significant order book at any time, making it difficult for us to forecast revenue, production or sales. Consequently, there is no commitment on the part of the customer to continue to source their requirements from us, and as a result, our sales from period to period may fluctuate significantly as a result of changes in our customers' vendor preferences.

Additionally, our customers have standards for product quantity and quality as well as delivery schedules. Any failure to meet our customers' expectations could result in cancellation of orders. There are also a number of factors other than our performance that are beyond our control and that could cause the loss of a customer. Customers may demand price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, change their outsourcing strategy by moving more work in-house, or replace their existing products with alternative products, any of which may have an adverse effect on our business, results of operations and financial condition.

12. Our Company is dependent on third party transportation providers for the delivery of our goods and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.

Our Company uses third party transportation providers for delivery of our goods. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business. In addition, goods may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our raw materials may have an adverse effect on our business and results of operations. Further, disruptions of transportation services due to weather-related problems, strikes, lock-outs, inadequacies in the road infrastructure, or other events could impair ability to procure raw materials on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

13. Our results of operations and cash flows could be adversely affected, if we are unable to collect our dues and receivables from, or invoice our unbilled services to, our clients.

Our business depends on our ability to successfully obtain payment from our clients of the amounts they owe us for work performed. We evaluate the financial condition of our clients and usually bill and collect on relatively short cycles. There is no guarantee that we will accurately assess the creditworthiness of our clients. Such conditions could cause clients to delay payment, request modifications of their payment terms, or default on their payment obligations to us, all of which could increase our receivables. Timely collection of fees for client services also depends on our ability to complete our contractual commitments and subsequently bill for and collect our contractual service fees. If we are unable to meet our contractual obligations, we might experience delays in the collection of, or be unable to collect, our client balances, and if this occurs, our results of operations and cash flows could be adversely affected. Our results of operations and cash flows could be adversely affected, if we are unable to meet our contractual obligations, we might experience delays in the collection of, or be unable to collect, our client balances. In addition, if we experience delays in billing and collection for our services, our cash flows could be adversely affected.

14. We appoint contract labour for carrying out certain of our operations and we may be held responsible for paying the wages of such workers, if the independent contractors through whom such workers are hired default on their obligations, and such obligations could have an adverse effect on our results of operations, cash flows and financial condition.

We engage independent contractors through whom we engage contract labourers for performance of certain functions at our manufacturing facilities for the performance of non-core tasks. Although we do not engage these labourers directly, we are responsible for any wage and statutory payments to be made to such labourers in the event of default by such independent contractors. Any requirement to fund their wage requirements may have an adverse impact on our results of operations and our financial conditions. In addition, we may be liable for or exposed to litigations, sanctions, penalties or losses arising from accidents or damages caused by our workers or contractors.

15. *There are certain discrepancies and non-compliances noticed in some of our corporate records relating to forms filed with the Registrar of Companies and taxation authorities.*

In the past, our company has obtained vehicle loans however, the Company failed to file form CHG-1 in respect of such modifications on two instances, with the concerned Registrar of Companies. Further our company has not created any provision for the payment of gratuity as per the requirements of Accounting Standard (AS) -15. Further our Company had made an allotment of Rs. 30,00,000 divided into 3,00,000 equity shares of Rs. 10/- each on 30.12.2013 but have failed to file the return of allotment in form PAS-3 in respect of such form of allotment and the Company is in process of filing application for condonation of delay in respect of the said form PAS-3. Moreover there are certain discrepancies noticed in the ROC records in respect of resolution for allotment. Although no show cause notice have been issued against our Company till date, in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected. Further we cannot assure that we may not do delayed filings in future and not be subjected to penalty or interest.

Further with the expansion of our operations there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

For further details in respect of indebtedness, please refer the chapter "Restated financial Statements" at page no. 161 of our Draft Prospectus.

16. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity*

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture and trade inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, which could have an adverse impact on our income and cash flows. We estimate our sales based on the forecast, demand and requirements and also on the customer specifications. Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply of raw material and local transportation. Should our supply of raw materials be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers. Such disruption to supply would materially and adversely affect our business, profitability and reputation. In addition, disruptions to the delivery of product to our customer may occur for reasons such as poor handling, transportation bottlenecks, or labour strikes, which could lead to delayed or lost deliveries or damaged products and disrupt supply of these products. To improve our line capability, we try to stock our inventory at our manufacturing facilities. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we overstock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

17. *Compliance with, and changes in, safety, health and environmental laws and regulations may adversely affect our business, prospects, financial condition and results of operations.*

Due to the nature of our business, we expect to be or continue to be subject to extensive and increasingly stringent environmental, health and safety laws and regulations and various labour workplace and related laws and regulations. We are also subject to environmental laws and regulations, including but not limited to:

- Environment (Protection) Act, 1986
- Air (Prevention and Control of Pollution) Act, 1981
- Water (Prevention and Control of Pollution) Act, 1974
- Hazardous Waste Management & Handling Rules, 2008
- Other regulations promulgated by the Ministry of Environment and Forests and the Pollution Control Boards of the state of Karnataka.

which govern the discharge, emission, storage, handling and disposal of a variety of substances that may be used in or result from the operations of our business.

The scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted and hence the costs and management time required to comply with these requirements could be significant. Amendments to such statutes may impose additional provisions to be followed by our Company and accordingly the Company needs to incur clean-up and remediation costs, as well as damages, payment of fines or other penalties, closure of production facilities for non-compliance, other liabilities and related litigation, could adversely affect our business, prospects, financial condition and results of operations.

18. Our manufacturing activities are subject to certain hazards, which can cause injury to people or property in certain circumstances. Such accidents could cause a significant disruption at our manufacturing facilities and these disruptions may adversely affect our production schedules, costs, sales and ability to meet customer demand.

Our business operations are subject to hazards such as risk of equipment failure, work accidents, fire or explosion and require individuals to work under potentially dangerous circumstances or with flammable materials. Although we have not had any such incidents in the past and we employ safety procedures in the operation of our facilities and maintain what we believe to be adequate insurance, there is a risk that an accident or death may occur in one of our facilities. An accident may result in destruction of property or equipment, environmental damage, manufacturing or delivery delays, or may lead to suspension of our operations and/or imposition of liabilities. Any such accident may result in litigation, the outcome of which is difficult to assess or quantify, and the cost to defend litigation can be significant. As a result, the costs to defend any action or the potential liability resulting from any such accident or death or arising out of any other litigation, and any negative publicity associated therewith, may have a negative effect on our business, financial condition, results of operations, cash flows and prospects.

In particular, if operations at our manufacturing facilities were to be disrupted as a result of any significant workplace accident, equipment failure, natural disaster, power outage, fire, explosion, terrorism, adverse weather conditions, labour dispute, obsolescence or other reasons, our financial performance may be adversely affected as a result of our inability to meet customer demand or committed delivery schedules for our products.

Interruptions in production may also increase our costs and reduce our sales and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we may become involved in as a result, which may negatively affect our profitability, business, financial condition, results of operations, cash flows and prospects.

19. Continued operations of our manufacturing facilities are critical to our business and any disruption in the operation of our facility may have a material adverse effect on our business, results of operations and financial condition.

Our manufacturing facilities are subject to operating risks, such as unavailability of machinery, break-down, obsolescence or failure of machinery, disruption in power supply or processes, performance below expected levels of efficiency, labour disputes, natural disasters, industrial accidents and statutory and regulatory restrictions. Our machines have limited lives and require periodic cleaning as well as annual over hauling maintenance. In the event of a breakdown or failure of such machinery, replacement parts may not be available and such machinery may have to be sent for repairs or servicing. We have not entered into any technical support service agreements for the maintenance and smooth functioning of our equipment and machineries. This may lead to delay and disruption in our production process that could have an adverse impact on our sales, results of operations, business growth and prospects.

- 20. *The orders placed by customers may be delayed, modified or cancelled, which may have an adverse effect on our business, financial condition and results of operations. Further any defaults or delays in payment by a significant portion of our customers, may have an adverse effect on cash flows, results of operations and financial condition.***

We may encounter problems in executing the orders in relation to our products or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such products or cause its cancellation. Due to the possibility of cancellations or changes in scope and schedule of delivery of such products, resulting from our customers discretion or delay in procurement of raw material or problems we encounter in the delivery of such products or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the customers may default or otherwise fail to pay amounts owed.

In the ordinary course of business, we extend credit to our customers. Consequently, we are exposed to the risk of the uncertainty regarding the receipt of the outstanding amounts. Our results of operations and profitability depend on the credit worthiness of our customers. Certain of these customers may have weak credit histories and we cannot assure that these counterparties will always be able to pay us in a timely fashion, or at all. Any adverse change in the financial condition of our customers may adversely affect their ability to make payments to us.

- 21. *The Company is yet to place orders for 100% of the plant & machineries for our proposed object, as specified in the Objects of the Issue. Any delay in placing orders, procurement of plant & machineries may delay our implementation schedule and may also lead to increase in price of these plant & machineries, further affecting our revenue and profitability.***

Although we have identified the type of plant and machineries required to be bought however, we are yet to place orders for 100% of the plant & machinery worth Rs [●] lakhs as detailed in the “Objects of the Issue” beginning on page 86 of this Draft Prospectus. These are based on our estimates and on third-party quotations, which are subject to a number of variables, including possible cost overruns, changes in management’s views of the desirability of current plans, change in supplier of plant & machineries, equipments among others, which may have an adverse effect on our business and results of operations. Further, we cannot assure that we would be able to procure these plant and machineries, or procure the same within budgeted costs and timelines. Delays in acquisition of the same could result in the cost and time overrun, which would have a material adverse effect on our business, results of operations and financial condition. For further details, please refer to the chapter titled “Objects of the Issue” beginning on page 86 of this Draft Prospectus.

- 22. *Pricing pressure from customers may affect our gross margins and ability to increase our prices, which in turn may adversely affect our revenue from operations, profits and cash flows.***

Consumer demand for our products depends in part on the pricing of our products. We differentiate certain of our products based on their economical pricing coupled with their quality. Our pricing depends on various factors, from time to time. We cannot assure you that we will be able to maintain our margins while offering discounts, or that our discounts will continue to attract consumer demand for our products. The pricing of our products is agreed between us and distributors, and changes to such prices require mutual agreement. The pricing is determined by our cost of products and other costs and other factors. Our cost of products may increase in the future due to various factors, including factors beyond our control such as inflation. We cannot assure that, in the

future, we would be able to pass increased costs on to our customers. Any inability to do so may adversely affect our business and results of operations.

23. *Our lenders have charge over our movable and immovable properties in respect of finance availed by us.*

We have secured our lenders by creating a charge over our movable and immovable properties in respect of loans / facilities availed by us from banks and financial institutions. The total amounts outstanding and payable by us as secured loans were Rs. 560.29 Lakhs as on March 31, 2022. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be subject to Invocation/forfeiture by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations. Any failure on our part to comply with the terms in our loan agreements would generally result in events of default under these loan agreements. In such a case, the lenders under each of these respective loan agreements may, at their discretion, accelerate payment and declare the entire outstanding amounts under these loans due and payable, and in certain instances, enforce their security which has been constituted over our various assets and take possession of those assets, which could adversely affect our liquidity and materially and adversely affect our business and operations.

24. *Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of our Company.*

Our Company may have not complied with certain accounting standards and has not taken Actuarial Valuation Report as required as per AS-15 Employee Benefits. Although, no show cause notice in respect of the same has been received by the Company till date. Any penalty imposed for such non-compliance could affect our financial conditions to that extent. In relation to gratuity, we have not received any notice/communication from the relevant authority, for the previous defaults till date. However, our Company has obtained any insurance for its liability towards the payment of gratuity from Life Insurance Corporation of India.

25. *We have taken guarantees from Promoters in relation to debt facilities provided to us.*

We have taken guarantees from Promoters in relation to our secured debt facilities availed from our Bankers. In an event any of these persons withdraw or terminate its/their guarantees, the lender for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition. For more information, please see the chapter titled “*Financial Indebtedness*” beginning on page 178 of this Draft Prospectus.

26. *Any increase in interest rates would have an adverse effect on our results of operations and will expose our Company to interest rate risks.*

We are dependent upon the availability of equity, cash balances and debt financing to fund our operations and growth. Any fluctuations in interest rates may directly impact the interest costs of such loans and, in particular, any increase in interest rates could adversely affect our results of operations. Furthermore, our indebtedness means that a material portion of our expected cash flow may be required to be dedicated to the payment of interest on our indebtedness, thereby reducing the funds available to us for use in our general business operations. If interest rates increase, our interest payments will increase and our ability to obtain additional debt and non-fund-based facilities could be adversely affected with a concurrent adverse effect on our business, financial condition and results of operations. For further details, please refer chapter titled “*Financial Indebtedness*” beginning on page 178 of this Draft Prospectus.

27. *Our loan agreements with various lenders have several restrictive covenants and certain unconditional rights in favour of the lenders, which could influence our ability to expand, in turn affecting our business and results of operations.*

We have entered into agreements for short term and long-term borrowings with certain lenders. As on March 31, 2022 an aggregate of Rs. 560.29 lakhs was outstanding towards loans availed from banks and financial

institutions. The credit facilities availed by our Company are secured by way of mortgage of fixed assets, hypothecation of assets. In case we are not able to pay our dues in time, the same may amount to a default under the loan documentation and all the penal and termination provisions therein would get triggered and the loans granted to the Company may be recalled with penal interest. This could severely affect our operations and financial condition. In addition to the above, our loan documentation includes certain conditions and covenants that require us to obtain consents from the aforesaid banks prior to carrying out certain activities like entering into any amalgamation, demerger, merger and corporate reconstruction, changing our management and operating structure, making any fresh borrowings or creating fresh charges on assets, etc. Any failure to comply with any condition or covenant under our financing agreements that is not waived by the lending banks or is not otherwise cured by us, may lead to a termination of our credit facilities, acceleration of all amounts due under the said credit facility, which may adversely affect our ability to conduct our business and operations or implement our business plans. Further, the said credit facilities can be renewed/enhanced/cancelled/suspended/reduced and the terms and conditions of the same can be altered by the lending banks, at their discretion. In the event, the lending banks refuse to renew / enhance the credit facilities and/or cancels / suspends / reduces the said credit facilities and/or alters the terms and conditions to the derogation of our Company, our existing operations as well as our future business prospects and financial condition may be severely affected. As on the date of the Draft Prospectus, we have not received NOC for the Issue from our lenders.

28. Unsecured loans taken by our Company can be recalled by the lenders at any time.

As on March 31, 2022 our Company has unsecured loans amounting to Rs. 46.79 lakhs from directors that are repayable on demand to the relevant lender. These loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. In such cases, our Company may be required to repay the entirety of the unsecured loans together with accrued interest. Our Company may not be able to generate sufficient funds at short notice to be able to repay such loans and may resort to refinancing such loans at a higher rate of interest and on terms not favourable to it. Failure to repay unsecured loans in a timely manner may have a material adverse effect on our business, cash flows and financial condition. For further details of unsecured loans of our Company, please refer the chapter titled “Financial Statements as Restated” beginning on page 161 of this Draft Prospectus.

29. Our Company had negative cash flows in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.

We have experienced negative cash flows in the past which have been set out below:

Particulars	March 31, 2022	March 31, 2021	March 31, 2020
Net cash generated from/(used in) operating activities	(203.99)	500.06	276.58
Net cash generated from/(used in) investing activities	(128.48)	(172.45)	(59.98)
Net cash generated from/ (used in) financing activities	175.02	(199.26)	(183.77)

Cash flows of a company is a key indicator to show the extent of cash generated from the operations of a company to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations. For further details, see section titled “Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 161 and 164, respectively of this Draft Prospectus.

30. Our Promoter play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our promoters remain associated with us.

We benefit from our relationship with our Promoter and our success depends upon the continuing services of our Promoter who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoter have been actively involved in the day-to-day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoter. If our Promoter is unable or unwilling to continue in his present position, we may not be able to replace them easily or

at all. Our Promoter, have over the years-built relations with various customers and other persons who are form part of our stakeholders and are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

- 31. *We may be unable to protect our intellectual property or knowhow from third party infringement which could harm our brand and services.***

We have registered our logo / trademark under class 17 before the Registrar of Trademarks. is granted. We do not have any control over the registration of a trademark and a trademark may also be opposed by third parties that claim to have prior or superior rights. Such actions are not within our control and can severely impact business and may result in requirement to undertake rebranding exercises, all of which result in additional costs for us and could also impact our reputation. We routinely monitor third party trademarks, including domain names, by keeping a check on the use of our trademarks. However, it is possible that we are not aware of misuse of our trademarks, and this could potentially cause loss of our reputation, which could impact our business and may even affect our goodwill. The use of a deceptively similar or identical third-party mark may result in a loss/injury to us. Such an action may also become a lengthy and costly exercise for us and may not always be in our favor.

- 32. *Our Registered Office, manufacturing facilities and corporate office are located on leased premises. If we are unable to renew these leases or relocate on commercially suitable terms, it may have a material adverse effect on our business, results of operation and financial condition.***

Our manufacturing facilities, registered Office and Corporate office situated at Bengaluru; Karnataka are located on premised leased from third party. For details, please refer chapter titled “Our Business” beginning on page 110 of this Draft Prospectus. Though we have entered into long-term lease agreements with respect to our facilities, such lease agreements may be terminated early in the event of a default or upon the expiry of their tenure and may not be renewed or if do not comply with certain conditions of the lease, which could have an adverse effect on our operations. We cannot further assure you that the lease agreement will be renewed at all or renewed on favourable terms. In the event of non-renewal of lease, we may be required to shift our existing facilities, to a new location and there can be no assurance that the arrangement we enter into in respect of new premises would be on such terms and conditions as the present one. This could have a material adverse impact on our business and operations.

- 33. *Our existing manufacturing facilities are concentrated in a single region i.e., Bangalore and the inability to operate and grow our business in this particular region may have an adverse effect on our business, financial condition, results of operations, cash flows and future business prospects.***

All our facilities like registered office, manufacturing units is located in Bangalore, which exposes us to risks of concentration. Our success depends on our ability to successfully manufacture and deliver our products to meet our customer demand. Our manufacturing facilities are susceptible to damage or interruption or operating risks, such as human error, power loss, breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, loss of services of our external contractors, terrorist attacks, acts of war, break-ins, earthquakes, other natural disasters and industrial accidents and similar events. It is also subject to operating risk arising from compliance with the directives of relevant government authorities. Operating risks may result in personal injury and property damage and in the imposition of civil and criminal penalties. If our Company experiences delays in production or shutdowns at our facility due to any reason, including disruptions caused by disputes with its workforce or any external factors, our Company’s operations will be significantly affected, which in turn would have a material adverse effect on its business, financial condition and results of operations.

Further, any materially adverse social, political or economic development, civil disruptions, or changes in the policies of the state government or state or local governments in this region could adversely affect our

manufacturing operations, and require a modification of our business strategy, or require us to incur significant capital expenditure or suspend our operations. Any such adverse development affecting continuing operations at our manufacturing facilities could result in significant loss due to an inability to meet customer contracts and production schedules, which could materially affect our business reputation within the industry. The occurrence of or our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects. Further, continuous addition of industries in and around our manufacturing facilities without commensurate growth of its infrastructural facilities may put pressure on the existing infrastructure therein, which may adversely affect our business.

34. *Failure or disruption to our Information Technology and/or business resource planning systems may adversely affect our business, financial condition, results of operations, cash flows and prospects.*

We have implemented various information technology (“IT”) and/or business resource planning systems to cover key areas of our operations. We are dependent on technology in relation to customer order management and dispatches, financial accounting and scheduling raw material purchase and shipments. We rely on our IT infrastructure to provide us with connectivity and data backup across our locations and functions. While the business resource planning systems that we have implemented have enabled us to improve our working capital cycles, despite an increase in our sales over the period, we can provide no assurance that we will be able to do so in the future.

We believe that we have deployed adequate IT disaster management systems including data backup and retrieval mechanisms, at our manufacturing facilities and registered office. However, any failure or disruption in the operation of these systems or the loss of data due to such failure or disruption (including due to human error or sabotage) may affect our ability to plan, track, record and analyze work in progress and sales, process financial information, manage our creditors, debtors and hedging positions, or otherwise conduct our normal business operations, which may increase our costs and otherwise adversely affect our business, financial condition, results of operations and cash flows.

35. *Our success depends on our ability to attract and retain key employees, and our failure to do so could harm our ability to grow our business and execute our business strategies.*

We rely on the skills, expertise and experience of our employees to provide quality services to our customers. Our performance and success substantially depend on the ability to attract and retain our key employees, including our management team and experienced engineers. Although some of the members of our senior management have been with us for a long period of time, there can be no assurance that any member of our senior management or other key employees will not leave us in the future. Our success is also highly dependent on our continuous ability to identify, hire, train, retain and motivate highly qualified management, technical, sales and marketing personnel. In particular, the recruitment of skilled engineers and experienced sales personnel remains critical to our success. Further, if we fail to identify suitable replacements of our departed staff, our business and operation could be adversely affected and our future growth and expansions may be inhibited.

36. *We depend on skilled personnel and if we are unable to recruit and retain skilled personnel, our ability to operate or grow our business could be affected.*

Our services are skilled and creative manpower intensive and we engage a considerable number of skilled personnel every year to sustain our growth. Further, we spend significant time and resources in training the manpower we hire. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower. High attrition and competition for manpower may limit our ability to attract and retain the skilled manpower necessary for our future growth requirements. We cannot assure you that skilled manpower will continue to be available in sufficient numbers suitable to our requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may affect our business, financial condition, results of operations and prospects.

37. *We require a number of approvals, NOCs, licenses, registrations and permits in the ordinary course of our business. Some of the approvals are required to be transferred in the name of Srivasavi Adhesive Tapes Limited*

from Srivasavi Adhesive Tapes Private Limited pursuant to name change of our Company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations.

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Inability to obtain or non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. Further, we are required to keep already obtained valid key approvals such as Tax Registrations, IEC Code, for running our operations in a smooth manner. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals including registration under Regulation and Abolition of Contract Labour act. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. Further the rent agreement for our corporate office and for the premises at Unit-1 and Unit-2 are not registered with the Registrar which is not in consonance with the provisions of the Transfer of Property Act.

For further details, please see chapters titled "Key Industry Regulations and Policies" and "Government and Other Approvals" at pages 129 and 189 respectively of this Draft prospectus.

We intend to continue growing by expanding our business operations. This may result in increase in the quantum of our current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled "Objects of the Issue" beginning on page 86 of this Draft Prospectus.

40. We operate in a competitive environment and face fair competition in our business from organized and unorganized players, which may adversely affect our business operations and financial condition.

The industry in which the Company operates is fairly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins, lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. The domestic segment which we cater to is fragmented and fairly competitive. We compete primarily on the basis of quality of our services, customer satisfaction and marketing. Thus, some of our competitors may have certain other advantages over us, including established track record, superior service offerings, larger portfolio of services, technology and greater market penetration, which may allow our competitors to better respond to market trends. They may also have the ability to spend more aggressively on marketing initiatives and may have more flexibility to respond to changing business and economic conditions than we do. We believe that in order to compete effectively, we must continue to maintain our reputation, be flexible and prompt in responding to rapidly changing market demands and customer preferences, and offer customer quality services at competitive prices. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

41. We export our products in 11 countries. Any change in law or any other adverse events affecting these countries could have a significant adverse impact on our export orders and consequently on our results from operations.

We derive a portion of our revenue from operations from exports. For the financial year ended March 31, 2022, 2021 and 2020 our exports constituted 4.55%, 5.38% and 3.43% of the revenue from operation respectively. Our Company exports to 11 countries Brazil, Egypt, France, Germany, Indonesia, Kuwait, Poland, Qatar, Spain, Thailand and UAE based on sales made for the year ended March 31, 2022. Consequently, any adverse changes in these economies such as slowdown in the economy, appreciation of the Indian Rupee vis-à-vis the currencies of these economies, acts of terrorism or hostility targeting these countries, change in the economic laws would directly impact our revenues and results from operations. In the event of change in policies or laws in these regions with respect to Environment, Health and Safety (EHS) norms, quality standards, branding or restrictions on usage of certain products/raw materials, our financial condition and business operations may be adversely affected. In case of any contingencies in future due to which we are unable to operate effectively in these markets, our results from operations, revenues and profitability may be adversely affected.

42. Changes in latest technology or requirement of machinery based on business opportunity may adversely affect Our Company's results of operations and its financial condition.

Modernization and technology upgradation is essential to reduce costs and increase the output. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. Further, the costs in upgrading our technology and modernizing the software may be significant which could substantially affect our finances and operations. Also, the cost of implementing new process as well as R & D would require substantial new capital expenditures and could adversely affect our business, prospects, results of operations and financial condition.

43. We have in the past entered into related party transactions and may continue to do so in the future.

We have entered into various transactions with our Promoter, Directors and their relatives and Group Companies. While we believe that all such transactions are conducted on arm's length basis except that the Company has advanced interest free unsecured loans to its related parties which is not in consonance with the applicable provisions of Section 185 of the Companies Act, 2013, further can be no assurance that we could not have achieved more favourable terms had such transactions were not entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to chapter "*Financials Statements*" beginning on page 161 of the Draft Prospectus.

44. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It also is possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

45. *We may not be successful in implementing our business strategies.*

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

46. *Our inability to effectively manage our growth or to successfully implement our business plan and growth strategies could have an adverse effect on our business, results of operations and financial condition. The success of our business will depend greatly on our ability to effectively implement our business and growth strategies.*

Our growth strategies require us to develop and strengthen relationships with existing customers for our business who may drive high volume orders on an ongoing basis. To remain competitive, we seek to increase our business from existing customers and by adding new customers, as well as expanding into new geographical markets. Our success in implementing our growth strategies may be affected by:

- our ability to maintain the quality of our products;
- our ability to increase our manufacturing capacities;
- our ability to increase our geographic international presence;
- the general condition of the global economy (particularly of India and the other markets that we currently or may operate in);
- our ability to compete effectively with existing and future competitors,
- changes in the Indian or international regulatory environment applicable to us.

Many of these factors are beyond our control and there is no assurance that we will succeed in implementing our strategies. While we have successfully executed our business strategies in the past, there can be no assurance that we will be able to execute our strategies on time and within our estimated budget, or that our expansion and development plans will increase our profitability. Any of these factors could adversely impact our results of operations. We expect our growth strategies to place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to manage our business and growth strategies could have a material adverse effect on our business, financial condition and profitability.

47. *Any inability to address changing industry standards and consumer trends may adversely affect our business, results of operations and financial condition.*

The future success of our business will depend in part on our ability to respond to technological advances, consumer preferences and emerging industry standards and practices in a cost-effective and timely manner. The development and implementation of such new technology entails technical and business risks. We may have to incur substantial capital investment to upgrade our equipment and manufacturing facilities. While we continue to invest in various product development initiatives, adopt enhanced technologies and processes for the development of new products, we are subject to general risks associated with introduction and implementation of new products including the lack of market acceptance and delays in product development. There can be no assurance that we will be able to successfully develop new products or that such new products will receive market acceptance or adapt our manufacturing processes to incorporate new technologies or address changing consumer trends or emerging industry standards. Any rapid change in the expectations of our customers, in our business on account of changes in technology or introduction of new alternate products could adversely affect our business, results of operations and financial condition.

48. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation and goodwill of our Company. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

49. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since, the Proceeds from Issue is less than Rs.10,000 lakh, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

50. *Within the parameters as mentioned in the chapter titled “Objects of this Issue” beginning on page 86 of this Draft Prospectus, our Company’s management will have flexibility in applying the proceeds of the Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.*

We intend to use Net Proceeds towards meeting the funding the working capital requirements of the Company and General corporate purposes. We intend to deploy the Net Proceeds in financial year 2022-23 and 2023-24 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Net Proceeds, please refer chapter titled “Objects of the Issue” beginning on page 86 of this Draft Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company's Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled "*Objects of the Issue*" beginning on page 86 of this Draft Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the proceeds of this Issue.

However, Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. However, in accordance with Section 27 of the Companies Act, 2013, and relevant provisions of SEBI ICDR Regulations, 2018, a company shall not vary the objects of the Issue without our Company being authorised to do so by our shareholders by way of special resolution and other compliances in this regard. Our Promoter and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

51. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the 'Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled "*Objects of the issue*" beginning on page 86 of this Draft Prospectus.

52. *Our insurance coverage may not be adequate.*

Our Company has obtained insurance coverage in respect of certain risks. We maintain insurance policies in respect of our business and operations covering stock, damage to buildings, plant and machinery, accessories and stocks. We have also taken commercial vehicle package policy and various car policy. These insurance policies are renewed periodically to ensure that the coverage is adequate, our insurance policies do not cover all risks. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected. For further details, please refer chapter titled "*Our Business*" beginning on page 110 of this Draft Prospectus.

53. *Our Promoter and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

After completion of the Issue, our Promoter and Promoter Group will collectively own [●] % of the Equity Shares. As a result, our Promoter together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our AoA. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoter will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

54. *Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

55. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 160 of this Draft Prospectus.

56. *In addition to normal remuneration or benefits and reimbursement of expenses, some of our directors and key managerial personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Our Directors and Key Managerial Personnel (“KMP”) are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Directors and KMP may also be interested to the extent of their shareholding and dividend entitlement in our Company. For further information, see “*Capital Structure*” and “*Our Management*” on pages 71 and 140, respectively, of this Draft Prospectus.

57. *An inability to renew quality accreditations in a timely manner or at all, or any deficiencies in the quality of our products may adversely affect our business prospects and financial performance.*

We obtain and maintain quality certifications and accreditations from independent certification entities and also comply with prescribed specifications and standards of quality approved by the Government in connection with the products we manufacture. Such specifications and standards of quality is an important factor in the success and wide acceptability of our products. If we fail to comply with applicable quality standards or if the relevant accreditation institute or agency declines to certify our products, or if we are otherwise unable to obtain such quality accreditations in the future, in a timely manner or at all, our business prospects and financial performance will be materially and adversely affected.

58. *Industry information included in this Draft Prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although, we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. - 59. Information relating to the installed manufacturing capacity of our manufacturing facilities included in this Draft Prospectus are based on various assumptions and estimates and future production and capacity may vary.**

These assumptions and estimates include the standard capacity calculation practice after examining the equipment installed at the facilities, the period during which the manufacturing facility operated in a year/ period, expected operations, availability of raw materials, expected utilization levels, downtime resulting from scheduled maintenance activities, unscheduled breakdowns, as well as expected operational efficiencies. The Issue Price of our Equity Shares shall be determined by fixed price method. The price is based on numerous factors (For further information, please refer chapter titled “*Basis for Issue Price*” beginning on page 93 of this Draft Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue.

The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- i. quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- ii. changes in revenue or earnings estimates or publication of research reports by analysts;
- iii. results of operations that vary from those of our competitors;
- iv. speculation in the press or investment community;
- v. new laws and governmental regulations applicable to our industry;
- vi. future sales of the Equity Shares by our shareholders;
- vii. general market conditions; and
- viii. domestic and international economic, legal and regulatory factors unrelated to our performance.

64. Our Equity Shares have never been publicly traded, and may experience price and volume fluctuations following the completion of the Issue. Further, our Equity Shares may not result in an active or liquid market and the price of our Equity Shares may be volatile and you may be unable to resell your Equity Shares at or above the Issue Price or at all.

Prior to the Issue, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for our Equity Shares will develop or, if developed, does not guarantee the liquidity of such market for the Equity Shares. Investors might not be able to rapidly sell the Equity Shares at the quoted price if there is no active trading in the Equity Shares. The Issue Price of the Equity Shares will be determined by our Company in consultation with the LM through the Fixed Price Process. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

65. Fluctuations in the exchange rate of the Rupee and other currencies could have a material adverse effect on the value of the Equity Shares, independent of our operating results.

The Equity Shares would be quoted in Rupees on the stock exchange. Any dividends in respect of the Equity Shares will be paid in Rupees and subsequently converted into appropriate foreign currency for repatriation. Any adverse movement in exchange rates during the time it takes to undertake such conversion may reduce the net dividend to investors. In addition, any adverse movement in exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the net proceeds received by shareholders.

The exchange rate of the Rupee has changed substantially in the last two decades and could fluctuate substantially in the future, which may have a material adverse effect on the value of the Equity Shares and returns from the Equity Shares, independent of our operating results.

66. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized in excess of Rs. 1,00,000/- on the sale of listed equity shares on a stock exchange held for more than 12 months will be subject to long term capital gains tax in India at the specified rates in case STT was paid on the sale transaction. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of Securities Transaction Tax (“STT”), on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

67. Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders

68. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.

Under the Companies Act, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution. However, if the laws of the jurisdiction the investors are located in do not permit them to exercise their pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor’s benefit. The value the custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emptive rights granted in respect of the Equity Shares held by them, their proportional interest in us would be reduced.

69. The requirements of being a listed company may strain our resources.

We are not a listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies. Further, as a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management’s attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal

and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

- 70. *We have incurred indebtedness and are yet to obtain NOC / Consent from our lenders, and an inability to comply with repayment and other covenants in our financing agreements could adversely affect our business and financial condition.***

We have entered into agreements with certain banks for short-term and long terms facilities which contain restrictive covenants, including requirements that we obtain NOC/Consent from the lenders prior to undertaking certain matters including altering our capital structure. Further, in terms of security, we are required to create a mortgage or charge over our movable properties. We may also be required to furnish additional security if required by our lenders. Additionally, we are required to, among others, maintain the prescribed debt coverage ratio, net total debt, and fixed asset coverage ratio. There can be no assurance that we will be able to comply with these financial or other covenants at all times or that we will be able to obtain the NOC/Consent necessary to take the actions that we believe are required to operate and grow our business.

- 71. *There is no guarantee that our Equity Shares will be listed on the Emerge Platform of National Stock Exchange of India Limited in a timely manner or at all.***

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Issue and until Allotment of Equity Shares pursuant to this Issue. In accordance with current regulations and circulars issued of SEBI, our Equity Shares are required to be listed on the Emerge Platform of NSE within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

- 72. *Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.***

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder in an Indian company than as a shareholder of an entity in another jurisdiction.

EXTERNAL RISK FACTORS

- 73. *The outbreak of COVID-19, or outbreak of any other similar severe communicable disease could have a potential impact on our business, financial condition and results of operations.***

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could adversely affect the overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines and lockdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our respective vendors and suppliers. There is currently substantial medical uncertainty regarding COVID-19 and no government-certified treatment or freely accessible vaccine for larger section of the population is available yet. In case there is a rapid increase in severe cases of infections leading to deaths, where the measures taken by governments are not successful or are any bans imposed by the government in this regard are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of

COVID-19 remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts.

If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general. The outbreak has significantly increased economic uncertainty.

It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession. The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. We are still assessing our business operations and system supports and the impact COVID-19 may have on our results and financial condition, but we cannot assure that this analysis will enable us to avoid part or all of any impact from the spread of COVID-19 or its consequences. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people. Further if the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company.

74. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located elsewhere, including India. Adverse economic developments, such as rising fiscal or trade deficit, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the countries in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

75. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

76. Foreign investors are subject to foreign investment restrictions under Indian laws that may limit our ability to attract foreign investors, which may have a material adverse impact on the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. For further details, see “*Restrictions on Foreign Ownership of Indian Securities*” on page 236. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, Government of India, investments where the beneficial owner of the Equity Shares is situated in or is a citizen of a country which shares land border with India, can only be made through the Government approval route, as prescribed in FDI Policy. These investment restrictions shall also apply to subscribers of offshore derivative instruments. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all.

77. Any downgrading of India’s sovereign rating by an independent agency may harm our ability to raise financing.

Our borrowing costs and our access to the debt capital markets depend significantly on the credit ratings of India. India’s sovereign ratings have recently been downgraded. Any further adverse revisions to India’s credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing. A downgrading of India’s credit ratings may occur, for example, upon a change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favourable terms and consequently adversely affect our business and financial performance and the price of the Equity Shares.

78. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Prospectus.

As stated in the reports of the Peer Reviewed Auditor included in this Draft Prospectus under chapter “*Financial Statements as restated*” beginning on page 161, the financial statements included in this Draft Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Prospectus. Accordingly, the degree to which the financial information included in this Draft Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

79. The occurrence of natural or man-made disasters could adversely affect our results of operations and financial condition. Hostilities, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural or man-made disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity

and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India or countries to who we export our products could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

80. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, financial condition and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For instance, The Finance Act, 2020 (“Finance Act”), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax (“DDT”), will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident and likely be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Further, the Finance Act, 2019 stipulates any sale, transfer and issue of securities through exchanges, depositories or otherwise to be charged with stamp duty. The Finance Act, 2019 has also clarified that the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures, on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. As such, there is no certainty on the impact that the Finance Act, 2019 may have on our Company’s business and operations.

Further, the Government of India has announced the union budget for Fiscal 2021, pursuant to which the Finance Act, effective from July 1, 2020, has introduced various amendments. As such, there is no certainty on the impact that the Finance Act, 2020 may have on our business and operations or on the industry in which we operate. In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs relating to compliance with such new requirements, which may also require management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

81. *Investors may not be able to enforce a judgment of a foreign court against us.*

Our Company is a company incorporated under the laws of India. All our Company’s Directors and officers are residents of India and all of our assets are located in India. As a result, it may not be possible for investors to effect service of process upon our Company or such persons in jurisdictions outside India, or to enforce judgments obtained against such parties outside India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if that court was of the view that the amount of damages awarded was excessive or inconsistent with public policy, or if judgments are in breach or contrary to Indian law. In addition, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI to execute such a judgment or to repatriate outside India any amounts recovered.

82. *If inflation were to rise in India, we might not be able to increase the prices of our products at a proportional rate in order to pass costs on to our customers and our profits might decline.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

83. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could impact our business, our future financial performance and the prices of the Equity Shares.

84. *A third-party could be prevented from acquiring control of us post this Issue, because of anti-takeover provisions under Indian Law.*

As a listed Indian entity, there are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company subsequent to completion of the Issue. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of Takeover Regulations.

85. *Investors may not be able to enforce a judgment of a foreign court against us, our Directors, the LM or any of their directors and executive officers in India respectively, except by way of a lawsuit in India.*

Our Company is a company incorporated under the laws of India and a majority of our Directors are located in India. A majority of our assets, our Key Managerial Personnel and officers are also located in India. As a result, it may not be possible for investors to effect service of process upon our Company or such persons in jurisdictions outside India, or to enforce judgments obtained against such parties outside India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if that court was of the view that the amount of damages awarded was excessive or inconsistent with public policy, or if judgments are in breach or contrary to Indian law. In addition, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI to execute such a judgment or to repatriate outside India any amounts recovered.

Recognition and enforcement of foreign judgments is provided for under Section 13 and Section 44A of the Code of Civil Procedure, 1908 ("CPC"). India is not party to any international treaty in relation to the recognition or enforcement of foreign judgments. India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, such as the United Kingdom, United Arab Emirates, Singapore and Hong Kong. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements established in the Indian CPC. The CPC only permits the enforcement and execution of monetary decrees in the reciprocating jurisdiction, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties. Judgments or decrees from jurisdictions which do not have

reciprocal recognition with India, including the United States, cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be directly enforceable in India. The party in whose favour a final foreign judgment in a non-reciprocating territory is rendered may bring a fresh suit in a competent court in India based on the final judgment within three years of obtaining such final judgment. However, it is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India or that an Indian court would enforce foreign judgments if it viewed the amount of damages as excessive or inconsistent with the public policy in India. Further, there is no assurance that a suit brought in an Indian court in relation to a foreign judgment will be disposed of in a timely manner. In addition, any person seeking to enforce a foreign judgment in India is required to obtain the prior approval of the RBI to repatriate any amount recovered, and we cannot assure that such approval will be forthcoming within a reasonable period of time, or at all, or that conditions of such approval would be acceptable. Such amount may also be subject to income tax in accordance with applicable law.

Our ability to raise foreign capital may be constrained by Indian law which provides investment restrictions on foreign investors, which may adversely affect the trading price of the Equity Shares. Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions), if they comply with the valuation and reporting requirements specified by the RBI. If a transfer of shares is not in compliance with such requirements and fall under any of the exceptions specified by the RBI, then the RBI's prior approval is required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms, or at all. In terms of the FEMA Non-debt Instruments Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the GoI. Furthermore, on April 22, 2020, the Ministry of Finance, GoI has also made similar amendment to the FEMA Rules. While the term "beneficial owner" is defined under the Prevention of Money-Laundering (Maintenance of Records) Rules, 2005 and the General Financial Rules, 2017, neither the foreign direct investment policy nor the FEMA Rules provide a definition of the term "beneficial owner". The interpretation of "beneficial owner" and enforcement of this regulatory change involves certain uncertainties, which may have an adverse effect on our ability to raise foreign capital. Further, there is uncertainty regarding the timeline within which the said approval from the GoI may be obtained, if at all.

SECTION VI – ABOUT THE COMPANY

INDUSTRY OVERVIEW

The information in this chapter has been extracted from the websites of and publicly available documents from various sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with this Issue has independently verified the information provided in this chapter. Industry sources and publications, referred to in this chapter, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

GLOBAL ECONOMIC OVERVIEW

A tentative recovery in 2021 has been followed by increasingly gloomy developments in 2022 as risks began to materialize. Global output contracted in the second quarter of this year, owing to downturns in China and Russia, while US consumer spending undershot expectations. Several shocks have hit a world economy already weakened by the pandemic: higher-than-expected inflation worldwide—especially in the United States and major European economies—triggering tighter financial conditions; a worse-than-anticipated slowdown in China, reflecting COVID-19 outbreaks and lockdowns; and further negative spillovers from the war in Ukraine.

The baseline forecast is for growth to slow from 6.1 percent last year to 3.2 percent in 2022, 0.4 percentage point lower than in the April 2022 World Economic Outlook. Lower growth earlier this year, reduced household purchasing power, and tighter monetary policy drove a downward revision of 1.4 percentage points in the United States. In China, further lockdowns and the deepening real estate crisis have led growth to be revised down by 1.1 percentage points, with major global spillovers. And in Europe, significant downgrades reflect spillovers from the war in Ukraine and tighter monetary policy. Global inflation has been revised up due to food and energy prices as well as lingering supply-demand imbalances, and is anticipated to reach 6.6 percent in advanced economies and 9.5 percent in emerging market and developing economies this year—upward revisions of 0.9 and 0.8 percentage point, respectively. In 2023, disinflationary monetary policy is expected to bite, with global output growing by just 2.9 percent.

The risks to the outlook are overwhelmingly tilted to the downside. The war in Ukraine could lead to a sudden stop of European gas imports from Russia; inflation could be harder to bring down than anticipated either if labor markets are tighter than expected or inflation expectations unanchor; tighter global financial conditions could induce debt distress in emerging market and developing economies; renewed COVID-19 outbreaks and lockdowns as well as a further escalation of the property sector crisis might further suppress Chinese growth; and geopolitical fragmentation could impede global trade and cooperation. A plausible alternative scenario in which risks materialize, inflation rises further, and global growth declines to about 2.6 percent and 2.0 percent in 2022 and 2023, respectively, would put growth in the bottom 10 percent of outcomes since 1970.

With increasing prices continuing to squeeze living standards worldwide, taming inflation should be the first priority for policymakers. Tighter monetary policy will inevitably have real economic costs, but delay will only exacerbate them. Targeted fiscal support can help cushion the impact on the most vulnerable, but with government budgets stretched by the pandemic and the need for a disinflationary overall macroeconomic policy stance, such policies will need to be offset by increased taxes or lower government spending. Tighter monetary conditions will also affect financial stability, requiring judicious use of macroprudential tools and making reforms to debt resolution frameworks all the more necessary. Policies to address specific impacts on energy and food prices should focus on those most affected without distorting prices. And as the pandemic continues, vaccination rates must rise to guard against future variants. Finally, mitigating climate change continues to require urgent multilateral action to limit emissions and raise investments to hasten the green transition.

GROWTH PROJECTIONS

(Source: <https://www.imf.org/en/Publications/WEO/Issues/2022/07/26/world-economic-outlook-update-july-2022#Overview>)

INDIAN ECONOMY OVERVIEW

The Indian economy has fully recovered to the pre-pandemic real GDP level of 2019-20, according to the provisional estimates of GDP released on May 31, 2022. Real GDP growth in FY 2021-22 stands at 8.7%, which is 1.5% higher than the real GDP in FY 2019-20. These figures are associated with stronger growth momentum, indicating increased economic demand. The investment rate in the fourth quarter increased to its highest level in the previous nine quarters. Moreover, capacity utilisation in the manufacturing sector rose in the fourth quarter, as against the third quarter, implying a build-up in demand, which is consistent with the growth objectives of the Indian economy.

Future capital spending of the government in the Indian economy is expected to be supported by factors such as tax buoyancy, streamlined tax system, thorough assessment and rationalisation of the tariff structure and digitisation of tax filing. In the medium term, an increase in capital spending on infrastructure and asset-building projects is set to increase growth multipliers. Furthermore, revival in monsoon and Kharif sowing helped the agriculture sector gain momentum. As of July 11, 2022, the South-West monsoon has covered the entire country, resulting in 7% higher rainfall than the normal level. India has emerged as the fastest-growing major economy in the world, and is expected to be one of the top three economic powers globally over the next 10-15 years, backed by its robust democracy and strong partnerships.

Market Size

India's nominal GDP at current prices was estimated at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy, and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between this period. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 1.2% of GDP in 2021-22.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines lost steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing 70% to the country's economic activity. With the economic scenario improving on recovering from the COVID-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also launching growth-oriented policies to boost the economy. In view of this, the country witnessed many developments in the recent past, some of which are mentioned below.

- As of July 15, 2022, India's foreign exchange reserves reached US\$ 572.71 billion.
- Private equity-venture capital (PE-VC) sector investments stood at US\$ 34.1 billion, up 28% YoY, across 711 deals through January-June 2022.

- In July 2022 (until 21 July 2022), Foreign Portfolio Investment (FPI) outflows stood at Rs. 228,862 crore (US\$ 28.65 billion)
- Wheat procurement in Rabi 2021-22 and anticipated paddy purchase in Kharif 2021-22 would include 1208 lakh (120.8 million) metric tonnes of wheat and paddy from 163 lakh (16.7 million) farmers, as well as a direct payment of MSP value of Rs. 2.37 lakh crore (US\$ 31.74 billion) to their accounts.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over the recent decade, India's rapid economic growth has led to a substantial increase in demand for exports. Moreover, many of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

Road Ahead

Despite continuing geopolitical concerns, rising interest rates in the US and India and high prices of crude oil and few other commodities, economic activity in India is holding up better than anticipated. Electricity consumption, manufacturing PMI, exports, power supply and other high-frequency indicators indicate that the pace of economic activity has fully recovered from the COVID-19 pandemic shock. Economic growth is anticipated to be fueled by the effective implementation of PLI schemes, development of renewable energy sources while diversifying import dependence on crude oil and bolstering of the banking sector. Recent government initiatives to boost revenue will aid in containing the rise in the current account deficit and ensure that any potential fiscal slippage is adequately contained. Overall, the first ten days of July and June were better than the first two months of FY 2022–23, which is a cause for comfort and even cautious optimism in these testing times. According to a Boston Consulting Group (BCG) analysis, India is expected to be the third-largest consumer economy as its consumption may quadruple to US\$ 4 trillion by 2025 due to changes in consumer behaviour and spending patterns. By 2040, India is anticipated to overtake the US to become the second-largest economy in terms of purchasing power parity (PPP), according to a report by PricewaterhouseCoopers.

Global Manufacturing Industry

Introduction

Manufacturing is the use of labor, goods and machines to produce goods for use or for sale. Manufacturing sector covers work performed in electronics industry, mechanical industry, energy industries, food and beverage industries, plastic industry, metalworking industries, transport and telecommunications industries, chemical or physical transformation of materials, substances, or components into new products. The process of assembling of components or parts of manufactured products also falls into the bracket of manufacturing unless the activity is appropriately put into construction. Construction on the other hand primarily covers works encompassing construction of buildings or assembling of infrastructure (for e.g. highways and utility systems). All those companies performing work in the preparation of sites for new construction and those involved in subdividing land for sale as building sites also are included in construction.

Manufacturing uses raw materials that are products of agriculture, bakery, fishing, forestry, mining and other products of manufacturing operations. Plants, factories or mills that use power-driven machines and materials-handling equipment, transform the raw materials into new finished products and components requiring further manufacturing.

On the other hand construction market includes new work, maintenance or repairs. Production responsibilities are specified contractually with constructions owners (prime contractors) or contracts with subcontractors.

Manufacturing industries are the chief wealth generating sectors of any economy. These industries adopt various technologies and methods widely known as manufacturing process management. Manufacturing industries are important for an economy as they employ a huge share of the labor force and produce materials required by sectors of strategic importance such as national infrastructure and defense. Some of the industries we cover under manufacturing are aerospace, agriculture, defence, environmental services like air purification, glass, lighting, paper and forest products, machinery, metals (like aluminum, copper, exotic metals, iron and steel, non-ferrous metals and precious metals), mining, minerals, packaging and textiles.

The world manufacturing industries in a capitalist economy indulge in mass production and make them available as earning profits. Manufacturing in collectivist economy is guided by a state run agency for making available the manufactured goods depending on the requirement. Manufacturing industry in a modern economy operates under regulations framed by the Government.

India's display panel market is estimated to grow from ~US\$ 7 billion in 2021 to US\$ 15 billion in 2025.

The manufacturing sector of India has the potential to reach US\$ 1 trillion by 2025. The implementation of the Goods and Services Tax (GST) will make India a common market with a GDP of US\$ 2.5 trillion along with a population of 1.32 billion people, which will be a big draw for investors. With impetus on developing industrial corridors and smart cities, the Government aims to ensure holistic development of the nation.

wherein materials, such as aluminum, metal, and paper, are being replaced by highly durable materials. This is anticipated to positively affect the products demand in packaging applications, over the next eight years.

Consistent demand for packaging products from the food & beverage industry is anticipated to remain the key driver for the market in the U.S. Additionally, the increasing presence of discount retailers in the U.S. and the high potential for grocery retail is likely to push the adhesive demand for packaging products. This, in turn, is likely to benefit the long-term growth of the market.

The paper & packaging application segment in the U.S. adhesives market is expected to emerge as the fastest-growing application segment at an estimated CAGR of 4.9% from 2022 to 2030. Increasing demand for bio-based products is expected to augment the demand for hot melt technology over the forecast period and contribute to the expansion of the paper & packaging segment.

The COVID-19 pandemic affected the adhesive & sealant products demand in the U.S. According to the government report, the GDP of the U.S. shrunk by 3.5% in 2020 from 2019, owing to a decline in the manufacturing output of end-use industries such as building & construction, automotive & transportation, aerospace & defense, packaging, and consumer. Overall, adhesives volume registered Y-O-Y growth of 0.4% in 2020.

Technology Insights

Reactive & others segment held the largest share of over 48% in the global adhesives market, in terms of volume. Reactive technology-based products offer several advantages and thus are the key factors behind the growth of the segment. These advantages include high manufacturing speeds owing to short setting time, higher heat resistance, and strong adhesion properties to a wide range of substrates. Hot-melt segment is anticipated to grow at a lucrative pace from 2022 to 2030. Within the textiles & fabrics industry, the use of polyester hot melt adhesives started gaining prominence in the last decade. The wider use of the product was observed in the cotton, wool, and fabrics sub-sector over the last few years. The reason being the product greatly improves the anti-pilling performance of cotton-woven fabrics while enhancing the elastic recovery rate of the fabric.

The use of hot melt adhesive products in the dashboard of automotive vehicles increasingly becoming popular across the globe. These products find applications in the dashboard wherein it offers reduced vibrations coupled with greater insulation from the sound. The increased focus to offer soundproof ride is likely to push the product's penetration in the automotive industry during the forecast period.

Product Insights

The silicones segment attracted the highest demand in the sealants market and accounted for a share of over 31.0% in 2021, in terms of volume. The segment is projected to grow on the account of rising construction activities and investments in infrastructure space. The construction of chemical/industrial process plants, stadiums, bridges, museums, concert halls, research facilities, and medical buildings is projected to benefit the expansion of the segment.

Polyurethane adhesive products exhibit superior properties such as fast curing, good abrasion & chemical resistance, and excellent bond strength on various substrates such as metal, plastic, rubber, wood, and glass. These products are generally based on reactive technology and contain polymers that have urethane linkages. These materials provide solidity, low viscosity, and less cure time to the adhesive.

Epoxy-based products adhere to a wide variety of materials and their superior properties are dependent on the nature of cross-linking polymers. They provide high resistance to chemicals and environments and high-temperature resistance along with high strength bonding on a variety of substrates. These adhesives are generally based on reactive technology.

Application Insights

Paper & packaging was the largest segment in the adhesives industry and accounted revenue share of over 29% in 2021. Flexible packaging is projected to new avenues for market players over the coming years. The sudden rise in healthcare spending positively affected the demand for packaging products on account of the demand for PPE kits, surgical masks, and other healthcare products.

Building & construction segment is projected to provide numerous opportunities in the industry. COVID-19 pandemic created a sizable impact on the various industries such as textile & garments, construction, and automotive in 2020, wherein export trade was also largely impacted. For instance, as per the government data, the textile trade between China and India observed a year-on-year decline of 12.4% in the first 2 months of 2020 from the previous year. The market has shown a positive recovery since the third quarter of 2020 and gained momentum during 2021.

GCC is one of the key growth engines for the Middle East & Africa. Growing construction activities in the GCC region are likely to fuel the demand for adhesives & sealants over the forecast period. In the recent past, the housing sector in GCC countries did not perform well. This was mainly due to the decline in oil prices and economic slowdown. However, over the coming years, the construction industry is projected to perform well owing to the investments in residential construction, energy, and transport infrastructure.

Government initiatives for economic recovery are anticipated to fuel the infrastructural developments in Central & South America. The construction industry in countries such as Argentina, Colombia, and Peru is expected to witness growth during the forecast period. This, in turn, is anticipated to fuel the demand for adhesives & sealants in Central & South America. For instance, the growth of the economy of Peru can largely be attributed to an increase in construction and related business activities in the country.

Indian Adhesive Industry

The India adhesives and sealants market was valued at more than USD 1,100 million in 2021, and it is expected to register an estimated CAGR of over 8% over the forecast period (2022-2027).

The country was negatively affected by the COVID-19 pandemic. The adhesives and sealants market in the country also faced a similar situation. But the market has now reached pre-pandemic levels, and it is expected to grow steadily. The major factors driving the market are the increasing demand from the packaging industry and the growing

construction industry in the country. On the flip side, the slowdown of the automotive industry is hindering the growth of the market.

Increasing electronic operations in India and increasing demand for bio-based adhesives are expected to offer various opportunities for the growth of the market over the forecast period.

KEY MARKET TRENDS

Increasing Usage of Acrylic Water-borne Adhesives

Water-borne acrylic adhesives are considered environment-friendly and economically feasible substitutes to solvent-based adhesives. The major advantage of water-borne adhesives is the absence of volatile organic compounds.

The applications of acrylics include bonding wood, paper, wall panel bonding, sealing (grouts), textiles bonding, paper stamps, leather tile envelopes, labels, etc. Acrylics are used by various end-user industries, such as buildings and construction, woodworking and joinery, paper, board, packaging, etc.

Acrylics are majorly used by the paper, board, and packaging industries. The packaging industry dominates the demand for acrylic adhesives with numerous applications in products such as tapes, labels, cases, and cartons.

With the growing demand for paper, board, and packaging in India, the demand for acrylic-based adhesives is also increasing. Such positive growth is likely to increase the demand for acrylics during the forecast period.

The Electrical and Electronics Segment is Expected to Drive the Market Growth

Sealants are an integral part of electronic parts and are used to manufacture and assemble various electronic items.

ENVIRONMENT LAWS:

National Environmental Policy, 2006

The Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace but builds on the earlier policies. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP Offers an updated circular.

The Reserve Bank of India (“RBI”) also Offers Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI. In terms of the Master Circular, an Indian company may Offer fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh Offer of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular. The Indian company

making such fresh Offer of shares would be subject to the reporting requirements, inter-alia with respect to consideration for Offer of shares and also subject to making certain filings including filing of Form FC-GPR.

Under the current FDI Policy of 2017, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present 100 % foreign direct investment through automatic route is permitted in the sector in which our Company operates. Therefore, applicable foreign investment up to 100% is permitted in our company under automatic route.

Foreign Exchange Management Act, 1999 (“FEMA”) and Regulations framed thereunder.

Foreign investment in India is governed primarily by the provisions of the FEMA which relates to regulation primarily by the RBI and the rules, regulations and notifications there under, and the policy prescribed by the Department of Industrial Policy and Promotion, Ministry of Commerce & Industry, Government of India. As laid down by the FEMA Regulations no prior consents and approvals are required from the Reserve Bank of India, for Foreign Direct Investment under the ‘automatic route’ within the specified sectoral caps. In respect of all industries not specified as FDI under the automatic route, and in respect of investment in excess of the specified sectoral limits under the automatic route, approval may be required from the FIPB and/or the RBI. The RBI, in exercise of its power under the FEMA, has notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2000 ("FEMA Regulations") to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India and Foreign Exchange Management (Export of Goods and Services) Regulations, 2000 for regulation on exports of goods and services. 100 % FDI is permitted in under the automatic route in the IT sector.

Duty Drawback Scheme

The duty drawback scheme is an option available to exporters. Under this scheme, exporter of goods is allowed to take back refund of money to compensate him for excise duty paid on the inputs used in the products exported by him. It neutralizes the duty impact in the goods exported. Relief of customs and central excise duties suffered on the inputs used in the manufacture of export product is allowed to exporters. The admissible duty drawback amount is paid to exporters by depositing it into their nominated bank account. Section 75 of the Customs Act, 1962 and Section 37 of the Central Excise Act, 1944, empower the Central Government to grant such duty drawback. Customs, Central Excise Duties and Service Tax Drawback Rules, 1995 (the “Drawback Rules”) have been framed outlining the procedure to be followed for the purpose of grant of duty drawback (for both kinds of duties suffered) by the customs authorities processing export documentation. Under duty drawback scheme, an exporter can opt for either all industry rate of duty drawback scheme or brand rate of duty drawback scheme.

The all industry rate of duty drawback scheme essentially attempts to compensate exporters of various export commodities for average incidence of customs and central excise duties suffered on the inputs used in their manufacture. Brand rate of duty drawback is granted in terms of rules 6 and 7 of the Drawback Rules in cases where the export product does not have any all industry rate or duty drawback rate, or where the all industry rate duty drawback rate notified is considered by the exporter insufficient to compensate for the customs or central excise duties suffered on inputs used in the manufacture of export products. For goods having an all industry rate, the brand rate facility to particular exporters is available only if it is established that the compensation by all industry rate is less than 80% of the actual duties suffered in the manufacture of the export goods.

Merchandise Exports from India Scheme

Pursuant to the Foreign Trade Policy (2015-2020), the Merchandise Exports from India Scheme (the “MEI Scheme”) was introduced to provide rewards to exporters to offset infrastructure inefficiencies and associated costs in export of goods, especially those having high export intensity, employment potential and ability to enhance India’s export competitiveness. Export of notified goods to notified markets are rewarded under the MEI Scheme. The basis for calculation of the reward under the MEI Scheme is on the Free on Board (“FOB”) value of exports realized in free foreign exchange or on the FOB value of exports mentioned in the shipping bill, whichever is less, unless otherwise specified. With effect from June 1, 2015, the MEI Scheme mandatorily requires a declaration of intent to be endorsed on the shipping bills (except free shipping bills) to be eligible to claim any reward under the MEI Scheme.

Ownership restrictions of FIIs

Under the portfolio investment scheme, the total holding of all FIIs together with their sub-accounts in an Indian company is subject to a cap of 24% of the paid-up capital of a company, which may be increased up to the percentage of sectoral cap on FDI in respect of the said company pursuant to a resolution of the board of directors of the company and the approval of the shareholders of the company by a special resolution in a general meeting. A significant feature of the Act is the appointment of arbitrators by the Chief Justice of India or Chief Justice of High Court. Prevention of Money Laundering Act, 2002

Money laundering is the processing of criminal proceeds to disguise its illegal origin. Terrorism, illegal arms sales, financial crimes, smuggling, and the activities of organized crime, including drug trafficking and prostitution rings, generate huge sums. Embezzlement, insider trading, bribery and computer fraud also produce large profits and create an incentive to legitimize the ill-gotten gains through money laundering. When a criminal activity generates substantial profits, the individual or group involved in such activities route the funds to safe heavens by disguising the sources, changing the form, or moving the funds to a place where they are less likely to attract attention.

Most fundamentally, money laundering is inextricably linked to the underlying criminal activity that generates it. In essence, the laundering enables criminal activity to continue.

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Retail Individual Investor would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six working days.

Phase II: This phase commenced on completion of Phase I, i.e., with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six working days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to three Working Days. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Offer.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful applicants to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post – issue LM will be required to compensate the concerned investor.

The Issue will be made under UPI Phase II of the UPI Circular, unless UPI Phase III of the UPI Circular becomes effective and applicable on or prior to the Issue Opening Date. All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI.

Our Company will be required to appoint one or more of the SCSBs as a Sponsor Bank(s) to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Investors.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism.
